Indigenous Data Sovereignty Tahu Kukutai, John Taylor, 2016-11-14 As the global 'data revolution' accelerates, how can the data rights and interests of indigenous peoples be secured? Premised on the United Nations Declaration on the Rights of Indigenous Peoples, this book argues that indigenous peoples have inherent and inalienable rights relating to the collection, ownership and application of data about them, and about their lifeways and territories. As the first book to focus on indigenous data sovereignty, it asks: what does data sovereignty mean for indigenous peoples, and how is it being used in their pursuit of self-determination? The varied group of mostly indigenous contributors theorise and conceptualise this fast-emerging field and present case studies that illustrate the challenges and opportunities involved. These range from indigenous communities grappling with issues of identity, governance and development, to national governments and NGOs seeking to formulate a response to indigenous demands for data ownership. While the book is focused on the CANZUS states of Canada, Australia, Aotearoa/New Zealand and the United States, much of the content and discussion will be of interest and practical value to a broader global audience. 'A debate-shaping book ... it speaks to a fast-emerging field; it has a lot of important things to say; and the timing is right.' – Stephen Cornell, Professor of Sociology and Faculty Chair of the Native Nations Institute, University of Arizona 'The effort ... in this book to theorise and conceptualise data sovereignty and its links to the realisation of the rights of indigenous peoples is pioneering and laudable.' – Victoria Tauli-Corpuz, UN Special Rapporteur on the Rights

of Indigenous Peoples, Baguio City, Philippines

*Soil pollution: a hidden reality* Food and Agriculture Organization of the United Nations, 2018-04-30 This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO<sub>2</sub> and N<sub>2</sub>O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.

**Transforming REDD+** Angelsen, A., Martius, C., de Sy, V., Duchelle, A.E., Larson, A.M., Pham, T.T., 2018-12-12 Constructive critique. This book provides a critical, evidence-based analysis of REDD+ implementation so far, without losing sight of the urgent need to reduce forest-based emissions to prevent catastrophic climate change. REDD+ as envisioned

**The Drama of the Commons** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, 2002-02-15 The tragedy of the

commons is a central concept in human ecology and the study of the environment. It has had tremendous value for stimulating research, but it only describes the reality of human-environment interactions in special situations. Research over the past thirty years has helped clarify how human motivations, rules governing access to resources, the structure of social organizations, and the resource systems themselves interact to determine whether or not the many dramas of the commons end happily. In this book, leaders in the field review the evidence from several disciplines and many lines of research and present a state-of-the-art assessment. They summarize lessons learned and identify the major challenges facing any system of governance for resource management. They also highlight the major challenges for the next decade: making knowledge development more systematic; understanding institutions dynamically; considering a broader range of resources (such as global and technological commons); and taking into account the effects of social and historical context. This book will be a valuable and accessible introduction to the field for students and a resource for advanced researchers.

**Climate Change from the Streets** Michael Méndez, 2020-01-07 An urgent and timely story of the contentious politics of incorporating environmental justice into global climate change policy Although the science of climate change is clear, policy decisions about how to respond to its effects remain contentious. Even when such decisions claim to be guided by objective knowledge, they are made and implemented through political institutions and relationships—and all the competing interests and power struggles that this implies. Michael Méndez tells a timely story of people, place, and power in the context of climate change and inequality. He explores the

perspectives and influence low-income people of color bring to their advocacy work on climate change. In California, activist groups have galvanized behind issues such as air pollution, poverty alleviation, and green jobs to advance equitable climate solutions at the local, state, and global levels. Arguing that environmental protection and improving public health are inextricably linked, Mendez contends that we must incorporate local knowledge, culture, and history into policymaking to fully address the global complexities of climate change and the real threats facing our local communities.

