Choosing China's Leaders Chien-wen Kou, Xiaowei Zang, 2013-10-08 Political elites are a key topic in contemporary China studies, and have been investigated in relation to factional politics, generation politics, technocracy, and crucially, institutionalization. The institutionalization of elite replacement began in China in the 1980s and quickly accelerated after the early 1990s, as mechanisms emerged to regulate political elites' entry and exit, including age limits, term limits, and step-by-step promotion. By examining the various processes of elite selection, this book explores the role played by institutionalization in elite recruitment, promotion and turnover in China. While existing studies have developed our understanding of Chinese elite politics, two key puzzles regarding institutionalisation remain. Although institutionalisation is recognised as an important trend in Chinese politics, there is as yet no theoretical framework to explain the forces that have brought about and sustained this. Further, it is unclear how the process of institutionalisation has impacted on factional politics, and how factions would continue to operate within the parameters of formal politics. Drawing on a wide range of studies, this book looks at Politburo members, senior People's Liberation Army officers, provincial leaders, heads of major central state-owned enterprises, and Youth League affiliates, to provide a comprehensive understanding of elite recruitment and mobility in contemporary China. This book will be of great interests to students and scholars of Chinese politics and government, Chinese studies and Asian politics more broadly.

The Glass Is Full Gigi G., 2012-10-17 This book presents an exciting and eye-opening journey like no other. Discover the revolutionary concept of what makes people happy and join Gigi G. as she challenges the age-old saying "the glass is half-full" by saying "The Glass IS Full", no matter which way you view the glass. This is the simple but extraordinary philosophy behind what Gigi says is the key difference between a truly happy person and everyone else. Gigi says that being happy within ourselves comes down to changing our view of the world to a happy, positive one, and seeing and appreciating the positive attributes in every experience and in everyone around us. Take the journey and discover how remarkably easy it is to change your perspective and be really happy. You can be happy with yourself, happy with others, and happy with your life!

Seeking Equality John Harles, 2017-10-25 *Seeking Equality* compares economic inequality in the United States and Canada. The North American neighbors have much in common—socially, politically, and economically—yet Canadians enjoy significantly higher levels of equality and material well-being. Harles explores the values and policy decisions that have influenced these different economic outcomes. Drawing on the Canadian experience, he explains why a yawning gap between the very rich and the rest should be cause for civic anxiety in the United States...and what can be done about it.

Planejamento orientado ao setor público Morgana G. Martins Krieger, 2020-09-29 A Série Universitária foi desenvolvida pelo Senac São Paulo com o intuito de preparar profissionais para o mercado de trabalho. Os títulos abrangem diversas áreas, abordando desde conhecimentos teóricos e práticos adequados às exigências profissionais até a formação ética e sólida. Planejamento orientado ao setor público é uma obra atual e didática sobre as possibilidades, os desafios e as teorias que guiam a atuação de quem lida com planejamento público no Brasil. Este livro abarca dois temas principais: o primeiro engloba as diferentes correntes e teorias de planejamento estratégico, passando pelas perspectivas tradicionais e pelo planejamento orientado a resultados, incluindo formas participativas e colaborativas. Para todas essas correntes são apresentados casos práticos de aplicação, em diversas áreas e esferas do setor público brasileiro. O segundo tema aborda o planejamento público no Brasil e a sua construção histórica, bem como os conceitos e

as práticas fundamentais para profissionais da área. Conteúdos como Plano Plurianual, Lei de Diretrizes Orçamentárias, Lei Orçamentária Anual, orçamento participativo, avaliação de planejamento e participação são apresentados de forma teórica e prática, auxiliando a compreensão do planejamento como função essencial ao poder público.

Firefall PETER. WATTS,2017-07-13 February 13, 2082, First Contact. Sixty-two thousand objects of unknown origin plunge into Earth's atmosphere - a perfect grid of falling stars screaming across the radio spectrum as they burn. Not even ashes reach the ground. Three hundred and sixty degrees of global surveillance: something just took a snapshot. And then... nothing. But from deep space, whispers. Something out there talks - but not to us. Two ships, Theseus and the Crown of Thorns, are launched to discover the origin of Earth's visitation, one bound for the outer dark of the Kuiper Belt, the other for the heart of the Solar System. Their crews can barely be called human, what they will face certainly can't. 'A tour de force, redefining the First Contact story for good' Charles Stross. 'If you only read one science fiction novel this year, make it this one! ... it puts the whole of the rest of the genre in the shade ... It deserves to walk away with the Clarke, the Hugo, the Nebula, the BSFA, and pretty much any other genre award for which it's eligible. It's off the scale ... F**king awesome!' Richard Morgan. 'State-of-the-art science fiction: smart, dark and it grabs you by the throat from page one' Neal Ascher.

Heir of Sea and Fire Patricia A. McKillip,2015-08-13 By the vow of her father and her own desire, Raederle was pledged to Morgon, Riddle-Master of Hed. But a year had passed since Morgon disappeared on his search for the High One at Erlenstar Mountain, and rumors claimed he was dead. Raederle set out to learn the truth for herself, though her small gift of magic seemed too slight for the perils she must face. The quest led through strange lands and dangerous adventures. Only her growing powers enabled her at last to reach Erlenstar Mountain. And there she discovered what she could not bear to accept. Accompanied by Deth, the High One's Harper, she fled. And behind them came a pursuer whose name was Morgon, bent on executing a grim destiny upon Raederle and Deth. Her only hope lay in summoning the Hosts of the Dead, led by the King whose skull she bore...

