The US Foreign Policy in the Horn of Africa Rachid Mohamed Youssouf,2023-04-15 From the historical perspective, the Cold War can be regarded as an extension and continuation of colonialism via different means. The tools and methods that the superpowers, as well as local allies used, were in many ways similar to those desired during the last stage of European colonialism: gigantic economic and social projects, the promises of progress and modernization to the supporters, and almost death to the opponents or those who dare to step on the way of progress. The tragedy of the history of the Cold War in general and of the Cold War in the countries of the Third World, in particular, showed that two historical projects were originally anti-colonial, however, at last, they became the part of significantly older domination patter, due to intensity and severity of the confrontation, as well as the high stakes they considered were involved and practically apocalyptic fear of the situation when the opponent wins. In other words, even though both Soviet Union and the United States opposed colonialism and its reflections, they practically did the same in their own version of modernity, like their predecessors (for instance, France and Britain with their colonial projects of the 19th and 20th centuries). These methods were focused on implementing ecological, demographic, and cultural change in the societies of the Third World while utilizing military power to defeat the states that dare to resist. ABOUT THE AUTHOR MOHAMED YOUSOUF Rachid, was born on a grey morning under the blazing sun of a hot summer in Djibouti city in 1990. Animator, investigative journalist, essayist of the new independent media of the Horn of Africa called The Voice of Djibouti (LVD), the author has a passion for the issue of foreign policy, authors and historians of the Horn of Africa and began his socio-political commitment very early thanks to these different courses and his tours in West Africa. Greatly interested in the world of literature, foreign civilization and international relations, the Djiboutian enarque is guided by his pen through which he tries to rediscover the history of the Horn of Africa; the issue of geopolitics, post-colonial recomposition and the reconquest of Islam in these lost territories. Animator of political programs, former head of programming, much sought after by international or regional media such as “bbc, voa” ...

Communicating Science Toss Gascoigne,Bernard Schiele,Joan Leach,Michelle Riedlinger,Luisa Massarani,Bruce V. Lewenstein,Peter Broks,2020-09-14 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? Communicating Science describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.

World Drug Report 2008 United Nations Office on Drugs and Crime,2008-06-26 The Report continues to provide in
depth trend analysis of the four main drug markets in its first section. In addition, to mark the one hundred year
anniversary of the Shanghai Opium Commission, and one hundred years of international drug control, the Report
contains an in-depth look at the development of the international drug control system. The Report also contains a
small statistical annex which provides a detailed look at production, prices and consumption. As in previous
years, the present Report is based on data obtained primarily from the annual reports questionnaire (ARQ) sent by
Governments to UNODC in 2007, supplemented by other sources when necessary and where available. Two of the main
limitations herein are: (i) that ARQ reporting is not systematic enough, both in terms of number of countries
responding and of content, and (ii) that most countries lack the adequate monitoring systems required to produce
reliable, comprehensive and internationally comparable data. National monitoring systems are, however, improving
and UNODC has contributed to this process.

Using International Law in Domestic Courts Shaheed Fatima QC,2005-10-04 International law is increasingly
referred to and utilised in English courts,in fields as diverse as criminal proceedings, children's rights, tort
law, and asylum cases. Despite this use, there is currently no book on the market (whether a practitioner text or
otherwise) which addresses this subject-matter in detail. Hence the need for this book - by a practitioner and for
practitioners, regardless of their specialist area of practice - on how international law is and can be used in
the domestic courts. The book presents in a distilled format the relevant principles of law, and their application
in this area and provides a guide to relevant international instruments and the way(s) in which these instruments
have been referred to or used in English courts. While the emphasis is on stating the law as it is, the author
also identifies the principles which are likely to guide practitioners in an otherwise unstructured area,
supported by specific examples which will provide a subject guide to relevant instruments and sources and how they
can be used.
