Foundations of EU Food Law and Policy Alberto Alemanno, Simone Gabbi, 2016-04-15 This volume presents the viewpoints of academics, food lawyers, industry and consumer representatives as well as those of EU policymakers on the first ten years of activity of one of the most prominent European agencies. Its broader purpose, however, is to discuss the future role played by EFSA within the rapidly-evolving area of EU food law and policy. By revisiting and discussing the milestones in the history of EFSA, the collection provides forward-looking views of food leaders and practitioners on the future scientific and regulatory challenges facing the European Union. In particular, by presenting a critical assessment of the agency's activities within its different areas of work, the book offers readers a set of innovative tools for evaluating policy recommendations and better equips experts and the public to address pressing regulatory issues in this emotive area of law and policy. Despite its celebratory mood, the book's focus is more about the future than the past of EU food law and policy. Each chapter discusses how EFSA's role has evolved and identifies what it should have done differently while presenting an overall assessment of how the agency has discharged its mandate.

The Ambulance Ryan Corbett Bell, 2009 Over several centuries the ambulance has evolved from horse-drawn wagons designed to remove wounded soldiers from the battlefield into high-speed emergency rooms on wheels, staffed by skilled professionals. This thorough history follows the ambulance through every phase, focusing not just on the vehicles but on their role within the developing medical systems they served, as well as the political, social and economic influences that have shaped their advancement. Topics include the critical role of police ambulances in the development of the first emergency medical services, the history of the ambulance intern, breakthroughs in ambulance design and function from the horse-drawn days to the present, notable women in ambulance development, and a fresh look at the first organized paramedic services. More than 275 photographs and other illustrations accompany the text.

Black 9/11 Mark Gaffney, 2016-09-01 The weeks following the attacks of September 11, 2001, were traumatic for nearly every American, but for some, the answers they received from the media and the government to explain the horrific events was not satisfactory. Accusations of cover-ups, internal plots, and sabotage from within the ranks of the U.S. government were—and continue to be—not uncommon. But compelling evidence contrary to the accepted narrative has, for some skeptics, been lacking. This investigation into the events of that day reveals dark secrets about United States-sponsored terrorism. Taking highly complex technical and scientific information, and distilling it for the consumption of the lay person, this inquiry attempts to reveal the truth behind that infamous day.

Mountain Weather Research and Forecasting Fotini K. Chow, Stephan F.J. De Wekker, Bradley J. Snyder, 2012-08-30 This book provides readers with a broad understanding of the fundamental principles driving atmospheric flow over complex terrain and provides historical context for recent developments and future direction for researchers and forecasters. The topics in this book are expanded from those presented at the Mountain Weather Workshop, which took place in Whistler, British Columbia, Canada, August 5-8, 2008. The inspiration for the workshop came from the American Meteorological Society (AMS) Mountain Meteorology Committee and was designed to bridge the gap between the research and forecasting communities by providing a forum for extended discussion and joint education. For academic researchers, this book provides some insight into issues important to the forecasting community. For the forecasting community, this book provides training on fundamentals of atmospheric processes over mountainous regions, which are notoriously difficult to predict. The book also helps to provide a better understanding of current research and forecast challenges, including the latest contributions and advancements to the field. The book begins with an overview of mountain weather and forecasting challenges specific to complex terrain, followed by chapters that focus on diurnal mountain/valley flows that develop under calm conditions and dynamically-driven winds under strong forcing. The focus then shifts to other phenomena specific to mountain regions: Alpine foehn, boundary layer and air quality issues, orographic precipitation processes, and microphysics parameterizations. Having covered the major physical processes, the book shifts to observation and modelling techniques used in mountain regions, including model configuration and parameterizations such as turbulence, and model applications in operational forecasting. The book concludes with a discussion of the current state of research and forecasting in complex terrain, including a vision of how to bridge the gap in the future.

Gender Equality, Citizenship and Human Rights Pauline Stoltz, Marina Svensson, Sun Zhongxin, Qi Wang, 2010-04-05 This comparative volume examines the ways in which current controversies and political, legal, and social struggles for gender equality raise conceptual questions and challenge our thinking on political theories of equality, citizenship and human rights. Bringing together scholars and activists who reflect upon challenges to gender equality, citizenship, and human rights in their respective societies; it combines theoretical insights with empirically grounded studies. The volume contextualises feminist political theory in China and the Nordic countries and subsequently puts it into a global perspective. It tackles a complex set of tensions across a dense and shifting landscape and addresses issues including labour, health, democracy, homosexuality, migration and racism. By cutting across geographical and disciplinary boundaries, this book will be of interest to students and scholars of comparative politics, gender studies, human rights and also those interested in Scandinavian and Asian politics.

Algebra in the Early Grades James J. Kaput, David W. Carraher, Maria L. Blanton, 2017-09-25 This volume is the first to offer a comprehensive, research-based, multi-faceted look at issues in early algebra. In recent years, the National Council for Teachers of Mathematics has recommended that algebra become a strand flowing throughout the K-12 curriculum, and the 2003 RAND Mathematics Study Panel has recommended that algebra be “the initial topical choice for focused and coordinated research and development [in K-12 mathematics].” This book provides a rationale for a stronger and more sustained approach to algebra in school, as well as concrete examples of how algebraic reasoning may be developed in the early grades. It is organized around three themes: The Nature of Early Algebra Students' Capacity for Algebraic Thinking Issues of Implementation: Taking Early Algebra to the Classrooms. The contributors to this landmark volume have been at the forefront of an effort to integrate algebra into the existing early grades mathematics curriculum. They include scholars who have been developing the conceptual foundations for such changes as well as researchers and developers who have led empirical investigations in school settings. Algebra in the Early Grades aims to bridge the worlds of research, practice, design, and theory for educators, researchers, students, policy makers, and curriculum developers in mathematics education.