ITIL Service Strategy Great Britain. Cabinet Office,Great Britain. Stationery Office,2011 This volume provides updated guidance on how to design, develop and implement service management both as an organisational capability and a strategic asset. It is a guide to a strategic review of ITIL-based service management capabilities, with the aim of improving their alignment with overall business needs. It is written primarily for senior managers who provide leadership and direction in the form of objectives, plans and policies. It is also benefits managers at other levels, by explaining the logic of senior management decisions.

Harpist in the Wind Patricia A. McKillip,2015-08-13 Though Morgon the Riddle-Master was reunited with his beloved Raederle, his purpose in life and the reason for the stars on his forehead remained a mystery. All around him, the realm shook with war as mysterious shape-changers battled against mankind. Without the missing High One, Morgon must assume responsibility for all his world.

Measuring the Subjective Well-Being of Nations Alan B. Krueger,2009-11-15 Surely everyone wants to know the source of happiness, and indeed, economists and social scientists are increasingly interested in the study and effects of subjective well-being. Putting forward a rigorous method and new data for measuring, comparing, and analyzing the relationship between well-being and the way people spend their time—across countries, demographic groups, and history—this book will help set the agenda of research and policy for decades to come. It does so by introducing a system of National Time Accounting (NTA), which relies on individuals' own

evaluations of their emotional experiences during various uses of time, a distinct departure from subjective measures such as life satisfaction and objective measures such as the Gross Domestic Product. A distinguished group of contributors here summarize the NTA method, provide illustrative findings about well-being based on NTA, and subject the approach to a rigorous conceptual and methodological critique that advances the field. As subjective well-being is topical in economics, psychology, and other social sciences, this book should have cross-disciplinary appeal.

Accelerated Plant Breeding, Volume 3 Satbir Singh Gosal, Shabir Hussain Wani, 2020-09-09 Plant improvement has shifted its focus from yield, quality and disease resistance to factors that will enhance commercial export, such as early maturity, shelf life and better processing quality. Conventional plant breeding methods aiming at the improvement of a self-pollinating crop, such as wheat, usually take 10-12 years to develop and release of the new variety. During the past 10 years, significant advances have been made and accelerated methods have been developed for precision breeding and early release of crop varieties. This work summarizes concepts dealing with germplasm enhancement and development of improved varieties based on innovative methodologies that include doubled haploidy, marker assisted selection, marker assisted background selection, genetic mapping, genomic selection, high-throughput genotyping, high-throughput phenotyping, mutation breeding, reverse breeding, transgenic breeding, shuttle breeding, speed breeding, low cost high-throughput field phenotyping, etc. It is an important reference with special focus on accelerated development of improved crop varieties.

State Data Book United States. Rehabilitation Services Administration. Division of Monitoring and Program Analysis. Statistical Analysis and Systems Branch,

Enhancing Food Safety National Research Council, Institute of Medicine, Board on Agriculture and Natural Resources, Food and Nutrition Board, Committee on the Review of the Food and Drug Administration's Role in Ensuring Safe Food, 2010-11-04 Recent outbreaks of illnesses traced to contaminated sprouts and lettuce illustrate the holes that exist in the system for monitoring problems and preventing foodborne diseases. Although it is not solely responsible for ensuring the safety of the nation's food supply, the U.S. Food and Drug Administration (FDA) oversees monitoring and intervention for 80 percent of the food supply. The U.S. Food and Drug Administration's abilities to discover potential threats to food safety and prevent outbreaks of foodborne illness are hampered by impediments to efficient use of its limited resources and a piecemeal approach to gathering and using information on risks. *Enhancing Food Safety: The Role of the Food and Drug Administration*, a new book from the Institute of Medicine and the National Research Council, responds to a congressional request for recommendations on how to close gaps in FDA's food safety systems. *Enhancing Food Safety* begins with a brief review of the Food Protection Plan (FPP), FDA's food safety philosophy developed in 2007. The lack of sufficient detail and specific strategies in the FPP renders it ineffectual. The book stresses the need for FPP to evolve and be supported by the type of strategic planning described in these pages. It also explores the development and implementation of a stronger, more effective food safety system built on a risk-based approach to food safety management. Conclusions and recommendations include adopting a risk-based decision-making approach to food safety; creating a data surveillance and research infrastructure; integrating

federal, state, and local government food safety programs; enhancing efficiency of inspections; and more. Although food safety is the responsibility of everyone, from producers to consumers, the FDA and other regulatory agencies have an essential role. In many instances, the FDA must carry out this responsibility against a backdrop of multiple stakeholder interests, inadequate resources, and competing priorities. Of interest to the food production industry, consumer advocacy groups, health care professionals, and others, Enhancing Food Safety provides the FDA and Congress with a course of action that will enable the agency to become more efficient and effective in carrying out its food safety mission in a rapidly changing world.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Under-Rewarded Efforts Santiago Levy Algazi, 2018-07-11 Why has an economy that has done so many things right failed to grow fast? Under-Rewarded Efforts traces Mexico's disappointing growth to flawed microeconomic policies that have suppressed productivity growth and nullified the expected benefits of the country's reform efforts. Fast growth will not occur doing more of the same or focusing on issues that may be key bottlenecks to productivity growth elsewhere, but not in Mexico. It will only result from inclusive institutions that effectively protect workers against risks, redistribute towards those in need, and simultaneously align entrepreneurs' and workers' incentives to raise productivity.
