Peace and Justice Rachel Kerr, Eirin Mobekk, 2007-10-29 In recent years there has been a tendency to intervene in the military, political and economic affairs of failed and failing states and those emerging from violent conflict. In many cases this has been accompanied by some form of international judicial intervention to address serious and widespread abuses of international humanitarian law and human rights in recognition of an explicit link between peace and justice. A range of judicial and non-judicial approaches has been adopted in recognition of the fact that there is no one-size-fits-all model through which to seek accountability. This book considers the merits and drawbacks of these different responses and sets out an original framework for analysing transitional societies and transitional justice mechanisms. Taking as its starting point the post-Second World War tribunals at Nuremburg and Tokyo, the book goes on to discuss the creation of ad hoc international tribunals in the 1990s, hybrid/mixed courts, the International Criminal Court, domestic trials, truth commissions and traditional justice mechanisms. With examples drawn from across the world, including the former Yugoslavia, Rwanda, Cambodia, Timor-Leste, Sierra Leone, Uganda and the DRC, it presents a compelling and comprehensive study of the key responses to war crimes. *Peace and Justice* is a timely contribution in a world where an ever-increasing number of post-conflict societies are grappling with the complex issues of transitional justice. It will be a valuable resource for students, scholars, practitioners and policy-makers seeking to understand past violations of human rights and the most effective ways of addressing them.

Islam and Peacemaking in the Middle East Nathan C. Funk, Abdul Aziz Said, 2009 *Islam and Peacemaking in the Middle East* begins with a set of provocative questions: How, for example, do Muslims conceive of peace? To what degree do differences in the interpretation of Islam affect the ways in which peace is

sought in the contemporary Middle East?Through analysis of regional trends and case studies, the authors explore various Islamic ideas of peace and their bearing on difficult ethnic, nationalist, and civic conflicts. The result widens the parameters for serious discussion of Islam?s contributions?real and potential?to ongoing negotiations.

GVLaw - DIREITO TRIBUTÁRIO FERNANDO AURELIO ZILVETI ARCE,ROBERTO QUIROGA MOSQUERA,EURICO MARCOS DINIZ DE SANTI,2017-10-06 A Série GVlaw se insere no projeto de produção de pesquisa adotado pelo Programa de Educação Executiva da DIREITO GV (GVlaw). A partir do conteúdo das aulas dos cursos, busca-se a construção de conhecimento que seja adequado a estudantes, advogados e demais profissionais interessados, os quais têm sua atuação pautada pelas novas demandas do mercado de trabalho globalizado. Tributação do Setor Industrial é o sétimo volume da série em Direito Tributário, desenvolvido com base no ?método caso?, que possibilita o estudo do direito de forma contextualizada, sem desprezar seu suporte factual, necessariamente interdisciplinar, complexo e rico em elementos históricos, econômicos, sociais e políticos. Partindo da premissa que nenhuma indústria paga somente IPI, mas também outros tributos, a obra discute problemas de incidência, interpretação, conflitos de competência, prescrição, decadência, responsabilidade, dentre outros. Espera-se, assim, estimular a reflexão crítica e o debate jurídico nacional.

Greene's Protective Groups in Organic Synthesis Peter G. M. Wuts, Theodora W. Greene, 2012-12-20 The Fourth Edition of *Greene's Protective Groups in Organic Synthesis* continues to be an indispensable reference for controlling the reactivity of the most common functional groups during a synthetic sequence. This new edition incorporates the significant developments in the field since publication of the third edition in 1998, including... New protective groups such as the fluorous family and the uniquely removable 2-methoxybenzenesulfonyl group for the protection of amines New techniques for the formation and cleavage of existing protective groups, with examples to illustrate each new technique Expanded coverage of the unexpected side reactions that occur with protective groups New chart covering the selective deprotection of silyl ethers 3,100 new references from the professional literature The content is organized around the functional group to be protected, and ranges from the simplest to the most complex and highly specialized protective groups.

