Strengthening the Military Family Readiness System for a Changing American Society National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on the Well-Being of Military Families, 2019-10-25 The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation – their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. *Strengthening the Military Family Readiness System for a Changing American Society* examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

Verified Synthesis of Zeolitic Materials H. Robson, 2001-06-26 Zeolite synthesis is an active field of research. As long as this continues, new phases will be discovered and new techniques for preparing existing phases will appear. This edition of *Verified Synthesis of Zeolitic Materials* contains all the recipes from the first edition plus 24 new recipes. Five new introductory articles have been included plus those from the first edition, some of which have been substantially revised. The XRD patterns have been recorded using different instrument settings from those in the first edition and are intended to conform to typical X-ray diffraction practice. In most cases, only the XRD pattern for the product as synthesised is printed here. The exceptions are those phases which show marked changes in the XRD pattern upon calcination.

Re-Presenting Disability Richard Sandell, Jocelyn Dodd, Rosemarie Garland-Thomson, 2013-09-13 *Re-Presenting Disability* addresses issues surrounding disability representation in museums and galleries, a topic which is receiving much academic attention and is becoming an increasingly pressing issue for practitioners working in wide-ranging museums and related cultural organisations. This volume of provocative and timely contributions, brings together twenty researchers, practitioners and academics from different disciplinary, institutional and cultural contexts to explore issues surrounding the cultural representation of disabled people and, more particularly, the inclusion (as well as the marked absence) of disability-related narratives in museum and gallery displays. The diverse perspectives featured in the book offer fresh ways of interrogating and understanding contemporary representational practices as well as illuminating existing, related debates concerning identity politics, social agency and organisational purposes and responsibilities, which have considerable

currency within museums and museum studies. Re-Presenting Disability explores such issues as: In what ways have disabled people and disability-related topics historically been represented in the collections and displays of museums and galleries? How can newly emerging representational forms and practices be viewed in relation to these historical approaches? How do emerging trends in museum practice – designed to counter prejudiced, stereotypical representations of disabled people – relate to broader developments in disability rights, debates in disability studies, as well as shifting interpretive practices in public history and mass media? What approaches can be deployed to mine and interrogate existing collections in order to investigate histories of disability and disabled people and to identify material evidence that might be marshalled to play a part in countering prejudice? What are the implications of these developments for contemporary collecting? How might such purposive displays be created and what dilemmas and challenges are curators, educators, designers and other actors in the exhibition-making process, likely to encounter along the way? How do audiences – disabled and non-disabled – respond to and engage with interpretive interventions designed to confront, undercut or reshape dominant regimes of representation that underpin and inform contemporary attitudes to disability?

Oryx and Crake Margaret Atwood, 2010-07-27 A stunning and provocative new novel by the internationally celebrated author of *The Blind Assassin*, winner of the Booker Prize. Margaret Atwood's new novel is so utterly compelling, so prescient, so relevant, so terrifyingly-all-too-likely-to-be-true, that readers may find their view of the world forever changed after reading it. This is Margaret Atwood at the absolute peak of her powers. For readers of *Oryx and Crake*, nothing will ever look the same again. The narrator of Atwood's riveting novel calls himself Snowman. When the story opens, he is sleeping in a tree, wearing an old bedsheet, mourning the loss of his beloved Oryx and his best friend Crake, and slowly starving to death. He searches for supplies in a wasteland where insects proliferate and pigoons and wolvogs ravage the pleeblands, where ordinary people once lived, and the Compounds that sheltered the extraordinary. As he tries to piece together what has taken place, the narrative shifts to decades earlier. How did everything fall apart so quickly? Why is he left with nothing but his haunting memories? Alone except for the green-eyed Children of Crake, who think of him as a kind of monster, he explores the answers to these questions in the double journey he takes - into his own past, and back to Crake's high-tech bubble-dome, where the Paradise Project unfolded and the world came to grief. With breathtaking command of her shocking material, and with her customary sharp wit and dark humour, Atwood projects us into an outlandish yet wholly believable realm populated by characters who will continue to inhabit our dreams long after the last chapter.

Extreme NXT Philippe Hurbain, Michael Gasperi, 2007-04-30 Written by three world-leading experts in LEGO Mindstorms homebrew hardware, this book contains the detailed instructions for the construction of sensors and other extensions to the NXT. Over 15 projects are explained with well-illustrated, clear, step-by-step instructions so people with even limited experience in electronics can follow. This book is for intermediate-level users of NXT who would like to advance their capabilities by learning some of the basics of electronics. It makes a great reference for the NXT hardware interfaces.

Examples even come complete with multiple, alternative NXT languages.

