Gary Paul Nabhan

The Department of Labor's ... Findings on the Worst Forms of Child Labor ,2003

Arab/American Gary Paul Nabhan,2008 The landscapes, cultures, and cuisines of deserts in the Middle East and North America have commonalities that have seldom been explored by scientists—and have hardly been celebrated by society at large. Sonoran Desert ecologist Gary Nabhan grew up around Arab grandparents, aunts, uncles, and cousins in a family that has been emigrating to the United States and Mexico from Lebanon for more than a century, and he himself frequently travels to the deserts of the Middle East. In an era when some Arabs and Americans have markedly distanced themselves from one another, Nabhan has been prompted to explore their common ground, historically, ecologically, linguistically, and gastronomically. *Arab/American* is not merely an exploration of his own multicultural roots but also a revelation of the deep cultural linkages between the inhabitants of two of the world's great desert regions. Here, in beautifully crafted essays, Nabhan explores how these seemingly disparate cultures are bound to each other in ways we would never imagine. With an extraordinary ear for language and a truly adventurous palate, Nabhan uncovers surprising convergences between the landscape ecology, ethnogeography, agriculture, and cuisines of the Middle East and the binational Desert Southwest. There are the words and expressions that have moved slowly westward from Syria to Spain and to the New World to become incorporated—faintly but recognizably—into the language of the people of the U.S.–Mexico borderlands. And there are the flavors—piquant mixtures of herbs and spices—that have crept silently across the globe and into our kitchens without our knowing where they came from or how they got here. And there is much, much more. We also learn of others whose work historically spanned these deserts, from Hadji Ali (‘Hi Jolly’), the first Moslem Arab to bring camels to America, to Robert Forbes, an Arizonan who explored the desert oases of the Sahara. These men crossed not only oceans but political and cultural barriers as well. We are, we recognize, builders of walls and borders, but with all the talk of ‘homeland’ today, Nabhan reminds us that, quite often, borders are simply lines drawn in the sand.

Enron and Other Corporate Fiascos Nancy B. Rapoport,Jeffrey D. Van Niel,Bala G. Dharan,2009 This law school text explores the Enron debacle from a variety of different aspects. Essays analyze the business-government interactions and decisions that laid the foundations for Enron's growth and subsequent demise. Other essays describe and detail the complex web of partnerships and accounting tricks used by Enron to hide bad news and project good news. Additional essays focus on the ethical and legal dimensions of the Enron crisis, and the subsequent lessons for business and law students, as well as for society.

Handbook of Nanobiomedical Research Vladimir Torchilin,2014 This book consists of 4 volumes containing about 70 chapters covering all the major aspects of the growing area of nanomedicine. Leading scientists from 15 countries cover all major areas of nanobiomedical research materials for nanomedicine, application of nanomedicine in therapy of various diseases, use of nanomedicines for diagnostic purposes, technology of nanomedicines, and new trends in nanobiomedical research. This is the first detailed handbook specifically addressing various aspects of nanobiomedicine. Readers are treated to cutting-edge research and the newest data from leading researchers in this area. Contents: Materials for Nanomedicine: Liposomal Nanomedicines (Amr S Abu Lila, Tatsuhiro Ishida and Theresa M Allen)Solid Lipid Nanoparticles for Biomedical Applications (Karsten Mader)Micellar Nanopreparations for Medicine (Rupa Sawant and Aditi Jhaveri)Nanoemulsions in Medicine (William B Tucker and Sandro

Managing and Adapting Library Information Services for Future Users Osuigwe, Nkem Ekene, 2019-11-22 Information in today's modernized world has become much more attainable with the use of technology. A resource that has fallen victim to this are library services. What was once a staple of knowledge and communication has failed to keep pace with recent advancements in information service providers. Library practitioners need to learn how to manage change, build influence, and adapt their services to remain relevant within local communities. Libraries can continue to play a key role in future aspects of information provision, but proper research is a necessity. Managing and Adapting Library Information Services for Future Users is a collection of innovative research that encapsulates practices, concepts, ideas, and proposals that would chart pathways for libraries of all types to envision and understand how to thrive and remain relevant in the competitive information provision environment. It is expected to motivate librarians and information scientists to probe further into how libraries would better serve user communities of the 21st century who have options of accessing information from sources other than from libraries. While highlighting topics including artificial intelligence,

human design thinking, and alternative finance, this book is ideally designed for librarians, information specialists, architects, data scientists, researchers, community development practitioners, policymakers, faculty members, and students seeking current research on emerging advancements in library optimization.

