Effects of Trawling and Dredging on Seafloor Habitat National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Committee on Ecosystem Effects of Fishing: Phase 1—Effects of Bottom Trawling on Seafloor Habitats, 2002-08-09 Concerns over the potential ecological effects of fishing have increased with the expansion of fisheries throughout the marine waters of the United States. *Effects of Trawling and Dredging on Seafloor Habitat* describes how assessment of fishing impacts depends on gear type, number and location of bottom tows, and the physical and biological characteristics of seafloor habitats. Many experimental studies have documented acute, gear-specific effects of trawling and dredging on various types of habitat. These studies indicate that low mobility, long-lived species are more vulnerable to towed fishing gear than short-lived species in areas where the seabed is often disturbed by natural phenomena. Trawling and dredging may also change the composition and productivity of fish communities dependent on seafloor habitats for food and refuge. The scale of these impacts depends on the level of fishing effort. This volume presents color maps of fishing effort for all regions with significant bottom trawl or dredge fisheries—the first time that such data has been assembled and analyzed for the entire nation.

The Advanced Practice Registered Nurse as a Prescriber Marie Annette Brown, Louise Kaplan, 2011-12-08 A new era of opportunity is emerging for advanced practice registered nurses (APRNs) to increasingly address gaps in access to quality healthcare. APRNs must be prepared to practice to the full scope of their education and abilities. As more and more states pass legislation enhancing prescriptive authority and fully autonomous practice for APRNs, a comprehensive resource on prescribing practices is needed. The increasing demands of today's fast-paced healthcare environment require a new level of prescriber expertise. Knowledge about medication characteristics and effectiveness must be accompanied by an understanding of the context and process of prescribing. The Advanced Practice Registered Nurse as a Prescriber provides practicing APRNs and students with the information necessary to make fully informed, rational and ethical decisions as prescribers. This book opens with an overview of the role of the APRN prescriber and moves on to discussing practical issues such as managing difficult patient situations, special considerations when prescribing controlled substances, the influence of pharmaceutical marketing, state regulation, and legal aspects of prescribing. The book also examines barriers to prescribing, and the concluding chapter underscores key information to build cultural competence when prescribing. An evidence-based resource for all APRNs and APRN students, *The Advanced Practice Registered Nurse as a Prescriber* provides a comprehensive and practical resource essential for APRNs in all advanced practice roles.

Saving Talk Therapy Enrico Gnaulati, 2018-01-09 A hard-hitting critique of how managed care and the selective use of science to privilege quick-fix therapies have undermined in-depth psychotherapy—to the detriment of patients and practitioners In recent decades there has been a decline in the quality and availability of psychotherapy in America that has gone largely unnoticed—even though rates of anxiety, depression, and suicide are on the rise. In *Saving Talk Therapy*, master therapist Dr. Enrico Gnaulati presents powerful case studies from his practice to remind patients and therapists alike how and why traditional talk therapy works and, using cutting-edge research findings, unpacks the problematic incentives in our health-care system and in academic psychology that explain its decline. Beginning with a discussion of the historical development of talk therapy, Dr. Gnaulati goes on to dissect the factors that have undermined it. Psychotropic drugs, if no longer thought of as a magical cure, are still over-prescribed and shunt health-care dollars to drug corporations. Managed-care companies and mental health “carve outs” send health-care dollars to administrators, drive many practitioners away, and over-burden those who

remain. And drawing back the curtains on CBT (cognitive behavior therapy), Dr. Gnaulati shows that while it might be effective in the research lab, its findings are of limited use for the people's complex, real-world emotional problems. Saving Talk Therapy is a passionate and deeply researched case for in-depth, personally transformative psychotherapy that incorporates the benefits of an evidence-based approach and psychotropic drugs without over-relying on them.

Global Deception Joseph A. Klein, 2005 Harry Truman was a pragmatist who saw in the UN a forum for sovereign, independent nations to iron out their differences. But for globalists, the goal has always been a 'true world government.' This thinking now infests the UN from top to bottom. In this disturbing and timely book, Joe Klein exposes the globalist's true agenda - stripping the US of its independence in order to make the world's only superpower, and its citizens, subservient to the desires and whims of dictators, tyrants and nameless bureaucrats. Having failed to win over US public opinion, globalists are trying to rally world opinion against America while encouraging US courts to turn to international law--as opposed to the Constitution and Bill of Rights - for 'guidance' when making judicial decisions, thus imposing globalism on the US by fiat. Simultaneously, they are weaving a tangled web of treaties and trans-national organizations (like the International Criminal Court and the Kyoto Treaty) to gradually ensnare and destroy our nation. They must be stopped. This is the book to do it.

