Terrorism in Cyberspace Gabriel

Weimann, 2015-04-21 The war on terrorism has not been won, Gabriel Weimann argues in *Terrorism in Cyberspace*, the successor to his seminal *Terror on the Internet*. Even though al-Qaeda's leadership has been largely destroyed and its organization disrupted, terrorist attacks take 12,000 lives annually worldwide, and jihadist terrorist ideology continues to spread. How? Largely by going online and adopting a new method of organization. Terrorist structures, traditionally consisting of loose-net cells, divisions, and subgroups, are ideally suited for flourishing on the Internet through websites, e-mail, chat rooms, e-groups, forums, virtual message boards, YouTube, Google Earth, and other outlets. Terrorist websites, including social media platforms, now number close to 10,000. This book addresses three major questions: why and how terrorism went online; what recent trends can be discerned—such as engaging children and women, promoting lone wolf attacks, and using social media; and what future threats can be expected, along with how they can be reduced or countered. To answer these questions, *Terrorism in Cyberspace* analyzes content from more than 9,800 terrorist websites, and Weimann, who has been studying terrorism online since 1998, selects the most important kinds of web activity, describes their background and history, and surveys their content in terms of kind and intensity, the groups and prominent individuals involved, and effects. He highlights cyberterrorism against financial, governmental,

and engineering infrastructure; efforts to monitor, manipulate, and disrupt terrorists' online efforts; and threats to civil liberties posed by ill-directed efforts to suppress terrorists' online activities as future, worrisome trends.

Soils for Landscape Development Elke Haege, Simon Leake, 2014-06-18 *Soils for Landscape Development* provides a clear, practical and systematic template for specifying landscape soils based on scientific criteria. The soil specifications provide essential information and a universally applicable method for landscape architects and designers, specification writers, landscape contractors and soil supply companies to ensure quality and fit-for-purpose soils. A strong emphasis is placed on reducing environmental impacts by reuse of on-site soil, promoting appropriate minimal soil intervention, and using recycled products.

Identity Politics in the Age of Genocide David B. MacDonald, 2007-09-28 In an era of globalization and identity politics, this book explores how Holocaust imagery and vocabulary have been appropriated and applied to other genocides. The author examines how the Holocaust has impacted on other ethnic and social groups, asking whether the Holocaust as a symbol is a useful or destructive means of reading non-Jewish history. This volume: explains the rise of the Holocaust as a gradual

process, charting how its importance as a symbol has evolved, providing a theoretical framework to understand how and why non-Jewish groups choose to invoke 'holocausts' to apply to other events explores the Holocaust in relation to colonialism and indigenous genocide, with case studies on America, Australia and New Zealand analyzes the Holocaust in relation to war and genocide, with case studies on the Armenian genocide, the Rape of Nanking, Serbia and the Rwandan genocide examines how the Holocaust has been used to promote animal rights. Demonstrating both the opportunities and pitfalls the Holocaust provides to non-Jewish groups who seek to represent their collective histories, this book fills a much needed gap on the use of the Holocaust in contemporary identity politics and will be of interest to students and researchers of politics, the Holocaust and genocide.

International Regulatory Co-operation: Case Studies, Vol. 2 Canada-US Co-operation, EU Energy Regulation, Risk Assessment and Banking Supervision OECD,2013-05-13 This volume complements the stocktaking report on International Regulatory Co-operation: Rules for a Global World by providing evidence on regulatory co-operation in the Canada-U.S. Regulatory Cooperation Council, as part of EU energy regulation, under the Global Risk Assessment Dialogue, etc.

Respectable Banking Anthony C. Hotson,2017-06-15 The financial collapse of 2007–8 has questioned our assumptions about the underlying basis for

stability in the financial system, and Anthony Hotson here offers an important reassessment of the development of London's money and credit markets since the great currency crisis of 1695. He shows how this period has seen a series of intermittent financial crises interspersed with successive attempts to find ways and means of stabilizing the system. He emphasises, in particular, the importance of various principles of sound banking practice, developed in the late nineteenth century, that helped to stabilize London's money and credit markets. He shows how these principles informed a range of market practices that limited aggressive forms of funding, and discouraged speculative lending. A tendency to downplay the importance of these regulatory practices encouraged a degree of complacency about their removal, with consequences right through to the present day.

Tascosa Frederick W. Nolan, 2007 The ranching boom of the 1880s made the Texas Panhandle town of Tascosa 'the cowboy capital of the world.' Through it passed many people, good and bad, who made history in the West. Yet when the large ranches broke up, Tascosa disappeared as quickly as it had risen--Provided by publisher.

