**Mestizo Nations** Juan E. De Castro, 2022-08-30 Nationality in Latin America has long been entwined with questions of racial identity. Just as American-born colonial elites grounded their struggle for independence from Spain and Portugal in the history of Amerindian resistance, constructions of nationality were based on the notion of the fusion of populations heterogeneous in culture, race, and language. But this rhetorical celebration of difference was framed by a real-life pressure to assimilate into cultures always defined by Iberian American elites. In *Mestizo Nations*, Juan De Castro explores the construction of nationality in Latin American and Chicano literature and thought during the nineteenth and twentieth centuries. Focusing on the discourse of mestizaje—which proposes the creation of a homogenous culture out of American Indian, black, and Iberian elements—he examines a selection of texts that represent the entire history and regional landscape of Latin American culture in its Western, indigenous, and neo-African traditions from Independence to the present. Through them, he delineates some of the ambiguities and contradictions that have beset this discourse. Among texts considered are the Indianist novel *Iracema* by the nineteenth-century Brazilian author José de Alencar; the *Tradiciones peruanas*, Peruvian Ricardo Palma's fictionalizations of national difference; and historical and sociological essays by the Peruvian Marxist José Carlos Mariátegui and the Brazilian intellectual Gilberto Freyre. And because questions raised by this discourse are equally relevant to postmodern concerns with national and transnational heterogeneity, De Castro also analyzes such recent examples as the Cuban dance band Los Van Van's use of Afrocentric lyrics; Richard Rodriguez's interpretations of North American reality; and points of contact and divergence between José María Arguedas's novel *The Fox from Up Above and the Fox from Down Below* and writings of Gloria Anzaldúa and Julia Kristeva. By updating the concept of mestizaje as a critical tool for analyzing literary text and cultural trends—incorporating not only race, culture, and nationality but also gender, language, and politics—De Castro shows the implications of this Latin American discursive tradition for current critical debates in cultural and area studies. *Mestizo Nations* contains important insights for all Latin Americanists as a tool for understanding racial relations and cultural hybridization, creating not only an important commentary on Latin America but also a critique of American life in the age of multiculturalism.

A Socio-Criminological Analysis of the HIV Epidemic Bruno Meini, 2020-10-06 In the world of the 21st century, epidemics are common biological and social occurrences, with HIV perhaps emphasising this better than any other disease. Medical scientific research has undoubtedly made significant steps forward; meanwhile, the social research field is still in its initial stages, with many awaiting an equally auspicious response. *A Socio-Criminological Analysis of the HIV Epidemic* offers a comprehensive analysis of the multifaceted socio-criminological dimensions of the HIV epidemic and positively contributes to the ongoing sociological debate on infectious diseases. The author intends to create an independent epistemology of HIV to explicate the social forces that impact and determine the course and experience of the epidemic, while also seeking to reframe the popular discourse on HIV to reflect sociological conceptualisations. This latter step leads to the identification of the concept of social interaction as an appropriate tool for highlighting the complex social nature of this virus. The unprecedented challenge posed by the epidemic for the international community calls for global

cooperation aimed at evaluating the diverse aspects of the issues that many actors in this tragic drama must deal with. Given its wide-reaching international appeal, this book is also recommended for those involved or interested in global health issues and infectious diseases. It will be of particular interest to medical researchers, health workers, social scientists, social workers, policymakers, humanitarian workers, HIV and human rights activists, and graduate students.

**O DIREITO E AS METAMORFOSES DO TRABALHO DESAFIOS E PERSPECTIVAS DO DIREITO DO TRABALHO EM UM CENÁRIO DE TRANSFORMAÇÕES** DENISE PIRES FINCATO, GUILHERME WÜNSCH, PEDRO GUILHERME BEIER SCHNEIDER, 2021-07-09 O trabalho, no âmbito do sistema capitalista que predomina no cenário mundial, assume uma posição central dentre os mais diversos elementos que compõem a sociedade moderna. A centralidade conferida ao trabalho faz com que toda e qualquer mudança a ele relacionada cause impactos de caráter generalizado. Em verdade, o labor jamais pôde ser considerado um instituto estanque. Tratando-se de um fenômeno complexo, fatores sociais, políticos, jurídicos, econômicos e psicológicos constantemente alteram suas características e a forma como é compreendido. Neste sentido, transformações no mundo do trabalho não são inteiramente uma novidade.

