Antonia Augusta Nikos Kokkinos,1992 Nikos Kokkinos presents a portrait of the most influential Roman matron of her time - the daughter of Mark Antony and the great-grandmother of Nero. In addition to being pivotal to the political shifts of the Empire, Antonia was strongly involved in many aspects of business life, and thus her career has an important bearing on contemporary perceptions of the position of Roman women. Marshalling many diverse archaeological source materials, the author has produced a book which places Antonia firmly in the social context of her day.

**Report of the Expert Consultation on the Assessment of Socio-economic Impacts of Aquaculture** Food and Agriculture Organization of the United Nations,2008 The Expert Consultation on the Assessment of Socio-economic Impacts of Aquaculture was held in Ankara, Turkey, from 4 to 8 February 2008. It identified the many positive and negative impacts of aquaculture with their far-reaching socio economic implications. While they agreed that multi-criteria decision-making (MCDM) framework using analytical hierarchy process (AHP) as a measurement technique is a suitable method for assessing socio-economic impacts of aquaculture, experts recognized that other methods such as the costs benefits analysis (CBA) could also be used depending on circumstances. They recommended that case studies be carried out in a certain number of developed and developing countries on assessing the socio-economic impacts of aquaculture using AHP, CBA and another technique in order to test and compare the applicability and results of these methods. They also suggested developing a user guide on the implementation of these methods and build capacity in developing countries in using them, and identified other needs for future work in socio-economics of aquaculture.

ASEAN and India-ASEAN Relations M. Mayilvaganan,2021-11-30 This book analyses the nearly 30 years of India-ASEAN relations from a contemporary perspective, identifies the reasons for India's vibrant and significant relation with ASEAN and examines the cultural, economic, political and strategic linkages between India and ASEAN. The book projects the future of India-ASEAN relations in the face of the changing Indo-Pacific geopolitics and explores potential policies which could enhance the connection between India and Southeast Asian countries. Arguing that ASEAN is of primary importance to India, the book suggests that any successful outing in the Indo-Pacific would need a strong partnership with India. The book demonstrates how external powers influence ASEAN, with many of them supporting the centrality of ASEAN and its regional architecture in the broader Indo-Pacific. Chapters by experts in their fields present thematically specific analyses of political, defence, maritime and cultural aspects as well as the position of Northeast India in the India-ASEAN relations and assess the success and challenges of India's ties with ASEAN in the context of the Look East and the Act East Policies. A reassessment of ASEAN-India relations past and present, this book will be of interest to academics and policy makers working in the field of International Relations, Asian Politics and South Asian Politics, in particular India's Foreign Policy and Southeast Asian Politics.

*Bioactive Food as Dietary Interventions for Cardiovascular Disease* Ronald Ross Watson,Victor R. Preedy,2012-10-22 One major example of the synergy of bioactive foods and extracts is their role as an antioxidant and the related remediation of cardiovascular disease. There is compelling evidence to suggest that oxidative stress is implicated in the physiology of several major cardiovascular diseases including heart failure and increased free radical formation and reduced antioxidant defences. Studies indicate bioactive foods reduce the incidence of these conditions, suggestive of a potential cardioprotective role of antioxidant nutrients. Bioactive Food as Dietary Interventions for Cardiovascular Disease investigates the role of foods, herbs and novel extracts in moderating the pathology leading to cardiovascular disease. It reviews existing literature, and presents new hypotheses and conclusions on the effects of different bioactive components of the diet. Addresses the most positive results from dietary interventions using bioactive foods to impact cardiovascular disease Documents foods that can affect metabolic syndrome and other related conditions Convenient, efficient and effective source that allows readers to identify potential uses of compounds - or indicate those compounds whose use may be of little or no health benefit Associated information can be used to understand other diseases that share common etiological pathways

**Climate Change and Food Security in Asia Pacific** Md Saidul Islam,Edson Kieu,2021-04-01 Using an interdisciplinary approach, this book evaluates the complex nexus between climate change and regional food security in Asia Pacific. Feeding the planet puts a lot of stress on the environment. The fundamental challenges we are facing today include how to grow more from less in a sustainable manner; how to optimize the entire food value chain from field to fork to reduce the carbon footprint, protect the environment and support biological diversity, cause less water pollution and soil erosion, raise levels of nutrition, improve agricultural productivity, better the lives of rural populations and contribute to the growth of the world economy. With a robust multi-site study in Southeast Asia, Pacific Island Forum and South Asia, this book examines the regional initiatives on, the current state of, and the future prospects for mitigations and resilience regarding climate change and food security vis-à-vis other regions of the world.

The Draft UNCITRAL Digest and Beyond Franco Ferrari,Harry Flechtner,Ronald A. Brand,2003-01-01 "The Draft UNCITRAL Digest and Beyond" is one of the most useful single volumes available on the CISG. It includes the full text of the draft "UNCITRAL Digest" which catalogues the cases and arbitral awards to date that have interpreted and applied the CISG on an article by article basis. "The Digest and Beyond" includes also commentary by eminent CISG scholars that addresses issues not yet considered in the cases. With more than 1000 decisions applying the CISG in courts and arbitral tribunals around the world, the UNCITRAL Secretariat charged five CISG experts from a variety of regions with the task of creating a digest of CISG case law. "The Digest and Beyond" includes the draft "UNCITRAL Digest", even before it is released officially by UNCITRAL. It also goes where the authors of the Digest were not allowed to go, given the narrow mandate within which the drafters were asked to work. Its chapters build upon the work of the "UNCITRAL Digest". The Digest describes the reasoning and results of existing CISG cases; in "The Digest and Beyond", the Digest authors analyze those cases, and discuss issues that have not yet arisen in the case law. Thus, in many ways, "The Digest and Beyond" provides scholarship that can direct future cases in areas that have not yet been considered by courts and arbitrators as well as in areas in which contradictory court decisions exist.

