The Water Sensitive City Gary Grant,2016-02-22 This book advocates a more thoughtful approach to urban water management. The approach involves reducing water consumption, harvesting rainwater, recycling rainwater and adopting Sustainable Drainage Systems (SuDS) where surface water is not sent straight to drains but is intercepted by features like green roofs, rain gardens, swales and ponds.Cities in particular need to change the existing linear model of water consumption and use to a more circular one in order to survive. The Water Sensitive City brings together the various specialised technical discussions that have been continuing for some time into a volume that is more accessible to designers (engineers and architects), urban planners and managers, and policymakers.

**The Sociogony** Mark P. Worrell,2018-11-26 The Sociogony attempts to forge a new strain of critical social theory by repositioning Durkheim’s relationship to Hegel and Marx. A fresh look at social facts, authority, and processes of genesis, rule, and decay provide a stable social ontology for a world turned upside down.

*A Soprano on Her Head* Eloise Ristad,1982 Eloise Ristad deals here with complex problems which torment and cripple so many of our most creative and talented people, and she does so with compassion, wisdom, and wit. The problem of stage fright, for instance, is a suffering of epidemic proportions in our society, and involves modalities of thought and projections that rob spontaneity and enthusiasm in artistic performance. Those interested in creative education have long felt that an entirely new, holistic and nurturing process of allowing individuals to discover and express themselves is needed if our educational system is to avoid the neuroses and creative blocks of the past generation. This book illuminates through its conversational style the destructive inhibitions, fears, and guilt experienced by all of us as we fail to break through to creativity. This story is told to me day after day in conservatories and college campuses around the world. Indeed I felt at times that she was telling of my own most petty and debilitating fears. But what is important, *A Soprano on Her Head* supplies answers and methods for overcoming these universal psychological blocks—methods that have not only been proven in her own studio, but which trace back through history to the oldest and wisest systems of understanding the integration of mind and body. The work bears scrutiny both scientifically and holistically. - Foreword.

**Our Common Ground** John D. Leshy,2022-02-08 The little-known story of how the U.S. government came to hold nearly one-third of the nation’s land and manage it primarily for recreation, education and conservation. “A much-needed chronicle of how the American people decided—wisely and democratically—that nearly a third of the nation’s land surface should remain in our collective ownership and be managed for our common good.”—Dayton Duncan, author of *The National Parks: America’s Best Idea* America’s public lands include more than 600 million acres of forests, plains, mountains, wetlands, deserts, and shorelines. In this book, John Leshy, a leading expert in public lands policy, discusses the key political decisions that led to this, beginning at the very founding of the nation. He traces the emergence of a bipartisan political consensus in favor of the national government holding these vast land areas primarily for recreation, education, and conservation of biodiversity and cultural resources. That consensus remains strong and continues to shape American identity. Such a success story of the political system is a bright spot in an era of cynicism about government. This book is essential reading for anyone who cares about public lands, and it is particularly timely as the world grapples with the challenges of climate change and biodiversity loss.

Disintegration: Bad Love, Collective Suicide, and the Idols of Imperial Twilight Mark P. Worrell,2020-02-17 Together again for the first time, Marx and Durkheim join forces in the pages of *Disintegration: Bad Love, Collective Suicide, and the Idols of Imperial Twilight* for a dialectical exploration of the moral economy of neoliberalism, animated, as it is not only by the capitalist chase for surplus value, but also by an immortal vortex of sacred powers. Classical sociology and psychoanalysis are reconstituted within Hegelian social ontology and dialectical method that differentiates between the ephemeral and free and the eternal and fixed aspects of modern life.

*Diving Into the Bitstream* Barry M. Dumas, 2012-11-12 Nationwide, and indeed worldwide, there has been a growing awareness of the importance of access to information. Accordingly, information technology (IT), broadly defined and its role beyond the internal workings of businesses has leapt into the social consciousness. Diving into the Bitstream distinguishes itself by weaving together the concepts and conditions of IT. What distinguishes these trends is their focus on the impacts of IT on societies, and the responsibilities of IT's creators and users. The author pulls together important, often complex issues in the relationships among information, information technologies, and societal constructs. The text explores a synopsis of these issues that are foundations for further consideration.

