Food, Power, and Resistance in the Andes Alison Krögel, 2010-12-16 Food, Power, and Resistance explores the ways in which artistic representations of food and cooks often convey subversive meanings that resist attempts to locate indigenous Andeans and Quechua women in particular at the margins of power. This book offers a dynamic, interdisciplinary study of how food's symbolic and pragmatic meanings influence access to power and the possibility of resistance in the colonial and contemporary Andes.

Ploughing Up the Farm Jerry Buckland, 2004-07 Around the world, farmers' livelihoods and food security have eroded in the past 20 years. Increasing reliance on markets and modern technology has not generated universal farm affluence. Neoliberalism has brought about rural depopulation in the northern hemisphere, rising rural poverty in the southern, and environmental problems all around the farming world. Farmgate prices have stagnated since the 1980s, while market-driven growth has encouraged production of agricultural exports and increasing use of chemical inputs. Trade liberalization is often biased against southern and small farmers, while the power of transnational corporations in agricultural trade and farm technology has grown by leaps and bounds. The corporate-driven GM-food revolution has had little positive effect on farm livelihoods or food security. The book calls for farm policies founded on farmer-led food security and a democratization of the global institutions that have had such detrimental effects.

Report of the Expert Consultation on International Fish Trade and Food Security, 2003 Recommendations made include the need: for a background study and consultation on the normative framework for fish trade and food security; for the preparation of technical guidelines on the Code of Conduct for Responsible Fisheries (CCRF), fish trade and food security; and better training to improve capacity of policy makers and technical personnel on international issues dealing with fish trade and food security.

Everyday Life in Global Morocco Rachel Newcomb, 2017-10-09 Following the story of one middle class family as they work, eat, love, and grow, *Everyday Life in Global Morocco* provides a moving and engaging exploration of how world issues impact lives. Rachel Newcomb shows how larger issues like gentrification, changing diets, and nontraditional approaches to marriage and fertility are changing what the everyday looks and feels like in Morocco. Newcomb's close engagement with the Benjelloun family presents a broad range of responses to the multifaceted effects of globalization. The lived experience of the modern family is placed in contrast with the traditional expectation of how this family should operate. This juxtaposition encourages new ways of thinking about how modern the notion of globalization really is.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of

practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
