Human Rights and World Trade Ana Gonzalez-Pelaez,2004-08-02 A new and incisive analysis of the political viability of human rights, with an in-depth investigation of its largest violation: world hunger. Gonzalez-Pelaez develops John Vincent's theory of basic human rights within the context of the international political economy and demonstrates how the right to food has become an international norm enshrined within international law. She then assesses the international normative and practical dimensions of hunger in connection with international trade and poverty. Using the society of states as the framework of analysis, she explores the potential that the current system has to correct its own anomalies, and examines the measures that can move the hunger agenda forward in order to break through its current stagnation.

Heal Arlene Weintraub,2015-10-01 How man's best friend could help cure man's greatest scourge: "An Emperor of All Maladies for dog lovers" (Dr. Sarah Boston, author of *Lucky Dog: How Being a Veterinarian Saved My Life*). Drawn from extensive research, on-the-ground reporting, and personal experience, this book explores the fascinating role dogs (and cats) are playing in the search of cures for cancer. Learn how veterinarians and oncologists are working together to discover new treatments—cutting-edge therapies designed to help both animals and people suffering from cancer. Heal introduces readers to the field of comparative oncology by describing several research projects aimed at finding new therapies for cancers that are similar in dogs and people, including lymphoma, osteosarcoma, breast cancer, melanoma, and gastric cancer. The author, who lost her sister to gastric cancer, also writes about the emerging science behind the remarkable ability of dogs to sniff out early stage cancer and the efforts underway to translate that talent into diagnostic devices for early detection of the disease. In the course of bringing these dogs and their human companions to life, Arlene Weintraub takes her own personal journey from grief to healing, as she shows how man's best friend might be the key to unlocking the mysteries of cancer. "Readers will share Weintraub's growing appreciation for the canine and feline subjects (and their owners) who are helping to advance cancer research." —Publishers Weekly

Works in Progress Jenny Leigh Smith,2014-10-28 This book is the first to investigate the gap between the plans and the reality of the Soviet Union's mid-twentieth-century project to industrialize and modernize its agricultural system. Historians agree that the project failed badly: agriculture was inefficient, unpredictable, and environmentally devastating for the entire Soviet period. Yet assigning the blame exclusively to Soviet planners would be off the mark. The real story is much more complicated and interesting, Jenny Leigh Smith reveals in this deeply researched book. Using case studies from five Soviet regions, she acknowledges hubris and shortsightedness where it occurred but also gives fair consideration to the difficulties encountered and the successes—however modest—that were achieved.

Mobilizing Piety Rachel Rinaldo,2013-10-03 Investigates how different approaches to religious interpretation influence Indonesian women's engagement with global Islam and feminism. It also explores the consequences of a more public Islam for women's participation in the public sphere. The book is based on extensive ethnographic fieldwork between 2002 and 2010 with four different groups of women activists in Jakarta, the Indonesian capital. The groups include a secular feminist NGO (Solidaritas Perempuan), a Muslim women's rights NGO (Rahima), the women's group of one of the country's largest Muslim organizations (Fatayat N.U.), and women in a conservative Muslim political party (the Prosperous Justice Party). The women in these have all been deeply influenced by the ongoing Islamic revival. In addition, they are part of the urban middle class. The women of Rahima and Fatayat N.U. are influenced by global feminism and Islamic discourses. They use Islam to express feminist and liberal ideals of equality and rights, and they strive to integrate these frameworks in their own lives. In contrast, women in the Prosperous Justice Party (PKS) reject feminism as Western and secular and are more influenced by global Islamic discourses. Although some scholars argue that pious Islam and liberal ideals are incompatible, these activists embrace modernity and sometimes speak in terms of individual agency, empowerment, and rights. The women of Solidaritas Perempuan

maintain a balance between their secular activism and personal religiosity. The overall conclusion of Mobilizing Piety is that the Islamic revival has not stymied but has in fact helped to empower many Indonesian women, especially by allowing them to participate in national debates about moral and religious issues--

With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems
