Zamora Ruvalcaba,Robert Guthrie,Shradha Thakare,Stephen M Tee,Steve Duersch,Sukumar Vankadhara,Sumit Kumar,Todd M Tosseth,Van Smith,Vasfi Gucer,Wesley Jones,IBM Redbooks,2020-12-08 This IBM® Redbooks® publication introduces and describes the IBM Elastic Storage® Server 5000 (ESS 5000) as a scalable, high-performance data and file management solution. The solution is built on proven IBM Spectrum® Scale technology, formerly IBM General Parallel File System (IBM GPFS). ESS is a modern implementation of software-defined storage, making

it easier for you to deploy fast, highly scalable storage for AI and big data. With the lightning-fast NVMe storage technology and industry-leading file management capabilities of IBM Spectrum Scale, the ESS 3000 and ESS 5000 nodes can grow to over YB scalability and can be integrated into a federated global storage system. By consolidating storage requirements from the edge to the core data center — including kubernetes and Red Hat OpenShift — IBM ESS can reduce inefficiency, lower acquisition costs, simplify storage management, eliminate data silos, support multiple demanding workloads, and deliver high performance throughout your organization. This book provides a technical overview of the ESS 5000 solution and helps you to plan the installation of the environment. We also explain the use cases where we believe it fits best. Our goal is to position this book as the starting point document for customers that would use the ESS 5000 as part of their IBM Spectrum Scale setups. This book is targeted toward technical professionals (consultants, technical support staff, IT Architects, and IT Specialists) who are responsible for delivering cost-effective storage solutions with ESS 5000.

**Unlocking markets to smallholders** Herman D. van Schalkwyk, Jan A. Groenewald, Gavin C.G. Fraser, Ajuruchukwu Obi, Aad van Tilburg, 2012-03-10 This book assesses the institutional, technical and market constraints as well as opportunities for smallholders, notably, emerging farmers in disadvantaged areas such as the former homelands of South Africa. Emerging farmers are previously disadvantaged black people who started or will start their business with the support of special

government programs. Public support programs have been developed as part of the Black Economic Empowerment strategy of the South African government. These programs aim to improve the performance of emerging farmers. This requires, first and foremost, upgrading the emerging farmers skills by providing access to knowledge about agricultural and entrepreneurial practices. To become or to remain good farmers they also need access to suitable agricultural land and sufficient water for irrigation and for feeding their cattle. Finally, for emerging farmers to be engaged in viable farming operations, various factors need to be in place such as marketing and service institutions to give credit for agricultural inputs and investments; input markets for farm machinery, farm implements, fertilizers and quality seeds; and accessible output markets for their end products. This book develops a policy framework and potential institutional responses to unlock the relevant markets for smallholders.

*Asia-Pacific Trade and Investment Report 2016* United Nations Economic and Social Commission for Asia and the Pacific, 2016-10-05 The Asia-Pacific Trade and Investment Report (APTIR) is a major annual publication of the Trade, Investment and Innovation Division of United Nations ESCAP. It aims to deepen understanding of trends and developments in trade and investment in the Asia-Pacific region; emerging issues in trade, investment and trade facilitation policies, and impacts of these policies on countries' abilities to meet the challenges of achieving inclusive and sustainable development. It offers innovative policy options to meet the challenges of achieving sustainable trade and investment. APTIR 2016 shows that 2015-2016 has been a worrying period for trade and investment in the Asia-Pacific region and worldwide, and there are few signs that the current economic and trade slowdown is simply a temporary phenomenon. Instead, this pattern may be the result of a change in the fundamental structure of world trade, which might lead to a persistent trade stagnation. On the other hand, good progress was made, especially at the regional level, with furthering cross-border paperless trade as one of the approaches to deal with the upward pressure on the trade costs. Special feature of this volume is a chapter on digital trade in Asia-Pacific. Accepting the rising importance of e-commerce as a new trade platform, there is opening for the possible changes in the focus of trade and investment policies in order to leverage the potential of e-commerce to support intraregional trade.
