Princeton Readings in Islamist Thought Roxanne L. Euben, Muhammad Qasim

Zaman, 2021-06-08 The most authoritative anthology of Islamist texts This anthology of key primary texts provides an unmatched introduction to Islamist political thought from the early twentieth century to the present, and serves as an invaluable guide through the storm of polemic, fear, and confusion that swirls around Islamism today. Roxanne Euben and Muhammad Qasim Zaman gather a broad selection of texts from influential Islamist thinkers and place these figures and their writings in their multifaceted political and historical contexts. The selections presented here in English translation include writings of Ayatollah Khomeini, Usama bin Laden, Muslim Brotherhood founder Hasan al-Banna, and Moroccan Islamist leader Nadia Yassine, as well as the Hamas charter, an interview with a Taliban commander, and the final testament of 9/11 hijacker Muhammad Atta. Illuminating the content and political appeal of Islamist thought, this anthology brings into sharp relief the commonalities in Islamist arguments about gender, democracy, and violence, but it also reveals significant political and theological disagreements among thinkers too often grouped together and dismissed as extremists or terrorists. No other anthology better illustrates the diversity of Islamist thought, the complexity of its intellectual and political contexts, or the variety of ways in which it relates to other intellectual and religious trends in the contemporary Muslim world.

Rise of Islamic Political Movements and Parties Esen Kirdis, 2019-05-09 Although regarded as a single community of Islamists, Islamic political movements utilise vastly different means to pursue their goals. This book examines why some Islamic movements facing the same socio-political structures pursue different political paths, while their counterparts in diverse contexts make similar political choices. Based on qualitative fieldwork involving personal interviews with Islamic politicians, journalists, and ideologues - conducted both before and after the Arab Spring - author Esen KirdiAY draws close comparisons between six Islamic movements in Jordan, Morocco and Turkey. She analyses how some Islamic movements decide to form a political party to run in elections, while their counterparts in the same country reject doing so and instead engage in political activism as a social movement through informal channels. More broadly, the study demonstrates the role of internal factors, ideological priorities and organisational needs in explaining differentiation within Islamic political movements, and discusses its effects on democratisation.

Transportation Decision Making Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's

environmental impact, including air quality, noise, ecology, water resources, and aesthetics. Evaluating alternative projects on the basis of multiple performance criteria. Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals. Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decision making. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

No Estado de São Paulo, o órgão é marcado pela abertura ao diálogo com a sociedade e com as instituições com as quais se relaciona, em razão sobretudo de sua Lei Orgânica. Este livro aborda os fundamentos, as ferramentas e os desafios do acesso à Justiça pela população paulista e grupos vulneráveis no Estado, partindo do exame da Lei Orgânica da Defensoria de São Paulo - tão relevante e paradigmática. Com foco no regime constitucional da instituição - analisando tanto as inovações normativas quanto a jurisprudência dos tribunais superiores sobre elas - esta obra pretende apresentar as mais importantes chaves para a compreensão integral dos princípios e atribuições da Defensoria Pública no país.
