The 100-Mile Diet Alisa Smith,J.B. MacKinnon,2009-02-24 The remarkable, amusing and inspiring adventures of a Canadian couple who make a year-long attempt to eat foods grown and produced within a 100-mile radius of their apartment. When Alisa Smith and James MacKinnon learned that the average ingredient in a North American meal travels 1,500 miles from farm to plate, they decided to launch a simple experiment to reconnect with the people and places that produced what they ate. For one year, they would only consume food that came from within a 100-mile radius of their Vancouver apartment. The 100-Mile Diet was born. The couple's discoveries sometimes shook their resolve. It would be a year without sugar, Cheerios, olive oil, rice, Pizza Pops, beer, and much, much more. Yet local eating has turned out to be a life lesson in pleasures that are always close at hand. They met the revolutionary farmers and modern-day hunter-gatherers who are changing the way we think about food. They got personal with issues ranging from global economics to biodiversity. They called on the wisdom of grandmothers, and immersed themselves in the seasons. They discovered a host of new flavours, from gooseberry wine to sunchokes to turnip sandwiches, foods that they never would have guessed were on their doorstep. The 100-Mile Diet struck a deeper chord than anyone could have predicted, attracting media and grassroots interest that spanned the globe. The 100-Mile Diet: A Year of Local Eating tells the full story, from the insights to the kitchen disasters, as the authors transform from megamart shoppers to self-sufficient urban pioneers. The 100-Mile Diet is a pathway home for anybody, anywhere. Call me naive, but I never knew that flour would be struck from our 100-Mile Diet. Wheat products are just so ubiquitous, "the staff of life," that I had hazily imagined the stuff must be grown everywhere. But of course: I had never seen a field of wheat anywhere close to Vancouver, and my mental images of late-afternoon light falling on golden fields of grain were all from my childhood on the Canadian prairies. What I was able to find was Anita's Organic Grain & Flour Mill, about 60 miles up the Fraser River valley. I called, and learned that Anita's nearest grain suppliers were at least 800 miles away by road. She sounded sorry for me. Would it be a year until I tasted a pie? –From The 100-Mile Diet

Artificial Intelligence and Inclusive Education Jeremy Knox,Yuchen Wang,Michael Gallagher,2019-06-13 This book brings together the fields of artificial intelligence (often known as A.I.) and inclusive education in order to speculate on the future of teaching and learning in increasingly diverse social, cultural, emotional, and linguistic educational contexts. This book addresses a pressing need to understand how future educational practices can promote equity and equality, while at the same time adopting A.I. systems that are oriented towards automation, standardisation and efficiency. The contributions in this edited volume appeal to scholars and students with an interest in forming a critical understanding of the development of A.I. for education, as well as an interest in how the processes of inclusive education might be shaped by future technologies. Grounded in theoretical engagement, establishing key challenges for future practice, and outlining the latest research, this book offers a comprehensive overview of the complex issues arising from the convergence of A.I. technologies and the necessity of developing inclusive teaching and learning. To date, there has been little in the way of direct association between research and practice in these domains: A.I. has been a predominantly technical field of research and development, and while intelligent computer systems and 'smart' software are being increasingly applied in many areas of industry, economics, social life, and education itself, a specific engagement with the agenda of inclusion appears lacking. Although such technology offers exciting possibilities for education, including software that is designed to 'personalise' learning or adapt to learner behaviours, these developments are accompanied by growing concerns about the in-built biases involved in machine learning techniques driven by 'big data'.

