Applied Hydrometeorology Pukhraj Rakhecha, Vijay P.

Singh, 2010-02-17 Water is vital for life. Since the dawn of civilization, much effort has been made to harness sources of fresh water. Recent

years have raised global awareness of the need for increasing demand of water worldwide, largely because of growing population, rising standard of living, higher demand for energy, and greater appreciation for environmental quality. As an example, the world population has increased threefold in the past five decades. In order to meet the rising water demand, water resources are being developed by building large dams, reservoirs, barrages and weirs across rivers worldwide. The guiding principle for water resources development has been to ensure adequate supply of water for agriculture, domestic use (including fine drinking water), waste disposal, industries, and energy production, with due attention to maintain the ecosystem functions. This development, however, depends on a holistic, cooperative and scientific approach. The basic inputs in the assessment of water resources for a given region are from hydrological data and the subject of hydrology forms the core in achieving sustainable development of water resources. Barring a few exceptions, hydrological data for most river basins are sparse and therefore it is difficult to comprehensively assess their water resources. The major source of water is rainfall which occurs as a result of condensation of atmospheric moisture governed by the science of meteorology.

Protected Area Governance and Management Graeme L. Worboys, Michael Lockwood, Ashish Kothari, Sue Feary, Ian Pulsford, 2015-04-08 *Protected Area Governance and Management* presents a compendium of original text, case studies and examples from across the world, by drawing on the literature, and on the knowledge and experience of those involved in protected areas. The book synthesises current knowledge and cutting-edge thinking from the diverse branches of practice and learning relevant to protected area governance and management. It is intended as an investment in the skills and competencies of people and consequently, the effective governance and management of protected areas for which they are responsible, now and into the future. The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term, and organisations such as

International Union for the Conservation of Nature are a unifying force in this regard. Nonetheless, protected areas are a socio-political phenomenon and the ways that nations understand, govern and manage them is always open to contest and debate. The book aims to enlighten, educate and above all to challenge readers to think deeply about protected areas—their future and their past, as well as their present. The book has been compiled by 169 authors and deals with all aspects of protected area governance and management. It provides information to support capacity development training of protected area field officers, managers in charge and executive level managers.

Communication in China Yuezhi Zhao, 2008 The stakes for control over the means of communication in China have never been so high as the country struggles with breathtaking social change. This authoritative book analyzes the key dimensions of the transformation in China's communication system since the early 1990s and examines the highly fluid and potentially explosive dynamics of communication, power, and social contestation during China's rapid rise as a global power. Yuezhi Zhao begins with an analysis of the party-state's reconfiguration of political, economic, and ideological power in the Chinese communication system. She then explores the processes and social implications of domestic and foreign capital formation in the communication industry. Drawing on media and Internet debates on fundamental political, economic, and social issues in contemporary China, the book concludes with a nuanced depiction of the pitched and uneven battles for access and control among different social forces. Locating developments in Chinese communication within the nexus of state, market, and society, the author analyzes how the legacies of socialism continue to cast a long shadow. The book not only provides a multifaceted and interdisciplinary portrait of contemporary Chinese communication, but also explores profound questions regarding the nature of the state, the dynamics of class formation, and the trajectory of China's epochal social transformation.

The Films of Edgar G. Ulmer Bernd Herzogenrath, 2009-05-20
Considered the 'King of Poverty Row,' Edgar G. Ulmer (1904-1972) was an auteur of B productions. A filmmaker with an individual voice, Ulmer made independent movies before that category even existed. From his early productions like *The Black Cat* (1934) and Yiddish cinema of the late 1930s to his final films of the late 1950s and early 1960s, Ulmer created enduring works within the confines of economic constraints. Almost forgotten, Ulmer was rediscovered first in the 1950s by the French critics of the *Cahiers du Cinema* and then in the early 1970s by young American directors, notably Peter Bogdanovich. But who was Edgar G. Ulmer? The essays in this anthology attempt to shed some light on the director and the films he created_films that are great possibly because of, rather than despite,

the many restrictions Ulmer endured to make them. In *The Films of Edgar G. Ulmer*, Bernd Herzogenrath has assembled a collection of essays that pay tribute to Ulmer's work and focus not only on his well-known films, including *Detour*, but also on rare gems such as *From Nine to Nine* and *Strange Illusion*. In addition to in-depth analyses of Ulmer's work, this volume also features an interview with Ulmer's wife and an interview Ulmer gave in 1965, in which he comments on actors Bela Lugosi and Boris Karloff, as well as fellow directors Tod Browning and James Whale.

Edward Hunter Snow Thomas G. Alexander, 2012-10-29 The life of Edward Hunter Snow (1865–1932), a leader in second-generation Mormon Utah, closely paralleled the early-twentieth-century development of the West. Born in St. George, Utah, to Julia Spencer and Mormon apostle Erastus Snow, Edward Hunter Snow was instrumental both in the development of southern Utah and in the growth of the Church of Jesus Christ of Latter-day Saints during a period of rapid change. In *Edward Hunter Snow*, the first biography of the man, noted western and Mormon historian Thomas G. Alexander presents Snow as a servant of family, church, state, and nation. Offering insights into the LDS Church around the turn of the twentieth century, Alexander narrates the events of Snow's missions to the American South, including encounters with the Ku Klux Klan in the 1880s, and to New York. As president of the St. George Stake and church leader, Snow sought to reshape the LDS Church's place in Utah—confining its influence to religious and cultural practices and avoiding politics. Although he was involved in numerous causes throughout his life, Snow was especially dedicated to education. A

graduate of what is now Brigham Young University, he worked to ensure that the state's children would have access to quality education. Snow founded what is now Dixie State College and, as a state senator, introduced legislation to establish what is now Southern Utah University. As the nineteenth century gave way to the twentieth, Snow helped St. George grow from an isolated cotton colony to an important stop on the main automobile route from Salt Lake City to Los Angeles. Alexander shows that rugged, southwestern Utah's flowering into cultural and commercial maturity was due to the foresight and dedication of second-generation pioneers like Edward Hunter Snow.