Chronic Disorders in Children and Adolescents Mark L. Goldstein, Stephen J. Morewitz, 2011-08-26 There has been a significant increase in the prevalence of certain chronic disorders among children and adolescents. For example, health experts warn of an epidemic of diabetes mellitus due to an increase in the sedentary life style and poor nutrition of children. There are many questions still to be addressed in the study of chronic disorders among children and adolescents. What are the risk factors associated with chronic diseases in these populations? What are the major complications that contribute to disability and increased health care utilization and costs? What impact do chronic diseases have on the psychosocial development? What are the most effective diagnostic, treatment, and rehabilitation strategies? How can patient education and self-management activities be improved to help children and adolescents improve compliance with treatment regimens? How can parents and other family members become more involved in assessment and management?

In what ways can peers, schools, religious institutions, and other organizations help children and adolescents cope with their chronic disease? This book addresses these questions by focusing on how eight chronic disorders affect health care utilization, costs, coping, and health outcomes in children and adolescents. Research studies are used to illustrate a wide range of topics from the epidemiology of chronic diseases in children and adolescents, health care utilization and costs, to treatment outcomes, disability, and family processes. Case studies from a clinical psychologist's private practice are used to clarify major psychosocial issues underlying chronic diseases in these populations. Chapter One analyzes the epidemiology of eight chronic conditions in children and adolescents. Data on the prevalence of diseases and associated risk factors are stressed in this chapter. Health care planners can use these analyses to improve primary, secondary, and tertiary prevention through more effective uses of health care resources. Chapter Two examines the latest information on health care utilization and costs for children and adolescents that can point to a more efficient means of reducing the rising health care costs associated with the treatment of chronic diseases. In the remaining chapters, the eight chronic diseases are evaluated in terms of five major issues. First, the latest trends in complications associated with each chronic condition are explored. Second, the impact of each disease on disability and psychosocial development of children and adolescents are analyzed. Third, recent research findings on diagnosis, treatment, and rehabilitation strategies are discussed. Fourth, new trends in patient education and self-management are presented. Fifth, each chapter will assess the role of family, peers, schools, and other organizations in helping children and adolescents cope with their chronic disorders. Dr. Mark L. Goldstein, a clinical psychologist, reviews the literature and uses composite case studies from his practice to illustrate the impact of these trends on how children and adolescents manage chronic disease. The information in this book will be relevant to a wide range of professionals and students in the fields of pediatrics, medicine, nursing, public health, mental health, social work, education, health administration, health policy, and social sciences.

The Jesuits and Italian Universities, 1548-1773 Paul F. Grendler, 2017 Between 1548 and 1773 the Jesuits made sixteen attempts, from Turin in the north to Messina in Sicily, to found new universities or to become professors in existing universities. Paul Grendler tells a new story based on years of research. Anyone interested in the volatile mix of universities, religion, and politics will find this book fascinating and instructive.

Temperance Lloyd: Hanged for Witchcraft 1682 B. Chris Nash, 2012-11 Temperance Lloyd, Susannah Edwards and Mary Trembles of Bideford were the last three women hanged in England as witches, in 1682. Why? Educated, thinking people sent them to the gallows. The man we know for the King James Bible legalized the hunting and killing of hundreds of his own subjects. Physicians, trained only in Discourse, accused the natural healers of witchcraft. The women were declared guilty because, according to the Church, to deny witchcraft was to deny God; convicted on hearsay evidence; and executed to appease an angry mob. But who were they? This novel invites you between the lines of history to witness their lives and deaths. This historical novel questions accepted notions of Time. Perhaps Temperance is still with today's herbalists. What if those old men in the dark corner of every bar have been there forever? Are there still leaders living in the paranoid shadows of a personal trauma? Come, meet Temperance, Susannah and Mary. Then please remember them, In the Hope of an End to Persecution and Intolerance, by signing a Petition to the U.K., Government to Pardon of Temperance Lloyd, Susannah Edwards and Mary Trembles for the crimes they could not have committed.

Forests and Globalization William Nikolakis, John Innes, 2014-09-19 The overarching contribution of this book is a review and assessment of the current and future impacts of globalization on the world's forests. The work has been developed by the Resources for the Future Task Force for the International Union of Forest Research Organizations (IUFRO). Four key themes are addressed: the effect of globalization on forests (including future trade flows); plantations as the primary source of forest products and its consequences, including plant breeding and forest health; the effect of new products such as bio-products and markets on forests; and the emergence of forest ecosystem services and their impact on the landscape and human communities. These four themes are examined in detail to map out the impacts of these trends for forests throughout the world and at multiple scales, and how forest research needs to be adapted to address these trends. Overall, the volume provides a major synthesis of current thinking and knowledge on the topic for advanced students, as well as policy-makers and professionals in the forest sector.