Technology for Humanitarian Action Kevin M. Cahill, 2005 Humanitarian workers around the world struggle under dangerous conditions. Yet many do not have the technological tools readily available elsewhere to help them realize their mission to provide essential services and save lives. This book, the fruit of a historic conference, is a practical guide to current technologies that can help relief and humanitarian aid workers succeed. Designed to facilitate needed technology transfer to the humanitarian sector, the essays focus on areas where technology is underused and predict where new technological advances may be applied to relief efforts. The essays cover essential areas: communications technology and infrastructure support and security. They describe how such technologies as personal identification and tagging systems, software radios, wireless networks, and computer-aided language translation can promote safety and manage large groups of people. Other essays outline new technological solutions to such challenges as mine removal, water purification, and energy generation. The contributors are: Kevin M. Cahill, Frank Fernandez, C. Kumar Patel, Paul J. Kolodzy, Joseph Mitola III, Victor Zue, Jaime G. Carbonell, Stephen Squires, Joseph V. Braddock, Arthur L. Lerner-Lam, Ralph James, William L. Warren, and Regina E. Dugan.

Investigation of land subsidence and earth fissures in Cedar Valley, Iron County, Utah Paul Inkenbrandt, Willian Lund, Mike Lowe, Tyler Knudsen, Steve Bowman, 2014-03-12 This 116-page report presents the results of an investigation by the Utah Geological Survey of land subsidence and earth fissures in Cedar Valley, Iron County, Utah. Basin-fill sediments of the Cedar Valley Aquifer contain a high percentage of fine-grained material susceptible to compaction upon dewatering. Groundwater discharge in excess of recharge (groundwater mining) has lowered the potentiometric surface in Cedar Valley as much as 114 feet since 1939. Groundwater mining has caused permanent compaction of fine-grained sediments of the Cedar Valley aquifer, which has caused the land surface to subside, and a minimum of 8.3 miles of earth fissures to form. Recently acquired interferometric synthetic aperture radar imagery shows that land subsidence has affected approximately 100 mi² in Cedar Valley, but a lack of accurate historical benchmark elevation data over much of the valley prevents its detailed quantification. Continued groundwater mining and resultant subsidence will likely cause existing fissures to lengthen and new fissures to form which may eventually impact developed areas in Cedar Valley. This report also includes possible aquifer management options to help mitigate subsidence and fissure formation, and recommended guidelines for conducting subsidence-related hazard

investigations prior to development.

Analytical Travel Forecasting Approaches for Project-level Planning and Design C. D. M. Smith, Mei Chen, Ram M. Pendyala, Tom Creasey, Alan Horowitz, National Research Council (U.S.). Transportation Research Board, 2014 TRB's National Cooperative Highway Research Program (NCHRP) Report 765: Analytical Travel Forecasting Approaches for Project-Level Planning and Design describes methods, data sources, and procedures for producing travel forecasts for highway project-level analyses. This report provides an update to NCHRP Report 255: Highway Traffic Data for Urbanized Area Project Planning and Design. In addition to the report, Appendices A through I from the contractor's final report are available on CRP-CD-143. These appendices supplement this report by providing a substantial amount of companion data and information. The appendices also include the extended literature review, the detailed NCHRP Report 255 review, supplementary tables, a list of defined acronyms, and a glossary. Also included on CRP-CD-143 are spreadsheet demonstrations, and, for reference purposes, a tool developed by the North Carolina Department of Transportation to assess annual average daily traffic.--Publisher's description.

Principles of Multimessenger Astronomy Miroslav D.. Filipović, Nicholas Francis Hugh Tothill, 2021 Astronomy has traditionally relied on capturing photons from cosmic sources to be able to understand the Universe. During the 20th and 21st centuries, different messengers have been added to the astronomer's toolset : cosmic rays, neutrinos, and most recently gravitational waves. Each of these messengers opens a new window on the Universe, and a modern astronomer must be familiar with them. As multimessenger astronomy becomes part of the mainstream, each messenger must be understood not only as its own astronomical domain, but as part of a whole endeavour. A broad understanding of these messengers and their relationship to each other is the main goal of this book. The unique physics of each messenger is introduced, as well as the physics of their detection and interpretation. An additional focus is the discussion of techniques and topics that are common to more than one messenger. Treatments of historical background, the effect of the Earth's atmosphere, the transfer of radiation and measurement techniques are aimed at giving the reader a broad understanding of this new way of observing the cosmos. Principles of multimessenger astronomy is designed to be both an introduction and reference to modern astronomy.

Toxic Loopholes Craig Collins, 2010-03-08 The EPA was established to enforce the environmental laws Congress enacted during the 1970s. Yet today lethal toxins still permeate our environment, causing widespread illness and even

death. Toxic Loopholes investigates these laws, and the agency charged with their enforcement, to explain why they have failed to arrest the nation's rising environmental crime wave and clean up the country's land, air and water. This book illustrates how weak laws, legal loopholes and regulatory negligence harm everyday people struggling to clean up their communities. It demonstrates that our current system of environmental protection pacifies the public with a false sense of security, dampens environmental activism, and erects legal barricades and bureaucratic barriers to shield powerful polluters from the wrath of their victims. After examining the corrosive economic and political forces undermining environmental law making and enforcement, the final chapters assess the potential for real improvement and the possibility of building cooperative international agreements to confront the rising tide of ecological perils threatening the entire planet.
