IBM System p5 Approaches to 24x7 Availability Including AIX 5L Scott

Vetter, Bruno Blanchard, Steve Edwards, Brad Gough, Hans Mozes, IBM Redbooks, 2006-08-28

This IBM Redbooks publication focuses on the technology, serviceability, and features that are used by the IBM eServer p5 and IBM System p5 servers, which allow you to make your server one of the most reliable and available parts of your IT infrastructure. This book explains how the server availability can be improved by: - Proper planning of the server environment and configuration - Understanding the role of the service processors and firmware components, and how they can be best configured and managed - Using high availability and redundancy features provided by the AIX 5L operating system and the Virtual IO server This book contains many detailed examples and step-by-step scenarios of usual server operation and maintenance tasks, such as the setup of redundant HMC and service processors, firmware upgrades, hot-addition of RIO drawers, or configuration of redundant Virtual IO servers. This book is intended for architects, specialists, and system administrators who are responsible for planning or developing an availability strategy for IBM System p servers.

Disaster Resilience National Academies, Policy and Global Affairs, Committee on Science, Engineering, and Public Policy, Committee on Increasing National Resilience to Hazards and Disasters, 2012-12-29 No person or place is immune from disasters or disaster-related losses. Infectious disease outbreaks, acts of terrorism, social unrest, or financial disasters in addition to natural hazards can all lead to large-scale consequences for the nation and its communities. Communities and the nation thus face difficult fiscal, social, cultural, and

environmental choices about the best ways to ensure basic security and quality of life against hazards, deliberate attacks, and disasters. Beyond the unquantifiable costs of injury and loss of life from disasters, statistics for 2011 alone indicate economic damages from natural disasters in the United States exceeded \$55 billion, with 14 events costing more than a billion dollars in damages each. One way to reduce the impacts of disasters on the nation and its communities is to invest in enhancing resilience-the ability to prepare and plan for, absorb, recover from and more successfully adapt to adverse events. Disaster Resilience: A National Imperative addresses the broad issue of increasing the nation's resilience to disasters. This book defines national resilience, describes the state of knowledge about resilience to hazards and disasters, and frames the main issues related to increasing resilience in the United States. It also provide goals, baseline conditions, or performance metrics for national resilience and outlines additional information, data, gaps, and/or obstacles that need to be addressed to increase the nation's resilience to disasters. Additionally, the book's authoring committee makes recommendations about the necessary approaches to elevate national resilience to disasters in the United States. Enhanced resilience allows better anticipation of disasters and better planning to reduce disaster losses-rather than waiting for an event to occur and paying for it afterward. Disaster Resilience confronts the topic of how to increase the nation's resilience to disasters through a vision of the characteristics of a resilient nation in the year 2030. Increasing disaster resilience is an imperative that requires the collective will of the nation and its communities. Although disasters will continue to occur, actions that move the nation from reactive approaches to disasters to a proactive stance where communities actively engage

in enhancing resilience will reduce many of the broad societal and economic burdens that disasters can cause.

Handbook of Feminist Research Sharlene Nagy Hesse-Biber, 2012 The second edition of the Handbook of Feminist Research: Theory and Praxis, presents both a theoretical and practical approach to conducting social science research on, for, and about women. The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies, methodologies, and methods that have had a significant impact on feminist research practice and women's studies scholarship. The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible. It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change. It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology, methodology and method. The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change.

Catalysis for Renewables Gabriele Centi, Rutger A. van Santen, 2008-01-08 With its focus on catalysis and addressing two very hot and timely topics with significant implications for our future lives, this will be a white book in the field. The authority behind this practical work is the IDECAT Network of Excellence, and the authors here outline how the use of catalysis will promote the more extensive use of renewable feedstocks in chemical and energy production. They present the latest applications, their applicability and results,

making this a ready reference for researchers and engineers working in catalysis, chemistry, and industrial processes wishing to analyze options, outlooks and opportunities in the field.

Clinical Child Psychiatry William M. Klykylo, Jerald Kay, 2006-01-04 Clinical Child Psychiatry, Second Edition is the successor of the successful textbook edited by Drs Klykylo and Kay in 1998. This book comprises a textbook of current clinical practice in child and adolescent psychiatry. It is midway in size between the small handbooks that provide mainly a list of disorders and treatments, and the large, often multi-volume texts that are comprehensive but not easily accessible.

