

Whats Program You Using 1606.htm

Daniel F McAuley

Returning Wars' Wounded, Injured, and Ill Nathan D. Ainspan Ph.D., Walter E.

Penk,2008-09-30 Thousands of American service members are returning from their tours of duty with physical and/or psychological disabilities. Many—if not most—of these service members will need at least some assistance to adapt to their disabilities and learn how to reintegrate back into civilian life. Also impacted will be the spouse, friends, employers, family members, counselors, and community members of each veteran with a disability. The veterans may not be aware of the ways in which their disabilities are impacting them, nor knowledgeable about the resources available to help them cope. In addition, many such individuals feel isolated and reluctant to acknowledge their difficulties or ask for assistance. The volume compiles and summarizes the information disabled veterans and those with whom they interact will be interested in knowing and using. It describes how disabilities can impact an individual physically, psychologically, and spiritually. It also provides a context of these disabilities to reassure the readers that they are not alone in the thoughts, feelings, and pain, and that others have experienced the same problems and found solutions. The work provides guidance on different forms of treatment that may help the veteran and includes a list of contact information for local VA centers, peer-to-peer counseling services, and other programs, services, and individuals available (frequently for free) for veterans and their families. Brief biographies of disabled veterans and case studies of the ways they reintegrated back into civilian society provide support and perspective. In addition to aiding veterans, the book will serve as a useful reference source for librarians and other information providers.

Library Service to Spanish Speaking Patrons Sharon Moller,2001-01-15 If your library serves a Latino population, you'll want this book. It will help you better serve the needs of Spanish-speaking patrons of all ages. The author gives background information on various Hispanic groups, explaining some of the cultural differences that can lead to misunderstanding. She then offers a variety of program and collection building ideas. A list of distributors of Spanish-language materials-books, periodicals, AV materials, computer and other educational resources-is provided, as well as Web site addresses of Spanish-language sites. Vocabulary lists for library and computer-related words and phrases and guidelines for correctly writing Spanish words are also included.

Each lesson has: materials lists activity descriptions questioning techniques activity centre and extension ideas assessment suggestions activity sheets and visuals

Sustainable Automotive Energy System in China CAERC, Tsinghua University, 2014-07-08

Sustainable Automotive Energy System in China aims at identifying and addressing the key issues of automotive energy in China in a systematic way, covering demography, economics, technology and policy, based on systematic and in-depth, multidisciplinary and comprehensive studies. Five scenarios of China's automotive energy development are created to analyze the possible contributions in the fields of automotive energy, vehicle fuel economy improvement, electric vehicles, fuel cell vehicles and the 2nd generation biofuel development. Thanks to this book, readers can gain a better understanding of the nature of China's automotive energy development and be informed about: 1) the current status of automotive energy consumption, vehicle technology development, automotive energy technology development and policy; 2) the future of automotive energy development, fuel consumption, propulsion technology penetration and automotive energy technology development, and 3) the pathways of sustainable automotive energy transformation in China, in particular, the technological and the policy-related options. This book is intended for researchers, engineers and graduates students in the low-carbon transportation and environmental protection field. China Automotive Energy Research Center (CAERC), Tsinghua University, established in 2008, is a university-wide interdisciplinary automotive energy research institution affiliated to Laboratory of Low Carbon Energy (LCE), Tsinghua University. More than 30 researchers are working at CAERC, including six full professors. CAERC's mission is to create and disseminate sustainable automotive energy knowledge, research and development of integrated automotive energy system assessment methodologies and models, and provide technological and policy options for sustainable automotive energy system transformation in China and the world.