The Effectiveness of the Sarbanes-Oxley Act of 2002 in Preventing and Detecting Fraud in Financial Statements Debra DeVay,2006 The collapse of Enron, WorldCom, and other large corporations in 2001 and 2002 motivated Congress to pass the Sarbanes-Oxley Act of 2002 (SOX). The purpose of this legislation was to restore investor confidence in the United States stock markets, and to prevent and detect fraud in financial statements as well. This dissertation examines the effectiveness of SOX for the latter purpose of preventing and detecting fraud, using statistical enforcement data presented by the Securities and Exchange Commission, and financial statement restatement numbers published by the Huron Corporation. The two methodologies utilized to analyze the data were the unpaired t test and the chi square test. Surveys were also emailed to executives and certified public accountants across the country to extract opinions as to the effectiveness of SOX. The statistical analysis results displayed that in 61% to 65% of the data sets, the numbers prior to the enactment of SOX were no different than the numbers subsequent to the enactment of SOX. The majority of the survey respondents feel that the benefits of SOX are not worth the costs, it is not effective in the prevention and detection of fraud in financial statements, and that it should be modified, but not eliminated entirely. While some sentiment exists that SOX is salvageable if revisions are executed, both the quantitative and qualitative analyses indicate support of the null hypothesis, that SOX is not effective in the prevention and detection of fraud in financial statements.

It describes how the various hardware and software components interact in a z/OS data set encryption environment. In addition, this book concentrates on the planning and preparing of the environment and offers implementation, configuration, and operational examples that can be used in z/OS data set encryption environments. This publication is intended for IT architects, system programmer, and security administrators who plan for, deploy, and manage security on the Z platform. The reader is expected to have a basic understanding of IBM Z security concepts.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common

and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Managing Ocean Environments in a Changing Climate Kevin J. Noone,Ussif Rashid Sumaila,Robert J. Diaz,2013-06-29 Managing Ocean Environments in a Changing Climate summarizes the current state of several threats to the global oceans. What distinguishes this book most from previous works is that this book begins with a holistic, global-scale focus for the first several chapters and then provides an example of how this approach can be applied on a regional scale, for the Pacific region. Previous works usually have compiled local studies, which are essentially impossible to properly integrate to the global scale. The editors have engaged leading scientists in a number of areas, such as fisheries and marine ecosystems, ocean chemistry, marine biogeochemical cycling, oceans and climate change, and economics, to examine the threats to the oceans both individually and collectively, provide gross estimates of the economic and societal impacts of these threats, and deliver high-level recommendations. Nominated for a Katerva Award in 2012 in the Economy category State of the science reviews by known marine experts provide a concise, readable presentation written at a level for managers and students Links environmental and economic aspects of ocean threats and provides an economic analysis of action versus inaction Provides recommendations for stakeholders to help stimulate the development of policies that would help move toward sustainable use of marine resources and services

Gateway Frederik Pohl,2010 Wealth . . . or death. Those were the choices Gateway offered. Humans had discovered this artificial spaceport, full of working interstellar ships left behind by the mysterious, vanished Heechee. Their destinations are preprogrammed. They are easy to operate, but impossible to control. Some came back with discoveries which made their intrepid pilots rich; others returned with their remains barely identifiable. It was the ultimate game of Russian roulette, but in this resource-starved future there was no shortage of desperate volunteers.

The Transformation of Social Work Education through Virtual Learning R. Paul Maiden,2019-09-12 Over the past few years, numerous highly ranked, Tier 1 universities across the United States have embraced the development of advanced online degrees, a niche of secondary education long held by a small group of private, for-profit universities. Rapid advances in online learning technology, increasingly sophisticated, and easy to use 'learning management systems' and 'anytime, anywhere access' has dramatically increase the demand of individuals, mostly full time employed, working professionals. This volume addresses the dramatic changes that are occurring in social work pedagogy as more schools develop online programs. The University of Southern California Suzanne Dworak Peck School of Social Work launched their 'Virtual Academic Center' with a cohort of 80 online students. The program has now reached a 'steady state' of 2,200 'virtual' students now representing two thirds of their MSW student population. Additionally, the school launched a doctorate of social work degree with a focus on leading and managing innovation, leading public discourse and management of large complex systems. This book essentially tells the 'USC story' with the challenges faced in embracing this new technology, teaching social work courses in an online environment, as well as pedagogical enhancements

made by faculty in converting traditional campus based courses to the virtual environment.
