Meat Simon Fairlie,2010-12-17 Meat: A Benign Extravagance is a groundbreaking exploration of the difficult environmental, ethical and health issues surrounding the human consumption of animals. Garnering huge praise in the UK, this is a book that answers the question: should we be farming animals, or not? Not a simple answer, but one that takes all views on meat eating into account. It lays out in detail the reasons why we must indeed decrease the amount of meat we eat, both for the planet and for ourselves, and yet explores how different forms of agriculture--including livestock--shape our landscape and culture. At the heart of this book, Simon Fairlie argues that society needs to re-orient itself back to the land, both physically and spiritually, and explains why an agriculture that can most readily achieve this is one that includes a measure of livestock farming. It is a well-researched look at agricultural and environmental theory from a fabulous writer and a farmer, and is sure to take off where other books on vegetarianism and veganism have fallen short in their global scope.

Music, the Brain, and Ecstasy Robert Jourdain,1997 At the evolution of music and introduces surprising new concepts of memory and perception, knowledge and attention, motion and emotion, all at work as music takes hold of us. Along the way, a fascinating cast of characters brings Jourdain's narrative to vivid life: idiots savants who absorb whole pieces on a single hearing, composers who hallucinate entire compositions, a psychic who claimed to take dictation from long-dead composers, and victims of brain damage who.

Entrepreneurship George Vozikis,Timothy Mescon,Howard Feldman,Eric W Liguori,2014-12-18 The authors present core concepts of entrepreneurship in an easy-to-follow, logical sequence. Starting with basic definitions and an overarching conceptual framework in Part I, the book then addresses topics pertaining to Venture Initiation (Part II), Venture Management (Part III), and Venture Development (Part IV). Each chapter contains a case study in which a real-life entrepreneur, who confronts the issues of growth and competition, is followed. Venture initiation and development are key components of this book. Entrepreneurship has all the standard features that entrepreneurs-in-training need. The book's strength, however, lies in the clear, straightforward, and logical manner in which the various topics within this complex subject are presented. The book also includes learning objectives, outlines, terms, and review questions.

China's Grain for Green Program Claudio O. Delang,Zhen Yuan,2016-08-23 This book provides a comprehensive review of Grain for Green, China's nationwide program which pays farmers to revert sloping or marginal farm land to trees or grass. The program aims to improve the ecological conditions of much of China, and the socioeconomic circumstances of hundreds of millions of people. GfG is the largest reforestation, ecological restoration, and rural development initiative in history, combining the biggest investment, the greatest involvement, and the broadest degree of public participation ever. The book is organised in three sections. Part One reviews the history of land management in China from 1949 to 1998, exploring the conditions that led to the introduction of GfG, and comparing it to other reforestation programs. Part Two offers an overview of GfG, describing the timeline of the program, compensation paid to farmers, the rules concerning land and plant selection, the extent to which these rules were followed, the attitudes of farmers towards the program, and the way in which the program is organized and implemented by various state actors. Part Three discusses the impact of the GfG, from both ecological and socio-economic standpoints, looking at the economic benefits that result from participating in the GfG, the impact of the GfG across local economies, the redistribution of the labor force and the sustainability of the program, in particular the question of what will happen to the converted land when payments to farmers end.

Dialogue Across the Atlantic Rights,Inter-American Court of Human Rights,Council of Europe,2015 In recent years the European and Inter-American human rights courts have intensified their cooperation. This judicial dialogue is important given the similarity of the rights and freedoms protected by the respective treaties governing the work of the two courts, and the existence of equivalent criteria of admissibility and principles of interpretation. Moreover, the increasing similarity of the issues brought before the two courts has conferred a new relevance on their respective bodies of case-law. This book, published in English and Spanish, presents a selection of the leading decisions delivered by each court in 2014. In addition to their importance in their own right, some of these cases also serve to illustrate parallels in the manner in which the two conventions are interpreted, areas where the methodology diverges and, most importantly, how the two courts are increasingly having regard to each other's approach to human-rights protection. Spaces of the Poor Hans-Christian Petersen,2014-04-30 What do we know about the urban impoverished areas of the world and the living environment of its inhabitants? How did the urban poor cope with their surroundings? How did they interpret and adopt urban space in order to fight against their position at the periphery of society? This volume takes up these questions and investigates how far approaches of cultural sciences can contribute to overcome the »exoticization of the ghetto« (Loïc Wacquant) and instead to look at the heterogeneity and individuality behind the facades. It opens new perspectives for the research of poverty and inequalities that do not stop at collective categories.
