German and Dutch in Contrast Gunther Vogelaer,Dietha Koster,Torsten Leuschner,2020-03-09 Designed as a contribution to contrastive linguistics, the present volume brings up-to-date the comparison of German with its closest neighbour, Dutch, and other Germanic relatives like English, Afrikaans, and the Scandinavian languages. It takes its inspiration from the idea of a Germanic Sandwich, i.e. the hypothesis that sets of genetically related languages diverge in systematic ways in diverse domains of the linguistic system. Its contributions set out to test this approach against new phenomena or data from synchronic, diachronic and, for the first time in a Sandwich-related volume, psycholinguistic perspectives. With topics ranging from nickname formation to the IPP (aka 'Ersatzinfinitiv'), from the grammaticalisation of the definite article to /s/-retraction, and from the role of verb-second order in the acquisition of L2 English to the psycholinguistics of gender, the volume appeals to students and specialists in modern and historical linguistics, psycholinguistics, translation studies, language pedagogy and cognitive science, providing a wealth of fresh insights into the relationships of German with its closest relatives while highlighting the potential inherent in the integration of different methodological traditions.

Advances in Multimedia Information Processing - PCM 2005 Yo-Sung Ho,Hyoung-Joong Kim,2005-10-19 We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.