Two Decades of Basic Education in Rural China Lu Wang, Keith Lewin, 2016-09-14 This book examines how educational change has progressed in three contrasting areas spread across China since 1990, exploring key issues concerning rural education in poor, rich and minority areas. Of the three areas covered in this book, the first is a rich one near Beijing; the second is in the northwest in Shanxi on the Loess plateau; and the third is in Sichuan on the high plateau leading to Tibet. Central issues include the impact of large-scale demographic change and migration, with increasing numbers of left-behind children in sending areas, and large increases in the numbers of inbound migrants in receiving areas; dramatic increases in the boarding of children in rural areas as a result of rural school merge; changing patterns of teacher deployment; recentralization of responsibilities for school financing; and growing concerns regarding horizontal and vertical inequalities in

both access and participation.

Strategies for Work Zone Transportation Management Plans Leverson Boodlal, Dileep Garimella, Kevin Chiang, Steven Dale Schrock, Eric John Fitzsimmons, 2020 One of the ways a state department of transportation or other transportation agency can address work zone safety and other impacts is to develop and implement a Transportation Management Plan (TMP). The TRB National Cooperative Highway Research Program's NCHRP Research Report 945: Strategies for Work Zone Transportation Management Plans provides a practitioner-ready guidebook on how to select and implement strategies that improve safety and traffic operations in roadway construction work zones. Supplemental materials to the report include NCHRP Web-Only Document 276: Evaluating Strategies for Work Zone Transportation Management Plans; fact sheets on ramp meter, reversible lane, and truck restrictions; and guidebook appendices.

The Green New Deal Benjamin Zycher, 2019-04-22 The Green New Deal (GND) represents a massive increase in the power of government over the ability of individuals and businesses to use their resources in ways that they deem appropriate. Yet despite its purported goal of limiting future temperature increases by drastically reducing greenhouse gas emissions, it will likely have no measurable impact on temperatures. At its core, the GND is the substitution of central planning in place of market forces for resource allocation, specifically in the US energy and transportation sectors and more broadly in the broad industrial, business, and housing sectors. A GND policy would yield no benefits in its central energy, environment, and climate context, but it would impose large economic costs.

Made to Stick Chip Heath, Dan Heath, 2007-01-02 NEW YORK TIMES BESTSELLER • The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. “Anyone interested in influencing others—to buy, to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book.”—The Washington Post Mark Twain once observed, “A lie can get halfway around the world before the truth can even get its boots on.” His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make them “stick.” In *Made to Stick*, Chip and Dan Heath reveal the anatomy of ideas that stick and explain ways to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous “kidney theft ring” hoax to a coach’s lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. *Made to Stick* will transform the way you communicate. It’s a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, *Made to Stick* shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.

Relict Species Jan Christian Habel, Thorsten Assmann, 2009-12-03 Mankind has

evolved both genetically and culturally to become a most successful and dominant species. But we are now so numerous and our technology is so powerful that we are having major effects on the planet, its environment, and the biosphere. For some years prophets have warned of the possible detrimental consequences of our activities, such as pollution, deforestation, and overfishing, and recently it has become clear that we are even changing the atmosphere (e. g. ozone, carbon dioxide). This is worrying since the planet's life systems are involved and dependent on its functioning. Current climate change – global warming – is one recognised consequence of this larger problem. To face this major challenge, we will need the research and advice of many disciplines – Physics, Chemistry, Earth Sciences, Biology, and Sociology – and particularly the commitment of wise politicians such as US Senator Al Gore. An important aspect of this global problem that has been researched for several decades is the loss of species and the impoverishment of our ecosystems, and hence their ability to sustain themselves, and more particularly us! Through evolutionary time new species have been generated and some have gone extinct. Such extinction and regeneration are moulded by changes in the earth's crust, atmosphere, and resultant climate. Some extinctions have been massive, particularly those associated with catastrophic meteoric impacts like the end of the Cretaceous Period 65Mya.

Healing the Wounds of Gukurahundi in Zimbabwe Dumisani Ngwenya, 2017-12-14 This book is based on a participatory action research project carried out with a group of former Zimbabwe People's revolutionary Army (ZPRA) which was the armed wing of the Zimbabwe African People's Union (ZAPU) which was led by the late Joshua Nkomo. ZPRA was the primary target of Gukurahundi, a pogrom by the Mugabe government which left an estimated 20 000 civilians dead and countless others tortured in the early 1980s in Matebeleland, Zimbabwe. It has been almost 30 years since the violence ended, but there has never been an official healing and reconciliation programme or truth commission into the atrocities. The government chose the path of amnesia by granting a blanket amnesty to all involved. The regime has enforced a culture of silence over the event through repression and intimidation. The book is a culmination of a two year journey, by the group and the

author, of an exploration of group-based self-healing approaches to the pain caused by the violence of Gukurahundi.