Die Legende als Kunstform Sabine Narr, 2012-01-13 Sabine Narr erschließt ein Forschungsfeld, das in der französischen Literaturwissenschaft, Literatur- und Mediengeschichte bisher kaum wahrgenommen wurde. Zeitgenössische Kunstprojekte wie die Lichtinstallationen in Chartres oder die Makrophotographien von Kirchenfenstern mit Legendendarstellungen sind Ausdruck eines innovativen, die neuen Medien einbeziehenden Umgangs mit religiöser Kunst und insbesondere mit Legendendarstellungen, der ohne die Entwicklung im 19. Jahrhundert nicht denkbar wäre. In der Literatur des 19. Jahrhunderts wird die Legende zu einer Kunstform erhoben, in deren Mittelpunkt eine Auseinandersetzung mit den anderen Künsten steht.

Cutting-edge Social Media Approaches to Business Education Charles Wankel, 2010-09-01 Our current students are digital natives, born into a world of widespread online sharing. Aligning the technologies we use in our courses with their skills and approaches to collaborative learning is an opportunity we should take. The new media share text, images, audio and video material rapidly and interactively. This volume will provide an overview of these

new social media including Skype, YouTube, Flickr, blogging, LinkedIn, Facebook, and Twitter. Examples and cases of how instructors around the world are meaningfully incorporating them into their management, marketing, and other business courses are provided. One of the more robust trends is the use of three-dimensional immersive virtual world interfaces for teaching and learning. The leading one is Second Life. Examples of the use of Second Life in business courses will be discussed. The use of wikis to foster collaborative development of course related material by learners will be presented with case examples. Faculty members are co-creators of course content with their learners. Among the topics covered is how faculty members can be supported in their deployment of social media projects and course structures. How social media can enable the structuring of course activities involving students, prospective students, alumni, employers, businesspersons, and others in rich sharing and support with each other will be discussed. Indeed seeing courses as networking venues beyond learning forums will be parsed.

Women and Leadership in Higher Education Karen A. Longman, Susan R. Madsen, 2014-09-01 Women and Leadership in Higher Education is the first volume in a new series of books (Women and Leadership: Research, Theory, and Practice) that will be published in upcoming years to inform leadership scholars and practitioners. This book links theory, research, and practice of women's leadership in various higher education contexts and offers suggestions for future leadership development strategies. This volume focuses on the field of higher education, particularly within the context of the United States—a sector that serves a majority of students at all degree levels who are women, yet lacks parity by women in senior leadership roles. The book's fifteen chapters present both hard facts regarding the current demographic realities within higher education and fresh thinking about how progress can and must be made in order for U.S. higher education to benefit from the perspectives of women at the senior leadership table. The book's opening section provides data and analysis in addressing "The State of Women and Leadership in Higher Education"; the second section offers descriptions of three effective models for women's leadership development at the national and institutional levels; the third section draws from recent research to present "Women's Experiences and Contributions in Higher Education Leadership." The book concludes with five shorter chapters written by current and former college and university presidents who offer "Lessons from the Trenches" for the benefit of those who follow. In short, the thesis of the book is that our world is changing; higher education collectively, as well as institutions of all types, must change. Bringing more women into leadership is critical to the goal of moving our society and world forward in healthier ways.

Migration and Remittances Factbook 2016 Dilip Ratha, Christian Eigen-Zucchi, Sonia Plaza, 2016-04-08 Remittances remain a key source of funds for developing countries, far exceeding official development assistance and even foreign direct investment. Remittances have proved to be more stable than private debt and portfolio equity flows, and less volatile than official aid flows, and their annual flow can match or surpass foreign exchange reserves in many small countries. Even in large emerging markets, such as India, remittances are equivalent to at least a quarter of total foreign exchange reserves. India, China, Philippines and Mexico are the top recipients of migrant remittances. The Migration and Remittances Factbook 2016 attempts to present numbers and facts behind the stories of international migration and remittances, drawing on authoritative, publicly available data. It provides a

snapshot of statistics on immigration, emigration, skilled emigration, and remittance flows for 210 countries and 15 regional and income groups. The Migration and Remittances Factbook 2016 updates the 2011 edition of the Factbook with additional data on bilateral migration and remittances and second generation diasporas, collected from various sources, including national censuses, labor force surveys, population registers, and other national sources.

Introduction to Modeling and Control of Internal Combustion Engine Systems Lino Guzzella, Christopher Onder, 2013-03-14 Internal combustion engines still have a potential for substantial improvements, particularly with regard to fuel efficiency and environmental compatibility. These goals can be achieved with help of control systems. Modeling and Control of Internal Combustion Engines (ICE) addresses these issues by offering an introduction to cost-effective model-based control system design for ICE. The primary emphasis is put on the ICE and its auxiliary devices. Mathematical models for these processes are developed in the text and selected feedforward and feedback control problems are discussed. The appendix contains a summary of the most important controller analysis and design methods, and a case study that analyzes a simplified idle-speed control problem. The book is written for students interested in the design of classical and novel ICE control systems.
