Living on the Edge Le Zwarts, Rob G. Bijlsma, Jan van der Kamp, Eddy Wymenga, 2012-01-01 'Living on the Edge' examines the function of the Sahel region of Africa as an important wintering area for long-distance migrant birds. It describes the challenges the birds have to cope with – climate change, of course, and rapid man-made habitat changes related to deforestation, irrigation and reclamation of wetlands. How have all these changes affected the birds, and have birds adapted to these changes? Can we explain the changing numbers of breeding birds in Europe by changes in the Sahel, or vice versa?

The Economics of Casino Gambling Douglas M.

Walker,2007-06-30 Casino gambling has spread throughout the world, and continues to spread. As governments try to cope with fiscal pressures, legalized casinos offer a possible source of additional tax revenue. But casino gambling is often controversial, as some people have moral objections to gambling. In addition, a small percentage of the population may become pathological gamblers who may create significant social costs. The Economics of Casino Gambling is a comprehensive discussion of the social and economic costs and benefits of legalized gambling. It is the first comprehensive discussion of these issues available on the market.

Therapeutic Applications of Honey and its

Phytochemicals Muneeb U. Rehman,Sabhiya Majid,2020-12-21

Honey typically has a complex chemical and biochemical composition that invariably includes complex sugars, specific proteins, amino acids, phenols, vitamins, and rare minerals. It is reported to be beneficial in the treatment of various diseases, such as those affecting the respiratory, cardiovascular, gastrointestinal, and nervous systems, as well as diabetes mellitus and certain types of cancers; however, there is limited literature describing the use of honey in modern medicine. This book provides evidence-based information on the pharmaceutical potential of honey along with its therapeutic applications and precise mechanisms of action. It discusses in detail the phytochemistry and pharmacological properties of honey,

highlighting the economic and culturally significant medicinal uses of honey and comprehensively reviewing the scientific research on the traditional uses, chemical composition, scientific validation, and general pharmacognostical characteristics. Given its scope, it is a valuable tool for researchers and scientists interested in drug discovery and the chemistry and pharmacology of honey.

China's Belt and Road Initiative Wenxian Zhang, Ilan Alon, Christoph Lattemann, 2018-05-24 Since the introduction of the One Belt, One Road initiative (OBOR), first proposed in late 2013, international scholars have begun to study this new policy and its implications in the global age. While OBOR provides new opportunities for China in terms of regional cooperation and global development, many also raise concerns about China's intentions of using economic means to achieve strategic and foreign policy objectives. Hailing from the West and the East, the authors reflect on the wide-ranging impacts of OBOR on specific countries,

regions, economic policies, and geopolitical considerations. Including both theoretical research and empirical studies that explore opportunities and challenges related to OBOR, this edited volume will allow readers to gain a more comprehensive understanding of this ambitious undertaking and its long-term impact on the rest of the world.

Corpus linguistics Stefanowitsch, Anatol, 1996 Corpora are used widely in linguistics, but not always wisely. This book attempts to frame corpus linguistics systematically as a variant of the observational method. The first part introduces the reader to the general methodological discussions surrounding corpus data as well as the practice of doing corpus linguistics, including issues such as the scientific research cycle, research design, extraction of corpus data and statistical evaluation. The second part consists of a number of case studies from the main areas of corpus linguistics (lexical associations, morphology, grammar, text and metaphor), surveying the range of issues studied in corpus linguistics while at the same time showing how they fit into the methodology outlined in the first part.

Dalí, Surrealism and Cinema Elliott H. King, 2010-10-21 Salvador Dali is one of the most widely recognised and most controversial artists of the twentieth century. He was also an avant-garde filmmaker -- collaborating with such giants as Luis Bunuel, Walt Disney and Alfred Hitchcock -- though the impetus and endurance of his fascination with film has rarely been given the attention it merits. King surveys the full range of Dali's eccentric activities with(in) the cinema. Influenced by the Marx Brothers, Buster Keaton and Stanley Kubrick, Dali used the cinema to bring the 'dream subjects' of his paintings to life, providing the groundwork for revolutionary forays into television, video, photography and holography. Dali's writings continue to be

relevant to discourses surrounding film and surrealism, and his embrace of academic technique partnered with contemporary technology and pop culture is a paradox still relevant today. From a movie-going experience that would incorporate all five senses to the tale of a woman's hapless love affair with a wheelbarrow, Dali's hallucinatory vision never fails to leave its indelible mark.
