Teaching and Testing L2 Interactional Competence M. Rafael Salaberry,Silvia Kunitz,2019-05-20 This volume features the latest research findings on L2 interactional competence to demonstrate the potential for developing and implementing research-based pedagogy that targets interactional competence (IC) in early instruction in a variety of L2 learning and teaching contexts. Incorporating contributions from both leading and emerging researchers in the area, the book is organized into four sections to provide a systematic account of interactional competence, defined as a set of skills required to co-construct an effective interaction with a variety of interlocutors in a variety of settings, and advocates for IC to be part of a well-rounded curriculum of L2 instruction. The volume provides a comprehensive overview of the different theoretical perspectives on IC within Conversation Analysis, and moves into a discussion of conversation-analytic research findings from a variety of contexts and of their pedagogical implications. The book then presents examples of pedagogy in practice and also illustrates the potential for implementing IC in testing settings. This volume makes a valuable contribution to the growing literature on interactional competence and will be of particular interest to graduate students and researchers in applied linguistics, SLA, language education, curriculum and instruction studies, and educational linguistics. Best Practices in Data Cleaning Jason W. Osborne,2013 Many researchers jump straight from data collection to data analysis without realizing how analyses and hypothesis tests can go profoundly wrong without clean data. This book provides a clear, step-by-step process of examining and cleaning data in order to decrease error rates and increase both the power and replicability of results. Jason W. Osborne, author of *Best Practices in Quantitative Methods* (SAGE, 2008) provides easily-implemented suggestions that are research-based and will motivate change in practice by empirically demonstrating, for each topic, the benefits of following best practices and the potential consequences of not following these guidelines. If your goal is to do the best research you can do, draw conclusions that are most likely to be accurate representations of the population(s) you wish to speak about, and report results that are most likely to be replicated by other researchers, then this basic guidebook will be indispensable.

Longman Anthology of Old English, Old Icelandic, and Anglo-Norman Literatures Richard North,Joe Allard,Patricia Gillies,2020-11-26 The Longman Anthology of Old English, Old Icelandic and Anglo-Norman Literatures provides a scholarly and accessible introduction to the literature which was the inspiration for many of the heroes of modern popular culture, from The Lord of the Rings to The Chronicles of Narnia, and which set the foundations of the English language and its literature as we know it today. Edited, translated and annotated by the editors of *Beowulf and Other Stories*, the anthology introduces readers to the rich and varied literature of Britain, Scandinavia and France of the period in and around the Viking Age. Ranging from the Old English epic *Beowulf* through to the Anglo-Norman texts which heralded the transition Middle English, thematically organised chapters present elegies, eulogies, laments and followed by material on the Viking Wars in the Anglo-Saxon Chronicle, Vikings gods and Icelandic sagas, and a final chapter on early chivalry introduces the new themes and forms which led to Middle English literature, including Arthurian Romances and Chaucer's *Canterbury Tales*. Laying out in parallel text format selections from the most important Old English, Old Icelandic and Anglo-Norman works, this anthology presents translated and annotated texts with useful bibliographic references, prefaced by a headnote providing useful background and explanation.

Economic Evaluation of Sustainable Development Vinod Thomas,Namrata Chindarkar,2019-04-16 This book is open access under a CC BY 4.0 license. This book presents methods to evaluate sustainable development using economic tools. The focus on sustainable development takes the reader beyond economic growth to encompass inclusion, environmental stewardship and good governance. Sustainable Development Goals (SDGs) provide a framework for outcomes. In illustrating the SDGs, the book employs three evaluation approaches: impact evaluation, cost-benefit analysis and objectives-based evaluation. The innovation lies in connecting evaluation tools with economics. Inclusion, environmental care and good governance, thought of as “wicked problems”, are given centre stage. The book uses case studies to show the application of evaluation tools. It offers guidance to evaluation practitioners, students of development and policymakers. The basic message is that evaluation comes to life when its links with socio-economic, environmental, and governance policies are capitalized on.

Political Economy of Education in Lebanon Husein Abdul-Hamid,Mohamed Yassine,2020-03-18 Education is a source of national pride in Lebanon. When the general public was asked how the education system was performing, 76 percent of respondents had a positive opinion; and these satisfaction rates have been consistently high over the years. However, perception of education quality does not reflect the reality of the sector; and learning outcomes, which are the determining metrics of success in education, have been lower than the international average, with a declining trend since 2007. This volume seeks to uncover why the education system in Lebanon is not reaching its full potential. It uses a political economy approach to study the drivers and factors that guide education operations to produce and utilize education outcomes. This includes the study of context, stakeholders, and processes that shape education policies, institutions, and activities. It

also aims to identify enablers of and constraints on policy change and implementation, as well as the achievement of results. In this context, the analysis encompasses how education policies are developed; how education consumables—such as curricula, textbooks, and learning materials—are produced, distributed, and used by learners; how education services are delivered and monitored; and how achieved results are measured. It includes the identification of the most influential actors in the education arena, as well as their vested interests. It also examines unfavorable frameworks for action that are likely to block the adoption of reforms and delay or derail their implementation. The system-level analysis presented in this volume used a mixed-method approach. Qualitative and quantitative analyses were conducted based on a review and analysis of more than 1,900 research papers, articles, and books; laws and policies; expenditures; trends; and enrollment and outcome indicators. Primary methods of inquiry were also used and included interviews, focus group discussions, and a household-based perception survey.

Avoid Food-Drug Interactions U.s. Food and Drug Administration,National Consumers League,2014-07-05 What you eat and drink can affect the way your medicines work. Use this guide to alert you to possible food-drug interactions and to help you learn what you can do to prevent them. In this guide, a food-drug interaction is a change in how a medicine works caused by food, caffeine, or alcohol. A food-drug interaction can: prevent a medicine from working the way it should cause a side effect from a medicine to get worse or better cause a new side effect A medicine can also change the way your body uses a food. Any of these changes can be harmful. This guide covers interactions between some common prescription and over-the counter medicines and food, caffeine, and alcohol. These interactions come from medicine labels that FDA has approved. This guide uses the generic names of medicines, never brand names.

Building an Inclusive Development Community Karen Heinicke-Motsch,Susan Sygall,2004 * An essential resource for all development agencies seeking to include people with disabilities* User-friendly tools and practical advice from experienced practitionersThere are four hundred million people with disabilities living in developing countries today. All too often they live in poverty and isolation. If development is to truly address the needs of the poor and marginalized, the inclusion of people with disabilities is crucial. Building an Inclusive Development Community is a toolkit for development agencies and others concerned with the participation of people with disabilities at all levels and in all areas of the international development process. The manual is organized into issues and includes helpful worksheets, best practice examples, resources and much more.