New Trends in Intercalation Compounds for Energy Storage Christian Julien, J.P. Pereira-Ramos, A. Momchilov, 2002-04-30 Recent advances in electrochemistry and materials science have opened the way to the evolution of entirely new types of energy storage systems: rechargeable lithium-ion batteries, electrochroms, hydrogen containers, etc., all of which have greatly improved electrical performance and other desirable characteristics. This book encompasses all the disciplines linked in the progress from fundamentals to applications, from description and modelling of different materials to technological use, from general diagnostics to methods related to technological control and operation of intercalation compounds. Designing devices with higher specific energy and power will require a more profound understanding of material properties and performance. This book covers the status of materials and advanced activities based on the development of new substances for energy storage.

*Multiple Criteria Decision Making for Sustainable Energy and Transportation Systems* Matthias Ehrigott, Boris Naujoks, Theodor Stewart, Jyrki Wallenius, 2010-03-10 In the twenty-first century the sustainability of energy and transportation systems is on the top of the

political agenda in many countries around the world. Environmental impacts of human economic activity necessitate the consideration of conflicting goals in decision making processes to develop sustainable systems. Any sustainable development has to reconcile conflicting economic and environmental objectives and criteria. The science of multiple criteria decision making has a lot to offer in addressing this need. Decision making with multiple (conflicting) criteria is the topic of research that is at the heart of the International Society of Multiple Criteria Decision Making. This book is based on selected papers presented at the societies 19th International Conference, held at The University of Auckland, New Zealand, from 7th to 12th January 2008 under the theme MCDM for Sustainable Energy and Transportation Systems''.

**Indicators for Waterborne Pathogens** National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Board on Life Sciences, Committee on Indicators for Waterborne Pathogens, 2004-06-19  
Recent and forecasted advances in microbiology, molecular biology, and analytical chemistry have made it timely to reassess the current paradigm of relying predominantly or exclusively on traditional bacterial indicators for all types of waterborne pathogens.Â Nonetheless, indicator approaches will still be required for the foreseeable future because it is not practical or feasible to monitor for the complete spectrum of microorganisms that may occur in water, and many known pathogens are

difficult to detect directly and reliably in water samples.Â This comprehensive report recommends the development and use of a tool box approach by the U.S Environmental Protection Agency and others for assessing microbial water quality in which available indicator organisms (and/or pathogens in some cases) and detection method(s) are matched to the requirements of a particular application.Â The report further recommends the use of a phased, three-level monitoring framework to support the selection of indicators and indicator approaches.Â

*The Desert World* Arthur Mangin, 2022-08-10 The Desert World by Arthur Mangin is a scholarly tome on deserts throughout the world. It encompasses knowledge of deserts on literally all continents. Excerpt: The traveller, ascending the famous river which has so long been mixed up with an apparently insoluble geographical problem, sees the Desert everywhere present; its yellow boundary-line is vividly traced against the rich emerald-green of the fertile valley, and, as he advances, that line seems to draw nearer and nearer, until the cultivated soil appears reduced to a narrow strip on the river-bank. It has encroached upon many once prosperous and busy sites, and buried deeply the memorials of the old Egyptian civilization.

**Protecting the Commons** Joanna Burger, 2001

Commons—lands, waters, and resources that are not legally owned and controlled by a single private entity, such as ocean and coastal areas, the atmosphere, public lands, freshwater aquifers, and migratory species—are an increasingly contentious issue in resource management and international affairs. Protecting the Commons provides an important analytical framework for understanding commons issues and for designing policies to deal with them. The product of a symposium convened by the Scientific Committee on Problems of the

Environment (SCOPE) to mark the 30th anniversary of Garrett Hardin's seminal essay "The Tragedy of the Commons" the book brings together leading scholars and researchers on commons issues to offer both conceptual background and analysis of the evolving scientific understanding on commons resources. The book: gives a concise update on commons use and scholarship offers eleven case studies of commons, examined through the lens provided by leading commons theorist Elinor Ostrom provides a review of tools such as Geographic Information Systems that are useful for decision-making examines environmental justice issues relevant to commons Contributors include Alpina Begossi, William Blomquist, Joanna Burger, Tim Clark, Clark Gibson, Michael Gelobter, Michael Gochfeld, Bonnie McCay, Pamela Matson, Richard Norgaard, Elinor Ostrom, David Policansky, Jeffrey Richey, Jose Sarukhan, and Edella Schlager. Protecting the Commons represents a landmark study of commons issues that offers analysis and background from economic, legal, social, political, geological, and biological perspectives. It will be essential reading for anyone concerned with commons and commons resources, including students and scholars of environmental policy and economics, public health, international affairs, and related fields.

