The Economics of Fantasy Sharon Stockton, 2006 The author examines the evolution of the rape narrative in twentieth-century literature: What accounts for the persistence of the old story of male power and violence, and female passivity and penetrability? How has the story changed over the course of the twentieth century? She investigates the manner in which the violation of the female body serves as a metaphor for a synthesis of masculinity and political economy.

Scenario Thinking R. Bradley MacKay, Peter McKiernan, 2018-08-31 This Element infuses established scenario planning routines with an exploration of cognitive reasoning, by contextualising scenario thinking within the wider human endeavour of grappling with future uncertainties. A study of ancient civilisations shows that scenario thinking is not new, but has evolved significantly since ancient times. By de-coupling scenario thinking from scenario planning, it is elevated as the essential ingredient in managerial foresight projects. The historical theme continues, focussing on the evolution of modern scenario planning, by way of the French and Anglo-American schools of thought, using the intuitive logics methodology. Archival research has discovered early contributions in the UK around the development and use of scenario thinking in public policy, which has been overlooked in many received histories. Finally, the usefulness of scenario thinking for strategic management is challenged here and the argument that it is a heuristic device for overcoming cognitive biases and making better strategic decisions is refined.

White Oleander Janet Fitch, 2006-09-01 The unforgettable story of a young woman's odyssey through a series of Los Angeles foster homes on her journey to redemption. Astrid is the only child of a single mother, Ingrid, a brilliant, obsessed poet who wields her luminous beauty to intimidate and manipulate men. Astrid worships her mother and cherishes their private world full of ritual and mystery - but their idyll is shattered when Astrid's mother falls apart over a lover. Deranged by rejection, Ingrid murders the man, and is sentenced to life in prison. *White Oleander* is the unforgettable story of Astrid's journey through a series of foster homes and her efforts to find a place for herself in impossible circumstances. Each home is its own universe, with a new set of laws and lessons to be learned. With determination and humor, Astrid confronts the challenges of loneliness and poverty, and strives to learn who a motherless child in an indifferent world can become. Oprah Winfrey enjoyed this gripping first novel so much that she not only made it her book club pick, she asked if she could narrate the audio release.

One Hundred Years of Chemical Warfare: Research, Deployment, Consequences Bretislav Friedrich, Dieter Hoffmann, Jürgen Renn, Florian Schmaltz, Martin Wolf, 2017-11-26 This book is open access under a CC BY-NC 2.5 license. On April 22, 1915, the German military released 150 tons of chlorine gas at Ypres, Belgium. Carried by a long-awaited wind, the chlorine cloud passed within a few minutes through the British and French trenches, leaving behind at least 1,000 dead and 4,000 injured. This chemical attack, which amounted to the first use of a weapon of mass destruction, marks a turning point in world history. The preparation as well as the execution of the gas attack was orchestrated by Fritz Haber, the director of the Kaiser Wilhelm Institute for Physical Chemistry and Electrochemistry in Berlin-Dahlem. During World War I, Haber transformed his research institute into a center for the development of

chemical weapons (and of the means of protection against them). Bretislav Friedrich and Martin Wolf (Fritz Haber Institute of the Max Planck Society, the successor institution of Haber's institute) together with Dieter Hoffmann, Jürgen Renn, and Florian Schmaltz (Max Planck Institute for the History of Science) organized an international symposium to commemorate the centenary of the infamous chemical attack. The symposium examined crucial facets of chemical warfare from the first research on and deployment of chemical weapons in WWI to the development and use of chemical warfare during the century hence. The focus was on scientific, ethical, legal, and political issues of chemical weapons research and deployment – including the issue of dual use – as well as the ongoing effort to control the possession of chemical weapons and to ultimately achieve their elimination. The volume consists of papers presented at the symposium and supplemented by additional articles that together cover key aspects of chemical warfare from 22 April 1915 until the summer of 2015.

The FIAF Moving Image Cataloguing Manual Linda Tadic, 2016-10-17 The FIAF Moving Image Cataloguing Manual is the result of many years of labor and collaboration with numerous professionals in the moving image field. It addresses the changes in information technology that we've seen over the past two decades, and aligns with modern cataloguing and metadata standards and concepts such as FRBR (Functional Requirements for Bibliographic Records), EN 15907, and RDA (Resource Description and Access). The manual is designed to be compatible with a variety of data structures, and provides charts, decision trees, examples, and other tools to help experts and non-experts alike in performing real-world cataloguing of moving image collections.

Created in God's Image Anthony A. Hoekema, 1994-09-06 according to Scripture, humankind was created in the image of God. Hoekema discusses the implications of this theme, devoting several chapters to the biblical teaching on God's image, the teaching of philosophers and theologians through the ages, and his own theological analysis. Suitable for seminary-level anthropology courses, yet accessible to educated laypeople. Extensive bibliography, fully indexed.