Modular Forms, a Computational Approach William A. Stein, 2007-02-13 This marvellous and highly original book fills a significant gap in the extensive literature on classical modular forms. This is not just yet another introductory text to this theory, though it could certainly be used as such in conjunction with more traditional treatments. Its novelty lies in its computational emphasis throughout: Stein not only defines what modular forms are, but shows in illuminating detail how one can compute

everything about them in practice. This is illustrated throughout the book with examples from his own (entirely free) software package SAGE, which really bring the subject to life while not detracting in any way from its theoretical beauty. The author is the leading expert in computations with modular forms, and what he says on this subject is all tried and tested and based on his extensive experience. As well as being an invaluable companion to those learning the theory in a more traditional way, this book will be a great help to those who wish to use modular forms in applications, such as in the explicit solution of Diophantine equations. There is also a useful Appendix by Gunnells on extensions to more general modular forms, which has enough in it to inspire many PhD theses for years to come. While the book's main readership will be graduate students in number theory, it will also be accessible to advanced undergraduates and useful to both specialists and non-specialists in number theory. --John E. Cremona, University of Nottingham William Stein is an associate professor of mathematics at the University of Washington at Seattle. He earned a PhD in mathematics from UC Berkeley and has held positions at Harvard University and UC San Diego. His current research interests lie in modular forms, elliptic curves, and computational mathematics.

Unresolved Border, Land and Maritime Disputes in Southeast Asia Alfred Gerstl, Mária Strašáková, 2016-11-14 In *Unresolved Border, Land and Maritime Disputes in Southeast Asia* the authors shed light on unresolved and lingering territorial disputes in Southeast Asia and their reflection in current inter-state relations in the region, applying a wider regional and comparative perspective.

From Environmental to Comprehensive Security Arthur H. Westing, 2013-07-01 This work presents the evolution of the traditional concept of national security as military security to additionally embrace environmental security and then necessarily also social (societal) security, thence to be termed comprehensive human security. It accomplishes this primarily by presenting 11 of the author's own benchmark papers published between 1983 and 2010 (additionally providing bibliographic citations to a further 36 of the author's related publications during that period). The work stresses the importance of transfrontier (regional) cooperation, and also recognizes global overpopulation as a key impediment to achieving comprehensive human security.

Mother Earth and Uncle Sam Rena I. Steinzor, 2009-05-21 In this compelling study, Rena Steinzor highlights the ways in which the government, over the past twenty years, has failed to protect children from harm caused by toxic chemicals. She believes these failures—under-funding, excessive and misguided use of cost/benefit analysis, distortion of science, and devolution of regulatory authority—have produced a situation in which harm that could be reduced or eliminated instead persists. Steinzor states that, as a society, we are neglecting our children's health to an extent that we would find unthinkable as individual parents, primarily due to the erosion of the government's role in protecting public health and the environment. At this pace, she asserts, our children will inherit a planet under grave threat. We can arrest these developments if a critical mass of Americans become convinced that these problems are urgent and the solutions are near at hand. By focusing on three specific case studies—mercury contamination through the human food chain, perchlorate (rocket fuel) in drinking water, and the effects of ozone (smog) on children

playing outdoors—Steinzor creates an analysis grounded in law, economics, and science to prove her assertions about the existing dysfunctional system. Steinzor then recommends a concise and realistic series of reforms that could reverse these detrimental trends and serve as a blueprint for restoring effective governmental intervention. She argues that these recommendations offer enough material to guide government officials and advocacy groups toward prompt implementation, for the sake of America's—and the world's—future generations.

The LAN Manager's Internet Connectivity Guide Sidnie Feit, 1998 Despite the torrent of Internet guides, none has been aimed at LAN managers until now. This much-needed book is the most comprehensive LAN-specific Internet reference, covering the topic from all angles. Extensive case studies shed light on the workings of Internet/LAN connections in the corporate world.