The HCCH 2019 Judgments Convention Matthias Weller, João Ribeiro-Bidaoui, Moritz Brinkmann, Nina Dethloff, 2023-05-18 This book analyses, comments and further develops on the most important instrument of the Hague Conference on Private International Law (HCCH): the HCCH 2019 Judgments Convention. The HCCH Convention, the product of decades of work, will have a transformative effect on global judicial cooperation in civil matters. This book explores its 'mechanics', i.e. the legal cornerstones of the new Convention (Part I), its prospects in leading regions of the world (Part II), and offers an overview and comment on its outlook (Part III). Drawing on contributions from world-leading experts, this magisterial and ambitious work will become the reference work for law-makers, judges, lawyers and scholars in the field of private international law.

Global Re-introduction Perspectives Pritpal S. Soorae, 2010 This is the second issue in the Global Re-introduction Perspectives series and has been produced in the same standardized format as the previous one. The case-studies are arranged in the following order: Introduction, Goals, Success Indicators, Project Summary, Major Difficulties Faced, Major Lessons Learned, Success of Project with reasons for success or failure. For this second issue we received a total of 72 case-studies compared to 62 in the last issue. These case studies cover the following taxa as follows: invertebrates (9), fish (6), amphibians (5), reptiles (7), birds (13), mammals (20) and plants (12) ... We hope the information presented in this book will provide a broad global perspective on challenges facing re-introduction projects trying to restore biodiversity.--Pritpal S. Soorae.

*Crude Existence* Kristin Reed, 2009-11-15 After decades of civil war and instability, the African country of Angola is experiencing a spectacular economic boom thanks to its most valuable natural resource: oil. Focusing on the everyday realities of people living in the extraction zones, Reed explores the exclusion, degradation, and violence that are the fruits of petrocapiatalism in Angola.

*Un Análisis Socio-Criminológico de la Epidemia del VIH* Bruno Meini, 2022-03-01 En el mundo del siglo XXI, las epidemias son sucesos biológicos y sociales comunes y el VIH quizás lo enfatice mejor que cualquier otra enfermedad. Sin duda, la investigación científica médica ha dado importantes pasos hacia adelante; mientras tanto,

el campo de la investigación social se encuentra todavía en sus etapas iniciales y muchos esperan una respuesta igualmente auspiciosa. Un Análisis Socio-Criminológico de la Epidemia del VIH ofrece un análisis integral de las dimensiones socio-criminológicas multifacéticas de la epidemia del VIH y contribuye positivamente al debate sociológico en curso sobre las enfermedades infecciosas. El autor pretende crear una epistemología independiente del VIH para explicar las fuerzas sociales que impactan y determinan el curso y la experiencia de la epidemia, al mismo tiempo que busca replantear el discurso popular sobre el VIH para reflejar las conceptualizaciones sociológicas. Este último paso conduce a la identificación del concepto de interacción social como una herramienta adecuada para resaltar la compleja naturaleza social de este virus. El desafío sin precedentes que plantea la epidemia para la comunidad internacional exige una cooperación global dirigida a evaluar los diversos aspectos de los problemas que muchos actores de este trágico drama deben abordar. Dado su atractivo internacional de amplio alcance, este libro también se recomienda para aquellos involucrados o interesados en problemas de salud global y enfermedades infecciosas. Será de particular interés para los investigadores médicos, los trabajadores de la salud, los científicos sociales, los trabajadores sociales, los encargados de formular políticas, los trabajadores humanitarios, los activistas del VIH y los derechos humanos y los estudiantes de posgrado.

**e-Learning and the Science of Instruction** Ruth C. Clark,Richard E. Mayer,2016-02-19 The essential e-learning design manual, updated with the latest research, design principles, and examples e-Learning and the Science of Instruction is the ultimate handbook for evidence-based e-learning design. Since the first edition of this book, e-learning has grown to account for at least 40% of all training delivery media. However, digital courses often fail to reach their potential for learning effectiveness and efficiency. This guide provides research-based guidelines on how best to present content with text, graphics, and audio as well as the conditions under which those guidelines are most effective. This updated fourth edition describes the guidelines, psychology, and applications for ways to improve learning through personalization techniques, coherence, animations, and a new chapter on evidence-based game design. The chapter on the Cognitive Theory of Multimedia Learning introduces three forms of cognitive load which are revisited throughout each chapter as the psychological basis for chapter principles. A new chapter on engagement in learning lays the groundwork for in-depth reviews of how to leverage worked examples, practice, online collaboration, and learner control to optimize learning. The updated instructor's materials include a syllabus, assignments, storyboard projects, and test items that you can adapt to your own course schedule and students. Co-authored by the most productive instructional research scientist in the world, Dr. Richard E. Mayer, this book distills copious e-learning research into a practical manual for improving learning through optimal design and delivery. Get up to date on the latest e-learning research Adopt best practices for communicating information effectively Use evidence-based techniques to engage your learners Replace popular instructional ideas, such as learning styles with evidence-based guidelines Apply evidence-based design techniques to optimize learning games e-Learning continues to grow as an alternative or adjunct to the classroom, and correspondingly, has become a focus among researchers in learning-related fields. New findings from research laboratories can inform the design and development of e-learning. However, much of this research published in technical journals is inaccessible to those who actually design e-learning material. By collecting the latest evidence into a single volume and translating the theoretical into the practical, e-Learning and the Science of

