Metacognition in Language Learning and Teaching Åsta Haukås,Camilla Bjørke,Magne Dypedahl,2018-06-14 The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351049139>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This volume offers an exhaustive look at the latest research on metacognition in language learning and teaching. While other works have explored certain notions of metacognition in language learning and teaching, this book, divided into theoretical and empirical chapters, looks at metacognition from a variety of perspectives, including metalinguistic and multilingual awareness, and language learning and teaching in L2 and L3 settings, and explores a range of studies from around the world. This allows the volume to highlight a diverse set of methodological approaches, including blogging, screen recording software, automatic translation programs, language corpora, classroom interventions, and interviews, and subsequently, to demonstrate the value of metacognition research and how insights from such findings can contribute to a greater understanding of language learning and language teaching processes more generally. This innovative collection is an essential resource for students and scholars in language teaching pedagogy, and applied linguistics.

Algebra for Cryptologists Alko R. Meijer,2016-09-01 This textbook provides an introduction to the mathematics on which modern cryptology is based. It covers not only public key cryptography, the glamorous component of modern cryptology, but also pays considerable attention to secret key cryptography, its workhorse in practice. Modern cryptology has been described as the science of the integrity of information, covering all aspects like confidentiality, authenticity and non-repudiation and also including the protocols required for achieving these aims. In both theory and practice it requires notions and constructions from three major disciplines: computer science, electronic engineering and mathematics. Within mathematics, group theory, the theory of finite fields, and elementary number theory as well as some topics not normally covered in courses in algebra, such as the theory of Boolean functions and Shannon theory, are involved. Although essentially self-contained, a degree of mathematical maturity on the part of the reader is assumed, corresponding to his or her background in computer science or engineering. Algebra for Cryptologists is a textbook for an introductory course in cryptography or an upper undergraduate course in algebra, or for self-study in preparation for postgraduate study in cryptology.

Sustainable Building Design Chitrarekha Kabre,2017-10-10 This book bridges the gap between research and practice in the area of sustainable design of buildings, exploring the passive (climate-responsive) design and thermal behavior of buildings and ways to incorporate these enhancements in architectural and civil engineering practice. It presents climatic data and its analysis in a readily usable form and shows ways in which such data can be used to achieve passive (climate-responsive) and sustainable building design. The book presents case studies of sustainable building in each of five climatic zones of India. The book includes climatic data from 62 cities in India and describes how it can be synthesized in sustainable building design. The book can serve as a practical tool or handbook for architects, engineers, and designers, providing them with an understanding of the physical phenomena involved and a means for suitably implementing and applying passive (climate-responsive) design principles. It also offers a valuable resource for researchers, students, and policymakers working in the area of sustainable building design and construction.

Novel Technologies for Vaccine Development Igor S Lukashevich,Haval Shirwan,2014-11-13 This book presents a detailed overview of the development of new viral vector-based vaccines before discussing two major applications: preventive vaccines for infectious diseases and therapeutic cancer vaccines. Viral vector-based vaccines hold a great potential for development into successful pharmaceutical products and several examples at the advanced pre-clinical or clinical stage are presented. Nevertheless, the most efforts were focused on novel and very innovative technologies for new generation of vector-based vaccines. Furthermore, specific topics such as delivery and adjuvant and protection strategies for cell-mediated-based vaccines are presented. Given its scope, the book is a “must read” for all those involved in vaccine development, both in academia and industrial vaccine development.

The Hacker's Dictionary Eric S. Raymond,2017-06-19 This document is a collection of slang terms used by various subcultures of computer hackers. Though some technical material is included for background and flavor, it is not a technical dictionary; what we describe here is the language hackers use among themselves for fun, social communication, and technical debate.

Commandant of Auschwitz Carlo Mattogno,Rudolf Höss,2021-08-18 After the war, Rudolf Höss, commandant of Auschwitz, was captured, tortured and put on trial. This study analyzes all of Höss's post-war statements, checking them for internal consistency and comparing them with established historical facts.

The Role of the Juvenile Court Francis X. Hartmann,1987

Child Abuse and the Legal System Inger J. Sagatun,Leonard P. Edwards,1995 This ground-breaking text examines the legal contexts in which child abuse can be handled, including the criminal, juvenile, domestic relations, and civil courts. The authors focus on the legal rules in each type of proceeding and the ways in which the law has changed to accommodate the special needs of the children in the last fifteen years. Case studies provide examples and help identify the most important issues of child abuse facing the legal system. Child abuse is now a major part of the American legal landscape, involving not only the courts, but also law enforcement and child protection agencies. This is the first text for classroom use to systematically examine the fate of children in the legal system.

