Public Health Significance of Urban Pests Xavier Bonnefoy, Helge Kampen, Kevin Sweeney, 2008 The second half of the 20th century and the beginning of the 21st century witnessed important changes in ecology, climate and human behaviour that favoured the development of urban pests. Most alarmingly, urban planners now face the dramatic expansion of urban sprawl, in which city suburbs are growing into the natural habitats of ticks, rodents and other pests. Also, many city managers now erroneously assume that pest-borne diseases are relics of the past. All these changes make timely a new analysis of the direct and indirect effects of present-day urban pests on health. Such an analysis should lead to the development of strategies to manage them and reduce the risk of exposure. To this end, WHO invited international experts in various fields - pests, pest-related diseases and pest management - to provide evidence on which to base policies. These experts identified the public health risk posed by various pests and appropriate measures to prevent and control them. This book presents their conclusions and formulates policy options for all levels of decision-making to manage pests and pest-related diseases in the future. [Ed.]

Digital Copyright Jessica Litman, Professor Litman's work stands out as well-researched, doctrinally solid, and always piercingly well-written. -JANE GINSBURG, Morton L. Janklow Professor of Literary and Artistic Property, Columbia University Litman's work is distinctive in several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. -PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, Berkeley In 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes

an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the filing of lawsuits against thousands of individuals, and the June 2005 Supreme Court decision in the Grokster case. Jessica Litman (Ann Arbor, MI) is professor of law at Wayne State University and a widely recognized expert on copyright law.

Botnets Craig Schiller, James R. Binkley, 2011-04-18 The book begins with real world cases of botnet attacks to underscore the need for action. Next the book will explain botnet fundamentals using real world examples. These chapters will cover what they are, how they operate, and the environment and technology that makes them possible. The following chapters will analyze botnets for opportunities to detect, track, and remove them. Then the book will describe intelligence gathering efforts and results obtained to date. Public domain tools like OurMon, developed by Jim Binkley of Portland State University, will be described in detail along with discussions of other tools and resources that are useful in the fight against Botnets. This is the first book to explain the newest internet threat - Botnets, zombie armies, bot herders, what is being done, and what you can do to protect your enterprise. Botnets are the most complicated and difficult threat the hacker world has unleashed - read how to protect yourself

Lost Libraries J. Raven, 2004-01-31 This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the

greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

Data and Goliath: The Hidden Battles to Collect Your Data and Control Your World Bruce Schneier, 2015-03-02 “Bruce Schneier’s amazing book is the best overview of privacy and security ever written.”—Clay Shirky “Bruce Schneier’s amazing book is the best overview of privacy and security ever written.”—Clay Shirky Your cell phone provider tracks your location and knows who’s with you. Your online and in-store purchasing patterns are recorded, and reveal if you’re unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and casual friends. Google knows what you’re thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we’re offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we’ve gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and

privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.

Reducing Litter on Roadsides Gerry John Forbes, 2009 The report provides information concerning the prevention and removal of roadside litter, unfulfilled needs, knowledge gaps, and underperforming activities. It covers enforcement, education, awareness, and engineering methods for both litter prevention and collection. The synthesis focuses on state DOT personnel involved in roadside litter prevention and their contractors who conduct litter prevention and removal programs. Also, as roadside litter prevention appears to be a multiple stakeholder activity, policy makers and practitioners from other government agencies and environmental organizations, as well as groups and

volunteers may be interested in this synthesis--Pref.

Problem Determination for WebSphere for z/OS Rica Weller, Cleberson Calefi, Per Fremstad, Keith Jabcuga, Suresh Maddukuri, Kiet Nguyen, Robyn Nostalgia, Rajesh Pericherla, 2006 IBM WebSphere Application Server for z/OS V6 is a complex product made up of many components. This IBM Redbooks publication focuses on the problems that you can experience with WebSphere for z/OS. It is intended for system programmers and administrators who need to identify, analyze, and fix problems efficiently so that they can deliver good support for the WebSphere environment. In Part 1, we provide an

overview of problem determination methodology, what skills you need, where to find information about related topics, and how to communicate with IBM when a problem occurs. In Part 2, we describe the most common problem symptoms. Flow charts guide you through the problem analysis process step by step. Individual tasks and questions help you filter out irrelevant facts and find the problem area, so that you can identify the type, source, cause, and possibly a solution. In Part 3, we identify possible problem areas and arrange them into four phases that correspond with WebSphere for z/OS life cycle stages. We explain how to analyze the problems and provide valuable hints and tips for avoiding them. In Part 4, we provide means and tools for problem determination such as commands, logs, dumps, traces, and diagnostic tools. We describe other tools that can ease the day-to-day tasks and prevent problems. We also explain where to get these tools, show you how to use them, and provide examples. Please note that the additional material referenced in the text is not available from IBM.

Neoliberal Apartheid Andy Clarno, 2017-03-07 This is the first comparative analysis of the political transitions in South Africa and Palestine since the 1990s. Clarno's study is grounded in impressive ethnographic fieldwork, taking him from South African townships to Palestinian refugee camps, where he talked to a wide array of informants, from local residents to policymakers, political activists, business representatives, and local and international security personnel. The resulting inquiry accounts for the simultaneous development of extreme inequality, racialized poverty, and advanced strategies for securing the powerful and policing the poor in South Africa and Palestine/Israel over the last 20 years. Clarno places these transitions in a global context while arguing that a new

form of neoliberal apartheid has emerged in both countries. The width and depth of Clarno's research, combined with wide-ranging first-hand accounts of realities otherwise difficult for researchers to access, make *Neoliberal Apartheid* a path-breaking contribution to the study of social change, political transitions, and security dynamics in highly unequal societies. Take one example of Clarno's major themes, to wit, the issue of security. Both places have generated advanced strategies for securing the powerful and policing the racialized poor. In South Africa, racialized anxieties about black crime shape the growth of private security forces that police poor black South Africans in wealthy neighborhoods. Meanwhile, a discourse of Muslim terrorism informs the coordinated network of security forces involving Israel, the United States, Jordan, and the Palestinian Authority that polices Palestinians in the West Bank. Overall, Clarno's pathbreaking book shows how the shifting relationship between racism, capitalism, colonialism, and empire has generated inequality and insecurity, marginalization and securitization in South Africa, Palestine/Israel, and other parts of the world.
