**Think Bayes** Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

*Modelling, Simulation and Applications of Complex Systems* Mohd Hafiz Mohd,Md Yushalify

Misro,Syakila Ahmad,Doanh Nguyen Ngoc,2021-06-10 This book discusses the latest progresses and developments on complex systems research and intends to give an exposure to prospective readers about the theoretical and practical aspects of mathematical modelling, numerical simulation and agent-based modelling frameworks. The main purpose of this book is to emphasize a unified approach to complex systems analysis, which goes beyond to examine complicated phenomena of numerous real-life systems; this is done by investigating a huge number of components that interact with each other at different (microscopic and macroscopic) scales; new insights and emergent collective behaviours can evolve from the interactions between individual components and also with their environments. These tools and concepts permit us to better understand the patterns of various real-life systems and help us to comprehend the mechanisms behind which distinct factors shaping some complex systems phenomena being influenced. This book is published in conjunction with the International Workshop on Complex Systems Modelling & Simulation 2019 (CoSMoS 2019): IoT & Big Data Integration. This international event was held at the Universiti Sains Malaysia Main Campus, Penang, Malaysia, from 8 to 11 April 2019. This book appeals to readers interested in complex systems research and other related areas such as mathematical modelling, numerical simulation and agent-based modelling frameworks.

*China's Finance in Africa* Evelyn F. Wamboye,2021-03-04 This Element provides a detailed analysis of official finances from China to Africa with special attention to the question of Africa's foreign finances policy. The findings reveal that Africa has an infrastructure gap and Chinese finances are largely used to fund infrastructure projects. However, the majority of the funds are loans, which are mortgaged on Africa's natural resources. In addition, Chinese firms are the ones implementing the projects, and much of the raw material and labor is imported from China. All these calls for Africa to institute a coherent foreign finances policy that ensures African countries fully benefit from these finances.

**Luftwaffe Secret Projects** Dieter Herwig,Heinz Rode,2003 8= x 11 150 b&w photos 110 color illustrations The two previous volumes in this hugely popular series have covered Fighters 1939-1945 and Strategic Bombers 1935-1945. This new addition takes a close look at a varied range of aircraft types, principally described as ground-attack and special-purpose types, but which includes Kampferstvrer (multi-purpose combat aircraft), multi-purpose and fast bombers, explosive-carrying aircraft intended to attack other aircraft, air-to-air ramming vehicles, bomb-carrying gliders and towed fighters, and airborne weapons and special devices (rockets, cannons, flame-throwers, etc.) As in the first two volumes, the technical descriptions and histories of about 140 aircraft types are brought to life by many specially created full-color artworks, showing the projects, often in unit markings, as they might have appeared if they had come to fruition and/or if the war had continued beyond 1945. This series has proven indispensable for historians and notably for modelers, whose imaginations are fired up by these revelations.

*Strategies and Tools for a Sustainable Rural Rio de Janeiro* Udo Nehren,Sabine Schlüter,Claudia Raedig,Dietmar Sattler,Helga Hissa,2018-08-16 This book is a compilation of recent developments in land, ecosystem, and water management in the Brazilian state of Rio de Janeiro. The state is located in the biodiversity hotspot of the Atlantic Forest (Mata Atlântica), a biome characterized by high biological diversity and endemism. At the same time the state of Rio de Janeiro emerged to one of the economic hubs in Latin America. This development process has been accompanied by population growth, industrialization, urbanization, as well as consumption and degradation of land and water resources. In the past years many efforts have been made to stop or at least slow down these degradation processes and restore degraded environments with the overall goal to bring together sustainable management of natural resources, nature conservation, and economic development. An overview is provided of the different strategies and tools that have been developed in the fields of agriculture, ecosystem management and biodiversity, integrated water management, land restoration, disaster risk reduction and climate change adaptation, as well as environmental governance and economic instruments. This book covers a wide spectrum from applied research to science-policy interfaces, planning concepts, and technical tools and has a model character for other

rural areas in Latin America. Target groups are scientists, practitioners, policy makers and graduate students in the field of environmental management. The different chapters are written by researchers and practitioners of the German-Brazilian project INTECRAL (Integrated Eco Technologies and Services for a Sustainable Rural Rio de Janeiro), the rural development program Rio Rural under the state secretary for agriculture and animal husbandry, as well as invited scientists from Brazilian universities and research institutes. It bridges existing gaps between science, policies, and practice in rural development.