**Histopathological Image Analysis in Medical Decision Making** Dey, Nilanjan, Ashour, Amira S., Kalia, Harihar, Goswami, R.T., Das, Himansu, 2018-09-21 Medical imaging technologies play a significant role in visualization and interpretation methods in medical diagnosis and practice using decision making, pattern classification, diagnosis, and learning. Progressions in the field of medical imaging lead to interdisciplinary discovery in microscopic image processing and computer-assisted diagnosis systems, and aids physicians in the diagnosis and

early detection of diseases. Histopathological Image Analysis in Medical Decision Making provides emerging research exploring the theoretical and practical applications of image technologies and feature extraction procedures within the medical field. Featuring coverage on a broad range of topics such as image classification, digital image analysis, and prediction methods, this book is ideally designed for medical professionals, system engineers, medical students, researchers, and medical practitioners seeking current research on problem-oriented processing techniques in imaging technologies.

Perpetual Scriptures in Nineteenth-Century America Jeff Smith, 2023-08-10 In the tumultuous decades of rapid expansion and change between the American Founding and the Civil War, Americans confronted a cluster of overlapping crises whose common theme was the difficulty of finding authority in written texts. The issue arose from several disruptive developments: rising challenges to the traditional authority of the Bible in a society that was intensely Protestant; persistent worries over America's lack of a "national literature" and an independent cultural identity; and the slavery crisis, which provoked tremendous struggles over clashing interpretations of the Declaration of Independence and the Constitution, even as these "parascriptions" were rising to the status of a kind of quasi-sacred secular canon. At the same time but from the opposite direction, new mass media were creating a new, industrial-scale

print culture that put a premium on very non-sacred, disposable text: mass-produced “news,” dispensed immediately and in huge quantities but meant only for the day or hour. Perpetual Scriptures in Nineteenth-Century America identifies key features of the writings, careers and cultural politics of several prominent Americans as responses to this cluster of challenges. In their varied attempts to vindicate the sacred and to merge the timeless with the urgent present, Joseph Smith, Ralph Waldo Emerson, Margaret Fuller, Theodore Parker, Harriet Beecher Stowe, Walt Whitman, Frederick Douglass, Martin Delany, Abraham Lincoln, and other religious and political leaders and men and women of letters helped define American literary culture as an ongoing quest for new “bibles,” or what Emerson called a “perpetual scripture.”

#### **The Coming of Neo-Feudalism Joel**

Kotkin, 2023-01-10 Following a remarkable epoch of greater dispersion of wealth and opportunity, we

are inexorably returning towards a more feudal era marked by greater concentration of wealth and property, reduced upward mobility, demographic stagnation, and increased dogmatism. If the last seventy years saw a massive expansion of the middle class, not only in America but in much of the developed world, today that class is declining and a new, more hierarchical society is emerging. The new class structure resembles that of Medieval times. At the apex of the new order are two classes—a reborn clerical elite, the clerisy, which dominates the upper part of the professional ranks, universities, media and culture, and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information. These two classes correspond to the old French First and Second Estates. Below these two classes lies what was once called the Third Estate. This includes the yeomanry, which is made up largely of small businesspeople, minor property owners, skilled workers and private-sector oriented professionals. Ascendant for much of modern history, this class is in decline while those below them, the new Serfs, grow in numbers—a vast, expanding property-less population. The trends are mounting, but we can still reverse them—if people understand what is actually occurring and have the capability to oppose them.