Applications of Nanotechnology for Green Synthesis Inamuddin, Abdullah M. Asiri, 2020-07-02 Traditional methods in synthetic chemistry produce chemical waste and byproducts, yield smaller desired products, and generate toxic chemical substances, but the past two centuries have seen consistent, greener improvements in organic synthesis and transformations. These improvements

have contributed to substance handling efficiency by using green-engineered forerunners like sustainable techniques, green processes, eco-friendly catalysis, and have minimized energy consumption, reduced potential waste, improved desired product yields, and avoided toxic organic precursors or solvents in organic synthesis. Green synthesis has the potential to have a major ecological and monetary impact on modern pharmaceutical R&D and organic chemistry fields. This book presents a broad scope of green techniques for medicinal, analytical, environmental, and organic chemistry applications. It presents an accessible overview of new innovations in the field, dissecting the highlights and green chemistry attributes of approaches to green synthesis, and provides cases to exhibit applications to pharmaceutical and organic chemistry. Although daily chemical processes are a major part of the sustainable development of pharmaceuticals and industrial products, the resulting environmental pollution of these processes is of worldwide concern. This edition discusses green chemistry techniques and sustainable processes involved in synthetic organic chemistry, natural products, drug syntheses, as well various useful industrial applications.

The Chaos Scenario Bob Garfield, 2009 What happens when the old mass media/mass marketing model collapses and the Brave New World is unprepared to replace it? In this fascinating, terrifying, instructive and often hilarious book, Bob Garfield of NPR and Ad Age, chronicles the disintegration of traditional media and marketing but also travels five continents to discover how business can survive--and thrive--in a digitally connected, Post-Media Age. He calls this the art and science of Listenomics. You should listen, too.

Valuing People in Construction Fidelis Emuze, John Smallwood, 2017-08-09 Valuing People in Construction provides contemporary perspectives on the 'glue' that binds the construction process together; people. The book addresses people issues in the construction industry where behavioural outcomes impact upon business and project performance. The main proposition of the book is that as people continue to lead the completion of construction activities, their health, safety, and well-being should be seen as a priority, and valued by stakeholders. As employers and employees, the role of people in construction must be to strive for the improvement of individual lives and society. This edited collection, which is the first book to focus specifically on placing value on people in construction, focuses on people at work, gender at work, conditions at work, and respect at work. In addition to an editorial overview, the book presents tested and refined empirical work and case studies by leading construction researchers from Africa, Australia, and Europe. Essential reading for researchers, students and professionals interested in construction management, the sociology of construction, HRM in construction, gender, work and health studies.

Makeover Nation Toby Miller, 2008 Life is very much a project in the United States--but not a straightforwardly individual one. A duality of individual free choice and disciplinary institutional governance is the grand national paradox. Simply being--leading life without a bumper sticker avowing one's elective institutional affinities--seems implausible in a country consumed by the makeover--the idea that what you were born as need not define you forever. As Toby Miller writes in his introduction: I come neither to bury the makeover nor to praise the makeover, but to criticize it, even as I stand alternately bewildered, amused, appalled, and attracted by it. In *Makeover Nation* he does just that in a witty, no-holds-barred style. Miller looks at the power of various forms of knowledge about people and their emotions as they have been applied to the US population, from talk therapy to drug treatment. He is particularly interested in young people--in examining how childhood is constructed--and pays close attention to the much-favored (and overused) diagnosis and treatment of ADHD/ADD. He also focuses his attention on metrosexuals and right-wing Christians to disclose how these opposing

groups manifest their drive toward self-creation. Miller believes that we must question the pleasures of reinvention even as we embrace them.

The Chekhovian Intertext Lyudmila Parts, 2008 In *The Chekhovian Intertext* Lyudmila Parts explores contemporary Russian writers' intertextual engagement with Chekhov and his myth. She offers a new interpretative framework to explain the role Chekhov and other classics play in constructing and maintaining Russian national identity and the reasons for the surge in the number of intertextual engagements with the classical authors during the cultural crisis in post-perestroika Russia. The book highlights the intersection of three distinct concepts: cultural memory, cultural myth, and intertextuality. It is precisely their interrelation that explains how intertextuality came to function as a defense mechanism of culture, a reaction of cultural memory to the threat of its disintegration. In addition to offering close readings of some of the most significant short stories by contemporary Russian authors and by Chekhov, as a theoretical case study the book sheds light on important processes in contemporary literature: it explores the function of intertextuality in the development of Russian literature, especially post-Soviet literature; it singles out the main themes in contemporary literature, and explains their ties to national cultural myths and to cultural memory. *The Chekhovian Intertext* may serve as a theoretical model and impetus for examinations of other national literatures from the point of view of the relationship between intertextuality and cultural memory.
