Told to Federal Writers' Project fieldworkers in the 1930s, these stories cover the span of horse trading: human and equine trickery, orneriness, debility—and generosity.

Washington Confidential Jack Lait,Lee Mortimer,2018-02-27 Scandalous, shocking, cheeky, impudent are words that will be used to describe this account of the hidden side of our glamorous, riotous capital city. For Lait and Mortimer, famous newspapermen, mince no words, pull no punches, tell their story in their own bold way. They have found out the truth and they tell the facts and name the names—which no one dared write or publish before. They deglamorize Washington and reveal it with its spats off and its morning coat unbuttoned. They tear the Velvet Curtain and show the behind-the-scenes intrigue, the sub-rosa night life, the shady side of sex, the sin side, the crime side. The amazing things they report will shock millions, arouse citizens all over the country as their previous book Chicago Confidential did... "P-S-S-S-T! "Here we go again—Confidential. "We turned New York inside out; but we both live there. We turned Chicago upside down; but we were both raised there. We descended on Washington not quite like Stanley invaded Africa, because in our combined 75 years of newspaper work we had been in the capital hundreds of times. It intrigued us because we never could understand it. So we decided brashly to do a Lait-Mortimer operation on it from scratch. Our principal discovery was that nobody understands Washington—the city, not the nation's nerve-center. [...] "That's why we were born—to tell you what you couldn't find out without us—Confidential!"—Jack Lait and Lee Mortimer

Law in an Era of Smart Technology Susan Brenner,2007-12-31 Should law be technologically neutral, or should it evolve as human relationships with technology become more advanced? In Law in an Era of Smart Technology, Susan Brenner analyzes the complex and evolving interactions between law and technology and provides a thorough and detailed account of the law in technology at the beginning of the 21st century. Brenner draws upon recent technological advances, evaluating how developing technologies may alter how humans interact with each other and with their environment. She analyzes the development of technology as shifting from one of use to one of interaction, and argues that this interchange needs us to reconceptualize our approach to legal rules, which were originally designed to prevent the misuse of older technologies. As technologies continue to develop over the next

several decades, Brenner argues that the laws directed between human and technological relationships should remain neutral. She explains how older technologies rely on human implementation, but new smart technology will be completely automated. This will eventually lead to, as she explains, the ultimate progression in our relationship with technology: the fusion of human physiology and technology. Law in an Era of Smart Technology provides a detailed, historically-grounded explanation as to why our traditional relationship with technology is evolving and why a corresponding shift in the law is imminent and necessary.

Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people – and its outta paper – and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid $75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than $10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. <u>Water for People, Water for Life</u> World Water Assessment Programme (United Nations),2003 The world's freshwater resources are coming under growing pressure through such environmental hazards as human waste, urbanization, industrialization, and pesticides. The problems are exacerbated through drought in many parts of the world. The improvement of the water quality itself and access to it have been major concerns for politicians and development agencies for over a decade. First officially formulated at the Rio Earth Summit of 1992, they have been restated or expanded since then. The UN Millennium Declaration of 2000 transformed general guidelines into specific targets. The international community pledged to halve by 2015 the proportion of people who are unable to reach, or to afford, safe drinking water and to stop the unsustainable exploitation of water resources, by developing water management strategies at the regional, national and local levels, which promote both equitable access and adequate supplies. Thus, ten years after Rio it is time to take stock. Based on the collective inputs of 23 United Nations agencies and convention secretariats, this Report offers a global overview of the state of the world's freshwater resources. It is part of an on-going assessment process to develop policies and help with their implementation as well as to measure any progress towards achieving sustainable use of water resources. Generously illustrated with more than 25 full-color global maps and numerous figures, the report reviews progress and trends and presents seven pilot case studies of river basins representing various social, economic and environmental settings: Lake Titicaca (Bolivia, Peru); Senegal river basin (Senegal, Mali, Mauritania, Guinea); Seine Normandy (France); Lake Peipsi/Chudskoe (Estonia, Russia); Ruhuna basin (Sri Lanka); Greater Tokyo region (Japan); and Chao Phraya (Thailand). It assesses progress in 11 challenge areas, including health, food, environment, shared water resources, cities, industry, energy, risk management, knowledge, valuing water and governance. Proposing methodologies and indicators for measuring sustainability, it lays the foundations for regular, system-wide monitoring and reporting by the UN, together with the development of standardized methodologies and data. With its comprehensive maps, glossary, references and coverage of a broad range of themes and examples of real-world river basins, the UN World Water Development Report will no doubt prove to be a most valuable reference work. Visit the United Nation's Water Portal for more information on the report and on the International Year of Freshwater 2003.
