Disciplined Growth Strategies Peter S. Cohan,2017-02-06 Accelerate your company's growth in a disciplined fashion. This book provides leaders of large and small companies a proven comprehensive framework to think systematically about growth options and to yield practical strategies that produce faster growth. Drawing insights from case studies of successful and unsuccessful companies, strategy teacher and venture capitalist Peter Cohan models his systematic approach to brainstorming, evaluating, and implementing growth strategies across five dimensions: Customers, Geography, Products, Capabilities, Culture. He examines each of these five growth dimensions in turn, selecting and organizing his cases to compare the growth strategies deployed successfully and unsuccessfully by large and small companies along the given dimension. In each of his five dimensional chapters, the author derives from his case analyses the key principles and processes for creating and achieving faster growth. Professor Cohan draws on a network of hundreds of founders, CEOs, and investors developed through his decades of consulting, authorship of 11 books, and over five years as a Forbes columnist. He shows through many compelling stories how leaders craft effective growth strategies. Business leaders will learn the following lessons from this book: Achieving rapid but sustainable growth is a business leader's most important responsibility - and leaders must approach this challenge with a mixture of vision, intellectual humility, and a willingness to experiment and learn from failure. The growth challenges facing companies that are currently growing quickly differ from the ones that stagnating or shrinking companies must overcome. Companies can achieve growth along one or more of the dimensions simultaneously - and they often expand geographically to customers in the same segments. Useful insights can emerge from comparing case studies of successful and unsuccessful companies pursuing similar growth strategies. Companies should select a growth strategy based on three factors: the attractiveness of the growth opportunity, the company's capabilities to provide superior value to customers in the selected market, and the expected return on investment in the growth vector. Companies should select a growth strategy that best fits their capabilities and culture and they must enhance both to adapt to new growth opportunities. Who This Book Is For The people in companies who are responsible for growth: chief executive officers, chief marketing officers, chief product officers, heads of business development, product managers, sales people, and human resources managers

**Spotify** Jonas Leijonhufvud,Sven Carlsson,2021-09-24 La historia completa de la plataforma de audio por streaming más grande del mundo En 2011, Daniel Ek, el joven fundador de Spotify, por fin logró el lanzamiento de su compañía en Estados Unidos, a pesar de que Steve Jobs había hecho lo posible porque ese momento nunca sucediera. La startup sueca había entrado al campo de batalla para cambiar las reglas del juego en el negocio de la música. Spotify apenas había ganado una batalla, pero aún no la guerra: ahora tendría que luchar en contra y a favor de las grandes discográficas, al tiempo que seguía tratando de triunfar en la carrera de la rentabilidad. A partir de cientos de entrevistas y fuentes —entre las que destacan Mark Zuckerberg, Steve Jobs, Taylor Swift, Jay-Z, Sean Parker, Pony Ma Huateng y Jimmy Loving—, los autores reconstruyen la fascinante historia de una de las compañías que ha revolucionado la forma en que el mundo consume audio. Un relato equiparable al de David y Goliath que, además de revelador, muestra cómo la convicción, la voluntad implacable y los sueños son clave para los pequeños empresarios que se enfrentan a los gigantes de la tecnología.

**Unlocking the Customer Value Chain** Thales S. Teixeira, Greg Piechota, 2019-02-19 Based on eight years of research visiting dozens of startups, tech companies and incumbents, Harvard Business School professor Thales Teixeira shows how and why consumer industries are disrupted, and what established companies can do about it—while highlighting the specific strategies potential startups use to gain a competitive edge. There is a pattern to digital disruption in an industry, whether the disruptor is Uber, Airbnb, Dollar Shave Club, Pillpack or one of countless other startups that

have stolen large portions of market share from industry leaders, often in a matter of a few years. As Teixeira makes clear, the nature of competition has fundamentally changed. Using innovative new business models, startups are stealing customers by breaking the links in how consumers discover, buy and use products and services. By decoupling the customer value chain, these startups, instead of taking on the Unilevers and Nikes, BMW's and Sephoras of the world head on, peel away a piece of the consumer purchasing process. Birchbox offered women a new way to sample beauty products from a variety of companies from the convenience of their homes, without having to visit a store. Turo doesn't compete with GM. Instead, it offers people the benefit of driving without having to own a car themselves. Illustrated with vivid, indepth and exclusive accounts of both startups, and reigning incumbents like Best Buy and Comcast, as they struggle to respond, Unlocking the Customer Value Chain is an essential guide to demystifying how digital disruption takes place - and what companies can do to defend themselves.

**Startupland** Mikkel Svane,2014-11-13 The real story of what it takes to risk it all and go for broke. Conventional wisdom says most startups need to be in Silicon Valley, started by young engineers around a sexy new idea, and backed by VC funding. But as Mikkel Svane reveals in Startupland, the story of founding Zendesk was anything but conventional. Founded in a Copenhagen loft by three thirty-something friends looking to break free from corporate doldrums, Zendesk Inc. is now one of the hottest enterprise software companies, still rapidly growing with customers in 150 countries. But its success was anything but predestined. With revealing stories both funny and frank, Mikkel shares how he and his friends bravely left secure jobs to start something on their own, how he almost went broke several times, how they picked up themselves and their families to travel across the world to California and the unknown, and how the three friends were miraculously still together for Zendesk's IPO and (still growing) success. Much like Zendesk's mission itself—to remove friction, barriers, and mystery in order to make customer service easier and more approachable—Startupland removes some of the myths about startups and startup founders. Mikkel's advice, hard-won through experience, often bucks conventional wisdom and entrepreneurial tropes. He shares why failure (whether fast or slow) is awful, why a seemingly boring product or idea can be the most exciting, why giving back to the community is as important as the bottom line. From how to hire right (look for people who are not offended by swearing) to which personas generate the highest response rates, Mikkel answers the most pressing questions from the perspective of someone still in the trenches and willing to share the hard truth, warts and all. While there are books by consultants who tell you how to build businesses, or by entrepreneurs now running billion-dollar businesses, there are few books from people still in the trenches who acutely remember the difficult daily decisions, the thrill (and fears) of the early days, the problems that scale with growing a business, and the reason why they all went on the adventure in the first place. Startupland is indispensable reading for all entrepreneurs who want to make their ideas the next big thing. The book will inspire and empower you to follow your own dream and create your own story.
