Islamist Politics in the Middle East Samer Shehata, 2012-08-06 For over three decades, Islamist politics, or political Islam, has been one of the most dynamic and contentious political forces in the Middle East. Although there is broad consensus on the importance of political Islam, there is far less agreement on its character, the reasons for Islamist's success, the role of Islamist movements in domestic and international affairs, or what these movements portend for the future. This volume addresses a number of central questions in the study of Islamist politics in the Middle East through detailed case studies of some of the region's most important Islamist movements. Chapters by leading scholars in the field examine the Egyptian Muslim Brotherhood, Hamas, Hizbullah, Morocco's Justice and Benevolence, the Jordanian Muslim Brotherhood, the Sunni Insurgency in Iraq and Islamist politics in Turkey and Iran. The topics addressed within this volume include social networks and social welfare provision, Islamist groups as opposition actors, Islamist electoral participation, the intersection of Islam and national liberation struggles, the role of religion in Islamist politics, and Islam and state politics in Iran, among other topics. All of the contributing authors are specialists with deep knowledge of the subject matter who are committed to empirically based research. These scholars take Islamists seriously as modern, sophisticated, and strategic political players. Together, their work captures much of the diversity of Islamist politics in the region and will contribute to the scholarship on a topic that continues to be important for the Middle East and the world.

Livestock and Women's Livelihoods: A Review of the Recent Evidence ,

Suicide and Mental Health Rudy Nydegger, 2014-10-14 Delving into a topic of perennial interest and concern, particularly among teenagers, this important volume addresses the full range of issues related to suicide and suggests ways to help those who struggle. While the risk of suicide is increasing across age groups, the good news is that with timely intervention, most suicides are preventable. Written primarily for high school and college students as well as for their teachers and parents, this guide combines relevant research and theories about suicide with current clinical thinking and approaches to diagnosis and treatment. Going beyond the clinical, the volume also explores suicide in history and in popular culture and examines relevant cultural, religious, moral, and ethical viewpoints. It looks at suicide among various demographic groups, probes psychological motivations and methods used, and discusses the controversy surrounding a person's right to die. What differentiates this work from others is that it covers the breadth of the subject but also considers issues in enough depth to make their importance and complexity clear. Readers will better understand the problem of suicide, its impact, and the approaches that can be used to prevent suicide and deal more effectively with at-risk individuals.

Policy Design in the European Union Risto Heiskala, Jari Aro, 2018-01-24 This edited collection addresses a paradox at the heart of the European Union: if it is a constantly enlarging empire of governance, how can almost thirty member states design policies as an administrative whole, whilst narrowly approaching all political issues from one economic point of view? The contributors to this collection approach this by studying knowledge production, policy formation and policy implementation in the union. The topics covered include the history of the union, its nature as an empire in the making compared to historical successors as well as current USA and China, formation of union level statistical data and policy documents, paradoxes of fiscal governance, social innovation policy, youth and education policy, energy policy and foreign policy with particular regard to Russia. The concluding chapter outlines five alternative future scenarios for the union extending from collapse and marginalization to the emergence of a federal empire. The book is essential reading for anybody interested in the EU, including students and scholars across a range of disciplines, including sociology, political science,

international relations, economics, management studies, public and social policy, science and technology studies, and environmental policy.

Gender in Agriculture Agnes R. Quisumbing, Ruth Meinzen-Dick, Terri L. Raney, André Croppenstedt, Julia A. Behrman, Amber Peterman, 2014-04-29 The Food and Agriculture Organization of the United Nations (FAO) produced a 2011 report on women in agriculture with a clear and urgent message: agriculture underperforms because half of all farmers—women—lack equal access to the resources and opportunities they need to be more productive. This book builds on the report's conclusions by providing, for a non-specialist audience, a compendium of what we know now about gender gaps in agriculture.

Victimology William G. Doerner, Steven P. Lab, 2014-04-29 Victimology, 7th Edition, introduces students to the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Lab provide a fresh look at the theoretical basis of victimology and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community. This new edition brings forward the theoretical foundation of victimology into Part 1 to establish a clear conceptual framework and reduce repetition. Emerging trends in the field receive greater emphasis in this edition, including non-adversarial resolution options that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in the work or school environment continue to take a toll, and the authors examine efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims and to develop improved approaches to this costly social issue. Online supplements are available for both professors and students. This breakthrough work provides an organizing structure for the history and current state of the field of victimology, and outlines the reasons compelling a

separate focus on crime victims. Highly readable, *Victimology* explores the role of victimology in today's criminal justice system, examining the consequences of victimization and the various remedies now available for victims. A new chapter covers the important implications of restorative justice. The text is supplemented by illustrative figures and tables as well as learning objectives, key terms and a listing of related Internet sites.

The Empathy Gap William Collins, 2021 From the ebook Preface: This book majors on the presentation of empirical evidence in the form of data. The most digestible form for communicating such material is through the use of Tables and Figures, generally graphs. Consequently, the book has a great many Tables and Figures and the latter are often in colour. Viewing on a device capable of rendering colours is therefore recommended although monochrome will be adequate in most cases. The Empathy Gap proposes the thesis that men and boys are extensively disadvantaged across many areas of life, including in education, healthcare, genital integrity, criminal justice, domestic abuse, working hours, taxation, pensions, paternity, homelessness, suicide, sexual offences, and access to their own children after parental separation. The claim is justified in the book by empirical evidence, mostly but not exclusively from the UK, involving nearly 1,000 references, 179 Figures and 49 Tables. To most people, of both sexes, this will appear to be a perverse perspective as disadvantage has become the province of women, girls and minorities, not males. Yet the empirical case supporting the disadvantages suffered by men and boys is undeniable to the objective mind. But if this is so, why is the popular perception that males are privileged whereas disadvantage is the province of the opposite sex? Why do the male disadvantages go largely unremarked, by both sexes, if they are so pervasive? Presenting the case for widespread and substantial male disadvantage is also a challenge to the usual hegemonic paradigm of feminist theory. These issues are addressed within *The Empathy Gap* by presenting an entirely different orientation on the social psychology of relations between the sexes. Out goes the idea of an oppressive patriarchy. Instead, a man's participation in the human pair bond is seen to be altruistic, a phenomenon arising originally from evolution and enacted in the individual via the emotional psyche. This is the origin of an asymmetry in the perception of the sexes which normalises the preferencing of females and therefore inevitably disadvantages males as a corollary. The successful evolved strategy involves male utility and relative male disposability, the latter being facilitated by a muted empathy for males, by both sexes - the empathy gap. Rather than working to overcome this male disposability, as a true egalitarian movement would have done, feminism has fed upon it and amplified it. The feminist project relies upon the true state of affairs remaining unacknowledged, and the empathy gap is instrumental in its own invisibility. In respect of this theory, the author makes no claim for originality. The ideas presented have been circulating within the sub-culture for decades. However, the focus of the book is to show how these ideas are manifest in practice.