*Cases on Challenges Facing E-Learning and National Development* Ugur Demiray, 2010 E-Learning offers many opportunities for individuals and institutions all over the world. Individuals can access to education they need almost anytime and anywhere they are ready to. Institutions are able to provide more cost-effective training to their employees. E-learning context is very important. It is common to find educators who perceive e-learning as internet-only education that encourages a static and content-focused series of text pages on screen. Others envisage the shallow and random online messages that are typical of a social real-time chat session, and wonder how that type of communication could add any value to academic discourse. Some may have experienced e-learning done poorly, and extrapolate their experience into a negative impression of all e-learning. The book will examine the emergence and growth of e-learning. The use of the e prefix indicates the application of information and communication technology (ICT) in government, finance, and all forms of socio-economic and community development. This eBook is designed and presented in two volumes. The first volume consists of the country cases of Algeria, Belarus, Bulgaria, Egypt, Estonia, Finland, Greece, Jordan, Hungary, Iraq, Iran, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, and Morocco. DB2 UDB for Z/OS Paolo Bruni, 2005 Conducting business via the Web and remaining open for business 24 hours a day, seven days a week is now commonplace. Customers come in with

unexpected workloads through the Web and operate in a self-service fashion with mostly context-sensitive metadata to guide them. The strong requirement is availability. However, even with new Web applications, most of the core business systems considerations still apply, and performance is critical. Technology has been accelerating for mainframe systems. They had become adept at providing business resiliency accommodating strategic software that has been around for the last several decades such as IMSTM , DB2® , and CICS® , and they have also become a host for developing and running Web applications built in Java™ accommodating the latest business requirements. Businesses need to leverage, extend and integrate the strategic assets which represent multi-year investments to support leading edge technology. DB2 for z/OS® has come a long way and provides facilities to exploit the latest hardware and software technologies, accommodating a majority of user requirements. However, special considerations are required to build high performance applications. If you want to achieve high performance or high availability, you must use the design, programming, and operational techniques applicable to DB2. In this IBM Redbooks publication we discuss many of these techniques and provide guidelines for database and application design. We expect the best practices described in this book will help DB2 professionals design high-performance and high-availability applications. Please note that the additional material referenced in the text is not available from IBM.

**The Trillion-Dollar Conspiracy** Jim Marrs, 2011-07-05 America's economy is in shambles . . . Its citizens are terrified and dissatisfied . . . Could it all have been planned by a secret elite one hundred years ago? The New World Order. Hitler referred to it in his diaries. President George H. W. Bush foretold of it in his speeches. Formed by a secretive global elite, the group seeking this new order has taken hold of the nation—and perhaps the world. Its influence pervades every aspect of American society, from the products we buy at the grocery store to the topics of evening news programs. But could it also be true that the New World Order caused one of the greatest financial catastrophes of our time? Bestselling author and legendary conspiracy researcher Jim Marrs has yet again exposed information that the mainstream corporate media has refused to report, unearthing the lies to expose the insidious alliances that make up a secret world. In the explosive *The Trillion-Dollar Conspiracy*, Marrs digs beneath the media noise surrounding the financial bailouts of 2008 and 2009 while exploring the back rooms and shadowy deals of our nation's past to craft a frightening history that no one else is brave enough to tell.

*Leadership of Chinese Private Enterprises* Anne S. Tsui, Yingying Zhang, Xiao-Ping Chen, 2016-09-11 This original book presents in-depth research into thirteen successful Chinese private enterprises through interviews with their founder-entrepreneurs. While Chinese economic growth has focused primarily on governmental policies and institutional factors, *Leadership of Chinese Private Enterprises* proposes that the success of these firms was primarily due to the 'visible hands' of these entrepreneurs. The authors present insights into the managerial realities of four separate industries- Financial and insurance, IT and e-commerce, construction and real estate, and consumer goods. Through a critical evaluation of interviews, this book identifies the managerial recipe for entrepreneurial success in competitive and inhospitable environments and offers a model of private firm leadership and leadership principles that guide their strategies and relationships.