Machine Learning Applications Using Python Puneet Mathur,2018-12-12 Gain practical skills in machine learning for finance, healthcare, and retail. This book uses a hands-on approach by providing case studies from each of these domains: you'll see examples that demonstrate how to use machine learning as a tool for business enhancement. As a domain expert, you will not only discover how machine learning is used in finance, healthcare, and retail, but also work through practical case studies where machine learning has been implemented. Machine Learning Applications Using Python is divided into three sections, one for each of the domains (healthcare, finance, and retail). Each section starts with an overview of machine learning and key technological advancements in that domain. You'll then learn more by using case studies on how organizations are changing the game in their chosen markets. This book has practical case studies with Python code and domain-specific innovative ideas for monetizing machine learning. What You Will LearnDiscover applied machine learning processes and principles Implement machine learning in areas of healthcare, finance, and retail Avoid the pitfalls of implementing applied machine learning Build Python machine learning examples in the three subject areas Who This Book Is For Data scientists and machine learning professionals.

Bank 2.0 Brett King,2010 The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

The 1940 Vrancea Earthquake. Issues, Insights and Lessons Learnt Radu Vacareanu,Constantin Ionescu,2016-03-02 These proceedings include most of the available information on this major seismic event and its consequences. With an estimated moment magnitude of 7.7 and a heavy toll in terms of human and economic losses, it ranks as the largest intermediate-depth earthquake in Europe in the twentieth century. Nevertheless, because of the difficult conditions in the 1940s, the lessons learnt after the Vrancea earthquake were not extensively shared with the international scientific community and thus, this book fills a gap in the literature discussing the knowledge acquired after major disasters. Past experience together with current understanding of the 1940 Vrancea earthquake are presented along with the latest information on Romanian seismicity, seismic hazard and risk assessment, and seismic evaluation and rehabilitation of buildings and structures. Moreover, it includes excerpts from Romanian post-disaster reports and textbooks concerning the earthquake.

Acid Crime Matt Hopkins, Lucy Neville, Teela Sanders, 2021-03-01 This book provides an authoritative overview of the contemporary phenomenon widely labelled as 'acid attacks'. Although once thought of as a predominantly 'gendered crime', acid and other corrosive substances have been used in a range of violence crimes. This book explores the historical use of corrosives in crime, legal definitions of such attacks, the contexts in which corrosives are used, victim characteristics, offender motivations for carrying and decanting corrosives, and preventative strategies. Data is drawn from the international literature and the analysis of primary data collected in the UK (which is thought to have one of the highest rates of acid attacks in the world) from interviews with over 20 convicted offenders and from police case files relating to over 1,000 crimes involving corrosive substances. This book adds significantly to the international literature on weapons carrying and use, which to date has predominantly focused around the possession and use of guns and knives.

Irrationality Stuart Sutherland, 2007 Why do qualified professionals make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

More Than Meets the Eye Georgina Kleege, 2018 'More Than Meets the Eye' seeks to dismantle traditional understandings of blindness through scrutiny of philosophical speculation, scientific case studies, literary depictions, and museum access programs for the blind. It introduces blind and visually impaired artists whose work has shattered stereotypes and opened up new aesthetic possibilities for everyone.

Tunza United Nations Environment Programme, 2003 Tunza was developed by the United Nations Environment Programme (UNEP) who acknowledged the need for a book to stimulate environmental action among young people. Through participatory discussions and suggestions, particularly from participants at the Global Youth Forum held in Denmark in March 2002, young people from around the world helped to produce a book that would provide them and their contemporaries with a reference and forum on key environmental issues. The aim being to motivate and guide young people on actions they can take in their local communities to help sustainable development.

Artful Rainwater Design Stuart Echols, Eliza Pennypacker, 2015-05-19 Artful Rainwater Design has three main parts: first, the book outlines five amenity-focused goals that might be highlighted in a project: education, recreation, safety, public relations, and aesthetic appeal. Next, it focuses on techniques for ecologically sustainable stormwater management that complement the amenity goals. Finally, it features diverse case studies that show how designers around the country are implementing principles of artful rainwater design.