**Just Food** James E. McWilliams,2009-08-26 We suffer today from food anxiety, bombarded as we are with confusing messages about how to eat an ethical diet. Should we eat locally? Is organic really better for the environment? Can genetically modified foods be good for you? JUST FOOD does for fresh food what Fast Food Nation (Houghton Mifflin, 2001) did for fast food, challenging conventional views, and cutting through layers of myth and misinformation. For instance, an imported tomato is more energy-efficient

than a local greenhouse-grown tomato. And farm-raised freshwater fish may soon be the most sustainable source of protein. Informative and surprising, JUST FOOD tells us how to decide what to eat, and how our choices can help save the planet and feed the world.

**Food, Animals, and the Environment** Christopher Schlottmann, Jeff Sebo, 2018-09-14 Food, Animals, and the Environment: An Ethical Approach examines some of the main impacts that agriculture has on humans, nonhumans, and the environment, as well as some of the main questions that these impacts raise for the ethics of food production, consumption, and activism. Agriculture is having a lasting effect on this planet. Some forms of agriculture are especially harmful. For example, industrial animal agriculture kills 100+ billion animals per year; consumes vast amounts of land, water, and energy; and produces vast amounts of waste, pollution, and greenhouse gas emissions. Other forms, such as local, organic, and plant-based food, have many benefits, but they also have many costs, especially at scale. These impacts raise difficult ethical questions. What do we owe animals, plants, species, and ecosystems? What do we owe people in other nations and future generations? What are the ethics of risk, uncertainty, and collective harm? What is the meaning and value of natural food in a world reshaped by human activity? What are the ethics of supporting harmful industries when less harmful alternatives are available? What are the ethics of resisting harmful industries through activism, advocacy, and philanthropy? The discussion ranges over cutting-edge topics such as effective altruism, abolition and regulation, revolution and reform, individual and structural change, single-issue and multi-issue activism, and legal and illegal activism. This unique and accessible text is ideal for teachers, students, and anyone else interested in serious examination of one of the most complex and important moral problems of our time.

**Migração e Crime** Ronaldo Pereira Soares, 2023-05-02 A Escola de Chicago inaugurou uma nova fase na Criminologia e despertou a discussão do crime a partir do estudo do espaço urbano. Chicago, nas primeiras décadas do século XX, foi um grande laboratório para os sociólogos que deixaram como legado fantásticos estudos como: a Teoria da associação diferencial e White-collar crime (crime do colarinho branco) de Sutherland, e a Teoria das Zonas Concêntricas de Burgess. Nesta obra, o autor mergulha em uma fascinante pesquisa de campo junto a uma comunidade de migrantes nordestinos na cidade de Itaberaí, no interior de Goiás, onde desvenda os problemas do espaço urbano desorganizado e os desafios para a rede de proteção social local, numa contextualização esplendida das teorias da Escola de Chicago, em especial a Ecologia Humana, de Robert Park, autor de: A cidade: sugestões para a investigação do comportamento humano no ambiente urbano (1915), A migração humana e o homem marginal (1928) e A cidade como laboratório social (1929). O desafio é discutir os mesmos problemas enfrentados pela escola de Chicago, um século depois, em um contexto que vai muito além das metrópoles, mas que guarda os mesmos desafios. O drama real da população migrante e as dificuldades enfrentadas pelo poder público na proteção social das comunidades são os componentes desta obra. A boa leitura deste livro levará à reflexão sobre a importância do planejamento das cidades e da boa prática nas políticas públicas voltadas às comunidades urbanas.

**Global Civil Society in International Lawmaking and Global Governance** Barbara Woodward, 2010-05-17 Drawing upon 'global governance,' 'global civil society' (GCS) and 'international lawmaking' scholarship and presenting studies of GCS practice in international lawmaking processes, including treaty-making, conferences, international organisations and adjudicatory mechanisms, this book comprehensively re-evaluates GCS's role in public international lawmaking.

**An Obedient Father** Akhil Sharma, 2022-07-12 Revised and featuring a new foreword by the author, this uncompromising novel returns, more powerful than ever: A portrait of a country ravaged by vendetta and graft, its public spaces loud with the complaints of religious bigots and its private spaces cradling unspeakable pain. (Hilary Mantel, New York Review of Books) An Obedient Father introduced one of the most admired voices in contemporary fiction. Set in Delhi in the 1990s, it tells the story of an inept bureaucrat enmired in corruption, and of the daughter who alone knows the true depth of his crimes. Decried in India for its frank treatment of child abuse, the novel was widely praised elsewhere for its compassion, and for a plot that mingled the domestic with the political, tragedy with farce. Yet, as Akhil Sharma writes in his foreword to this new edition, he was haunted by what he considered shortcomings within the book: almost twenty years later, he returned to face them. Here is the result, a leaner, surer version with even greater power.