Child Welfare and Child Support Congressional Research Congressional Research Service,2014-10-16 The Preventing Sex Trafficking and Strengthening Families Act (H.R. 4980), an omnibus bill that includes both child welfare and child support provisions, was signed into law on September 29, 2014, as P.L. 113-183. The bill received

broad congressional support, passing the House by voice vote (under suspension of the rules) on July 23, 2014, and the Senate by unanimous consent on September 18, 2014. P.L. 113-183 amends the federal foster care program to require state child welfare agencies to develop and implement procedures for identifying, documenting in agency records, and determining appropriate services for certain children or youth who are victims of sex trafficking, or at risk of victimization. State child welfare agencies must also report to law enforcement and the U.S Department of Health and Human Services (HHS), which administers child welfare programs, about such victims. In addition, HHS must establish a national advisory committee on child sex trafficking that must, among other responsibilities, develop policies on improving the nation's response to domestic sex trafficking. P.L. 113-183 also includes provisions to direct child welfare agencies to develop protocols on locating children missing from care. The law also seeks to ensure children in foster care have the opportunity to participate in activities that are appropriate to their age and stage of development. It requires changes in state foster home licensing law to enable foster caregivers to apply a reasonable and prudent parenting standard when determining whether a child in foster care may participate in activities; and directs state child welfare agencies to provide training to caregivers on using this standard. Other provisions in the law seek to ensure permanent adult connections for older children and better aid their transition to successful adulthood. Under the new law, states are not permitted to assign a permanency plan of another planned permanent living arrangement (APPLA) to any child under the age of 16, and must take additional steps to support permanency for children age 16 or older who are assigned that permanency plan. Further, children in foster care who are age 14 or older must be consulted in the development of, and about any revisions to, their case and permanency plans. They must also be made aware of their rights while in care, including the right to receive critical documents (e.g., birth certificate, Social Security card) when they age out of care. P.L. 113-183 separately extends funding authority for Adoption Incentive Payments for three years (FY2014-FY2016). It phases in a revised incentive structure that allows states to earn incentive payments for both adoptions and exits from foster care to legal guardianship, places additional focus on finding permanent homes for older children, and strengthens the way state performance is gauged under the program. The law requires 30% of any state savings (resulting from broadening federal eligibility for adoption assistance) to be used for family strengthening services, including post-adoption services. It also includes provisions to ensure continued federal assistance under the Title IV-E program for eligible children who, following the death or incapacitation of their legal guardian, are placed with previously named successor guardians. Separately, the law appropriates \$15 million to continue Family Connection Grants for one year. These grants are intended to strengthen children's connections to their parents and other relatives.

Developments in Tryptophan and Serotonin Metabolism Graziella Allegri,Carlo V.L. Costa,Eugenio Ragazzi,Hans Steinhart,Luigi Laresio,2012-12-06 This volume contains the proceedings of the Tenth International Meeting of the International Study Group for Tryptophan Research (ISTR V), held at the University of Padova, Padova, Italy, from 25-29 June, 2002 under the auspices of the Ministry of Education, University and Research (MIUR) in Roma, the University of Padova, the Italian Chemical Society - Division of Pharmaceutical Chemistry, the Veneto Region and the City of Padova. The meeting was organized to cover the recent developments in the field of tryptophan research. Weare very honoured that so many speakers accepted our invitation to give plenary lectures which, with the other communications, demonstrated the high scientific value of the Meeting. The publications in this volume are subdivided into nine main chapters, and cover all the major aspects in immunology, neurobiology, psychiatry, pathology, clinics, metabolism, enzymology, pharmacology, toxicology, melatonin, exercise and analytical chemistry. The volume includes the contributions of 325 scientists from 24 countries, and the Musajo Memorial Lecture delivered by Prof. Osamu Hayaishi during the Opening Ceremony.

The Global Benefits of Open Research Martyn Rittman ,2018-11-20 The 2018 MPDI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of the global benefits of open research. Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis

Textbook of Rapid Response Systems Michael A. DeVita,Ken Hillman,Rinaldo Bellomo,2010-12-10 Successor to the editors' groundbreaking book on medical emergency teams, Textbook of Rapid Response Systems addresses the problem of patient safety and quality of care; the logistics of creating an RRS (resource allocation, process design, workflow, and training); the implementation of an RRS (organizational issues, challenges); and the evaluation of program results. Based on successful RRS models that have resulted in reduced in-hospital cardiac arrest and overall hospital death rates, this book is a practical guide for physicians, hospital administrators, and other healthcare professionals who wish to initiate an RRS program within their own institutions.
