Clinical Trial Methodology Karl E. Peace, Ding-Geng (Din) Chen, 2010-07-20 Now viewed as its own scientific discipline, clinical trial methodology encompasses the methods required for the protection of participants in a clinical trial and the methods necessary to provide a valid inference about the objective of the trial. Drawing from the authors' courses on the subject as well as the first author's more than 30 years working in the pharmaceutical industry, *Clinical Trial Methodology* emphasizes the importance of statistical thinking in clinical research and presents the methodology as a key component of clinical research. From ethical issues and sample size considerations to adaptive design procedures and statistical analysis, the book first covers the methodology that spans every clinical trial regardless of the area of application. Crucial to the generic drug industry, bioequivalence clinical trials are then discussed. The authors describe a parallel bioequivalence clinical trial of six formulations incorporating group sequential procedures that permit sample size re-estimation. The final chapters incorporate real-world case studies of clinical trials from the authors' own experiences. These examples include a landmark Phase III clinical trial involving the treatment of duodenal ulcers and Phase III clinical trials that contributed to the first drug approved for the treatment of Alzheimer's disease. Aided by the U.S. FDA, the U.S. National Institutes of Health, the pharmaceutical industry, and academia, the area of clinical trial methodology has evolved over the last six decades into a scientific discipline. This guide explores the processes essential for developing and conducting a quality clinical trial protocol and providing quality data collection, biostatistical analyses, and a clinical study report, all while maintaining the highest standards of ethics and excellence.

Breaking the Bombers Mark Shaw, 2023-09-18 'Mark Shaw is the foremost analyst of

organised crime in SA.' – Jonny Steinberg At the dawn of the country's brave new democracy, Cape Town was at war. Pagad, which began as a community protest action against crime, had mutated into a sinister vigilante group wreaking death and destruction across the city. Between 1996 and 2001, there were hundreds of bomb blasts – most infamously at the Planet Hollywood restaurant at the V&A Waterfront – and countless targeted hits on druglords and gang bosses. The police scrambled desperately to respond. The new ANC government was shaken. Citizens of Cape Town lived in fear. Who could save the city? Mark Shaw tells the incredible tale of how former foes – struggle cadres and the apartheid security apparatus – pulled together to break the Pagad death squads. Out of this crisis emerged the elite law enforcement unit, the Scorpions. It is a story that has never been told in full. Now many involved have broken their silence about this pivotal chapter in South Africa's history, which offers far-reaching lessons on how to deal with organised crime today.