The Essential HBO Reader Gary R. Edgerton, Jeffrey P. Jones, 2013-07-24 The founding of Home Box Office in the early 1970s was a harbinger of the innovations that transformed television as an industry and a technology in the decades that followed. HBO quickly became synonymous with subscription television and became the leading force in cable programming. Having interests in television, motion picture, and home video industries was crucial to its success. HBO diversified into original television and movie production, home video sales, and international distribution as these once-separate entertainment sectors began converging into a global entertainment industry in the mid-1980s. HBO has grown from a domestic movie channel to an international cable-and-satellite network with a presence in over seventy countries. It is now a full-service content provider with a distinctive brand of original programming and landmark shows such as *The Sopranos* and *Sex and the City*. The network is widely recognized for its award-winning, innovative and provocative programming, including dramatic series such as *Six Feet Under* and *The Wire*, miniseries such as *Band of Brothers* and *Angels in America*, comedies such as *Curb Your Enthusiasm* and *Def Comedy Jam*, sports shows such as *Inside the NFL* and *Real Sports with Bryant Gumbel*, documentary series such as *Taxi Cab Confessions* and *Autopsy*, and six Oscar-winning documentaries between 1999 and 2004. In *The Essential HBO Reader*, editors Gary R. Edgerton and Jeffrey P. Jones bring together an accomplished group of scholars to explain how HBO's programming transformed the world of cable television and how the network continues to shape popular culture and the television industry. Now, after more than three and a half decades, HBO has won acclaim in four distinct programming areas—drama, comedy, sports, and documentaries—emerging as TV's gold standard for its breakout series and specials. *The Essential HBO Reader* provides a comprehensive and compelling examination of HBO's development into the prototypical entertainment corporation of the twenty-first century.

Noah and the Deluge: Chronological, Historical and Archaeological Evidence Gerard Gertoux, 2015-10-19 Historians consider the biblical account of Noah and the Deluge as a myth. However, this famous event occurred at the earliest times of recorded history (Sumerian King List). Today scientists believe in the last ice age called Pleistocene ending in 10,000 BCE, but there is no witness of this planetary cataclysmic event and its existence is based solely on the controversial interpretation of its consequences and their dating. The existence of erratic blocks and the disappearance of mammoths are presented as evidence of the last glaciation. However, despite dating obtained by 14C (calibrated by dendrochronology) is considered absolute by most experts its confrontation with the Egyptian chronology, in which some dates are fixed by astronomy, reverses this widespread belief and shows that dates obtained by 14C increase exponentially before -2200. Thus the rate of 14C tends gradually to 0 around -3500, which implies an important consequence: before -3500, 14C dating is no longer possible.

Global Health Security Anthony J. Masys, Ricardo Izurieta, Miguel Reina Ortiz, 2020-01-01 With our highly connected and interdependent world, the growing threat of

infectious diseases and public health crisis has shed light on the requirement for global efforts to manage and combat highly pathogenic infectious diseases and other public health crisis on an unprecedented level. Such disease threats transcend borders. Reducing global threats posed by infectious disease outbreaks – whether naturally caused or resulting from a deliberate or accidental release – requires efforts that cross the disaster management pillars: mitigation, preparedness, response and recovery. This book addresses the issues of global health security along 4 themes: Emerging Threats; Mitigation, Preparedness, Response and Recovery; Exploring the Technology Landscape for Solutions; Leadership and Partnership. The authors of this volume highlight many of the challenges that confront our global security environment today. These range from politically induced disasters, to food insecurity, to zoonosis and terrorism. More optimistically, the authors also present some advances in technology that can help us combat these threats. Understanding the challenges that confront us and the tools we have to overcome them will allow us to face our future with confidence.

Women, Science, and Technology Mary Wyer,2001 This reader provides an introduction to the gendering of science and the impact women are making in laboratories around the world. The republished essays included in this collection are both personal tales from women scientists and essays on the nature of science itself, covering such controversial issues like the under-representation of women in science, reproductive technology, sociobiology, evolutionary theory, and the notion of objective science.