Powerplay Victor D. Cha, 2018-04-24 A close look at the evolution of American political alliances in Asia and their future While the American alliance system in Asia has been fundamental to the region's security and prosperity for seven decades, today it encounters challenges from the growth of China-based regional organizations. How

was the American alliance system originally established in Asia, and is it currently under threat? How are competing security designs being influenced by the United States and China? In *Powerplay*, Victor Cha draws from theories about alliances, unipolarity, and regime complexity to examine the evolution of the U.S. alliance system and the reasons for its continued importance in Asia and the world. Cha delves into the fears, motivations, and aspirations of the Truman and Eisenhower presidencies as they contemplated alliances with the Republic of China, Republic of Korea, and Japan at the outset of the Cold War. Their choice of a bilateral hub and spokes security design for Asia was entirely different from the system created in Europe, but it was essential for its time. Cha argues that the alliance system's innovations in the twenty-first century contribute to its resiliency in the face of China's increasing prominence, and that the task for the world is not to choose between American and Chinese institutions, but to maximize stability and economic progress amid Asia's increasingly complex political landscape. Exploring U.S. bilateral relations in Asia after World War II, *Powerplay* takes an original look at how global alliances are achieved and maintained.

Government Finance Statistics Manual Sage De Clerck,Tobias Wickens,2015-03-10 The Government Finance Statistics Manual 2014 (GFSM 2014)—describes a specialized macroeconomic statistical framework—the government finance statistics (GFS) framework—designed to support

fiscal analysis. The manual provides the economic and statistical reporting principles to be used in compiling the statistics; describes guidelines for presenting fiscal statistics within an analytic framework that includes appropriate balancing items; and is harmonized with other macroeconomic statistical guidelines.

Academic E-Books Suzanne M. Ward,Robert S. Freeman,Judith M. Nixon,2015-11-15 Academic E-Books: Publishers, Librarians, and Users provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote

scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Transportation Decision Making Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with

basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decisionmaking. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

The United States, India and the Global Nuclear Order Tanvi Pate, 2018-06-13 In the Post-Cold War era, US nuclear foreign policies towards India witnessed a major turnaround as a demand for 'cap, reduce, eliminate' under the Clinton administration was replaced by the implementation of the historic 'civil nuclear deal' in 2008 by Bush, a policy which continued under Obama's administration. This book addresses the change in US nuclear foreign policy by focusing on three core categories of identity, inequality, and great power narratives. Building upon the theoretical paradigm of critical constructivism, the concept

of the 'state' is problematised by focusing on identity-related questions arguing that the 'state' becomes a constructed entity standing as valid only within relations of identity and difference. Focusing on postcolonial principles, Pate argues that imperialism as an organising principle of identity/difference enables us to understand how difference was maintained in unequal terms through US nuclear foreign policy. This manifested in five great power narratives constructed around peace and justice; India-Pakistan deterrence; democracy; economic progress; and scientific development. Identities of 'race', 'political economy', and 'gender', in terms of 'radical otherness' and 'otherness' were recurrently utilised through these narratives to maintain a difference enabling the respective administrations to maintain 'US' identity as a progressive and developed western nation, intrinsically justifying the US role as an arbiter of the global nuclear order. A useful work for scholars researching identity construction and US foreign and security policies, US-India bilateral nuclear relations, South Asian nuclear politics, critical security, and postcolonial studies.

India at the Global High Table Teresita C. Schaffer,Howard B. Schaffer,2016-04-05 An integrated picture of India's global vision, its foreign policy, and the negotiating practices that link the two. In recent decades, India has grown as a global power, and has been able to pursue its own goals in its own way. Negotiating for India's Global Role gives an insightful and integrated

analysis of India's ability to manage its evolving role. Former ambassadors Teresita and Howard Schaffer shine a light on the country's strategic vision, foreign policy, and the negotiating behavior that links the two. The four concepts woven throughout the book offer an exploration of India today: its exceptionalism; nonalignment and the drive for "strategic autonomy;" determination to maintain regional primacy; and, more recently, its surging economy. With a specific focus on India's stellar negotiating practice, *Negotiating for India's Global Role* is a unique, comprehensive understanding of India as an emerging international power player, and the choices it will face between its classic view of strategic autonomy and the desirability of finding partners in the fast-evolving world.