Instruction has become an essential resource for consumers and designers of multimedia learning.

Global Algorithmic Capital Markets Walter Mattli, 2018-12-17 Global capital markets have undergone fundamental transformations in recent years and, as a result, have become extraordinarily complex and opaque. Trading space is no longer measured in minutes or seconds but in time units beyond human perception: milliseconds, microseconds, and even nanoseconds. Technological advances have thus scaled up imperceptible and previously irrelevant time differences into operationally manageable and enormously profitable business opportunities for those with the proper high-tech trading tools. These tools include the fastest private communication and trading lines, the most powerful computers and sophisticated algorithms capable of speedily analysing incoming news and trading data and determining optimal trading strategies in microseconds, as well as the possession of gigantic collections of historic and real-time market data. Fragmented capital markets are also becoming a rapidly growing reality in Europe and Asia, and are an established feature of U.S. trading. This raises urgent market governance issues that have largely been overlooked. Global Algorithmic Capital Markets seeks to understand how recent market transformations are affecting core public policy objectives such as investor protection and reduction of systemic risk, as well as fairness, efficiency, and transparency. The operation and health of capital markets affect all of us and have profound implications for equality and justice in society. This unique set of chapters by leading scholars, industry insiders, and regulators discusses ways to strengthen market governance for the benefit of society at whole.

**Economics of Higher Education** Robert K. Toutkoushian, Michael B. Paulsen, 2016-03-18 This book examines the many ways in which economic concepts, theories and models can be used to examine issues in higher education. The topics explored in the book include how students make college-going decisions, the payoffs to students and society from going to college, markets for higher education services, demand and supply in markets for higher education, why and how state and federal governments intervene in higher education markets, college and university revenues and expenditures, how institutions use net-pricing strategies and non-price product-differentiation strategies to pursue their goals and to compete in higher education markets, as well as issues related to faculty labor markets. The book is written for both economists and non-economists who study higher education issues and provides readers with background information and thorough explanations and illustrations of key economic concepts. In addition to reviewing the contributions economists have made to the study of higher education, it also examines recent research in each of the major topical areas. The book is policy-focused and each chapter analyses how contemporary higher education policies affect the behaviour of students, faculty and/or institutions of higher education. Toutkoushian and Paulsen attempted a daunting task: to write a book on the economics of higher education for non-economists that is also useful to economists. A book that could be used for reference and as a textbook for higher education classes in economics, finance, and policy. They accomplish this tough balancing act with stunning success in a large volume that will serve as the go-to place for anyone interested in the history and current thinking on the economics of higher education." William E. Becker, Jr., Professor Emeritus of Economics, Indiana University

**Global Satellite Meteorological Observation (GSMO) Applications** Stojče Dimov Ilčev, 2018-12-05 This book presents principal structures of space systems functionality of meteorological networks, media and applications for modern remote sensing, transmission systems, meteorological ground and users segments and transferring weather data from satellite to the ground infrastructures and users. The author presents techniques and different modes of satellite image interpretation, type of satellite imagery, spectral imaging properties, and enhancement of imaging

technique, geo-location and calibration, atmospheric and surface phenomena. Several satellite meteorological applications are introduced including common satellite remote sensing applications, weather analysis, warnings and prediction, observation and measurements of meteorological variables, atmosphere and surface applications, ocean and coastal applications, land, agriculture and forestry applications, and maritime and aviation satellite weather applications. The author also covers ground segment and user segment in detail. The final chapter looks to the future, covering possible space integrations in meteorological and weather observation. This is a companion book of Global Satellite Meteorological Observation Theory (Springer), which provides the following topics: Evolution of meteorological observations and history satellite meteorology Space segment with satellite orbits and meteorological payloads Analog and digital transmission, type of modulations and broadcasting systems Atmospheric radiation, satellite meteorological parameters and instruments Meteorological antenna systems and propagation