*Registries for Evaluating Patient Outcomes* Agency for Healthcare Research and Quality/AHRQ, 2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

*The World and a Very Small Place in Africa* Donald R. Wright, 2018-06-27 *The World and a Very Small Place in Africa* is a fascinating look at how contacts with the wider world have affected how people have lived in Niumi, a small and little-known region at the mouth of West Africa's Gambia River, for over a thousand years. Drawing on archives, oral traditions and published works, Donald R. Wright connects world history with real people on a local level through an exploration of how global events have affected life in Niumi. Thoroughly revised and updated throughout, this new edition rests on recent thinking in globalization theory, reflects the latest historiography and has been extended to the present day through discussion of the final years of Gambian President Yahya Jammeh's regime, the role of global forces in the events of the 2016 presidential elections and the changes that resulted from these elections. The book is supported throughout by photographs, maps and Perspectives boxes that present detailed information on such topics as Alex Haley's *Roots* (part set in Niumi), why Gambians take the risky back way to reach Europe, or Wiri-Wiri, the Senegalese soap that has Gambians' attention. Written in a clear and personal style and taking a critical yet sensitive approach, it remains an essential resource for students and scholars of African history, particularly those interested in the impact of globalization on the lives of real people.

Introduction to Early Childhood Education and Care Carole Massing, Mary Lynne Matheson, 2021-07-26 Ensure children of all backgrounds can thrive with an intercultural approach to early childhood education In a multicultural society such as Canada's, early childhood educators work with children and families from a diverse mix of ethnicities, religions, languages, abilities, and lifestyles. Diversity enriches the experience of children and educators alike in these environments, but it can also present challenges in supporting each child's growth and learning. In *Introduction to Early Childhood Learning and Care*, early learning specialists Carole Massing and Mary Lynne Matheson present an intercultural perspective as a foundation of equitable outcomes in early childhood education, but just what does that look like? An intercultural approach involves the respectful exchange of ideas between people from diverse backgrounds, leading to mutual trust and deeper relationships. Guided by a diverse team of reviewers, this book examines the concepts, approaches, and strategies that every early childhood educator needs to know to provide sensitive, culturally responsive care for children and their families. Topics include: - The theoretical bases for an intercultural approach to early childhood education and care - The factors that impact a child's physical, cognitive, social, and emotional development - How to create environments that enhance children's wellbeing and affirm their identity - How to support children's creativity, literacy, and inquiry skills through an intercultural lens - The skills, responsibilities, and challenges of working as an early childhood educator

**Closing the Cancer Divide** Felicia Marie Knaul, 2012-12-17 Cancer has become a leading cause of death and disability and a serious yet unforeseen challenge to health systems in low- and middle-income countries. A protracted and polarized cancer transition is under way and fuels a concentration of preventable risk, illness, suffering, impoverishment from ill health, and death among poor populations. Closing this cancer divide is an equity imperative. The world faces a huge, unperceived cost of failure to take action that requires an immediate and large-scale global response. *Closing the Cancer Divide* presents strategies for innovation in delivery, pricing, procurement, finance, knowledge-building, and leadership that can be scaled up by applying a diagonal approach to health system strengthening. The chapters provide evidence-based recommendations for developing programs, local and global policy-making, and prioritizing research. The cases and frameworks provide a guide for developing responses to the challenge of cancer and other chronic illnesses. The book summarizes results of the Global Task Force on Expanding Access to Cancer Care and Control in Developing Countries, a collaboration among leaders from the global health and cancer care communities worldwide, originally convened by Harvard University. It includes contributions from civil society, global and national policy-makers, patients and practitioners, and academics representing an array of fields.