Law in the War on International Terrorism Ved Nanda, 2021-10-01 Recent legal responses to international terrorism have been unprecedented and, in certain instances, controversial. Challenges for the legal community, especially scholars, are to explore alternatives and recommend measures within a legal framework to solve this multi-faceted problem. Contributors to this important book have accepted and risen to this challenge. They describe and provide a comprehensive and insightful analysis of the pertinent domestic, bilateral, regional and international legal developments in the war against terrorism. Subjects covered include Terrorism, International Law and International Organizations; The U.N. in the War Against International Terrorism; Lawful and Unlawful Wars Against Terrorism; The Threat of Nuclear Terrorism; Detention of Terrorists As Unlawful Combatants and Their Trial by American Military Tribunals; and much more. The authors include distinguished legal scholars and award winning jurists and practitioners, among them Peter Kovacs, Mary Ellen O'Connell, Larry D. Johnson, Robert Hardaway, Christopher Hardaway, James Siegesmund, Spencer J.

Corona, Neal A. Richardson, Claude d'Estree, James A. R. Nafziger, Ronald R. Robinson, and Ved P. Nanda. Published under the Transnational Publishers imprint.

13 Things That Don't Make Sense Michael Brooks, 2010-07-09
Science starts to get interesting when things don't make sense. Even today there are experimental results that the most brilliant scientists can neither explain nor dismiss. In the past, similar anomalies have revolutionised our world: in the sixteenth century, a set of celestial irregularities led Copernicus to realise that the Earth goes around the sun and not the reverse. In *13 Things That Don't Make Sense* Michael Brooks meets thirteen modern-day anomalies that may become tomorrow's breakthroughs. Is ninety six percent of the universe missing? If no study has ever been able to definitively show that the placebo effect works, why has it become a pillar of medical science? Was the 1977 signal from outer space a transmission from an alien civilization? Spanning fields from chemistry to cosmology, psychology to physics, Michael Brooks thrillingly captures the excitement and controversy of the scientific unknown.

a gendered assessment of the brain drain Frédéric Docquier, B. Lindsay Lowell, Abdeslam Marfouk, World Bank. Development Research Group, 2007 Abstract: This paper updates and extends the Docquier-Marfouk data set on inter-national migration by educational attainment. The authors use new sources, homogenize definitions of what a migrant is, and compute gender-disaggregated indicators of the brain drain. Emigration stocks and rates are provided by level of schooling and gender for 195 source countries in 1990 and 2000. The data set can be used to capture the recent trend in women's skilled migration and to analyze its causes and consequences for developing countries. The findings show that women represent an increasing share of the OECD immigration stock and exhibit relatively higher rates of

brain drain than men. The gender gap in skilled migration is strongly correlated with the gender gap in educational attainment at origin. Equating women's and men's access to education would probably reduce gender differences in the brain drain.

Global Brand Management Laurence Minsky, Ilan Geva, 2019-11-03 In today's hyper-connected world, any brand with a website or digital presence is 'global' by its very definition; yet in practice it takes an enormous amount of strategic planning and adaptability to successfully manage an international brand. Global Brand Management explores the increasingly universal scope of brand management. In an era when many brand managers will find themselves working for large multinationals operating across varied territories, categories and consumer groups, developing an understanding of both the opportunities and risks of multinational brands is truly essential. Meticulously researched, Global Brand Management shows readers how to manage an existing global brand, while simultaneously equipping them with the skills to build one from scratch. The text uses fascinating case studies including Oreo, Harley Davidson and Xiaomi to demonstrate the challenges of maintaining a stable brand identity when operating across territories with different languages, cultural values and logistics. With helpful pedagogy throughout and built-in features to enhance classroom learning, Global Brand Management is the perfect springboard for students to appreciate, enjoy and embrace the nuances and complexities of brand management on an international scale.
