Real-time Coastal Observing Systems for Marine Ecosystem Dynamics and Harmful Algal Blooms Babin, Marcel,Roesler, Collin S.,Cullen, John J.,2008-06-05 The proliferation of harmful phytoplankton in marine ecosystems can cause massive fish kills, contaminate seafood with toxins, impact local and regional economies and dramatically affect ecological balance. Real-time observations are essential for effective short-term operational forecasting, but observation and modelling systems are still being developed. This volume provides guidance for developing real-time and near real-time sensing systems for observing and predicting plankton dynamics, including harmful algal blooms, in coastal waters. The underlying theory is explained and current trends in research and monitoring are discussed.Topics covered include: coastal ecosystems and dynamics of harmful algal blooms; theory and practical applications of in situ and remotely sensed optical detection of microalgal distributions and composition; theory and practical applications of in situ biological and chemical sensors for targeted species and toxin detection; integrated observing systems and platforms for detection; diagnostic and predictive modelling of ecosystems and harmful algal blooms, including data assimilation techniques; observational needs for the public and government; and future directions for research and operations.

Advances in Digital Forensics XII Gilbert Peterson,Sujeet Shenoi,2016-09-19 Digital forensics deals with the acquisition, preservation, examination,

analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics XII describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. Advances in Digital Forensics XII is an important

resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoi is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

Snookered Ishy Din,2014-12-30 Snookered probes into the lives of young Muslim men and their fragile masculinity, burdened by cultural expectations yet charged with personal dreams. In a volatile political climate, Ishy Din

opens a timely window into a strand of British Muslim life that often remains unseen. The plot follows four friends who, every year, meet on the anniversary of their mate's death for a game of pool and a few drinks. As they excavate the past and measure their own lives, secrets are revealed and allegiances shift as quickly as the drinks are downed. Can they put to rest their guilt over the untimely death of their friend? And will their friendship survive the final betrayal? One of the very few plays written both by and about British Muslims, Snookered explores their camaraderie, life decisions, and their self identity within their close-knit Muslim community of extended families and network of friends. The sharp, pace-filled dialogue captures the Punjabi-English urban patois that is currently developing in northern towns but is rarely seen onstage. The result is that the characters are both alive and relevant, and moments of sharp wit collide with emotionally searing exchanges. Developed by the theatre company Tamasha, whose manifesto is to explore British Asian perspectives and identities, Snookered is unafraid to feature difficult and significant themes such as religion, drug addiction, misogyny, poverty and racism. Against this backdrop, Snookered is first and foremost a psychologically detailed but razor-sharp depiction of young men finding their paths in life, whilst navigating what it means to be young, British and Muslim.

  Practical Clinical Endocrinology Peter Igaz,2021-02-24 This practical book aims to cover the whole scope of clinical endocrinology, including both common and selected rare but important diseases, with an emphasis on practical clinical management. A number of different questions and problems in clinical routine are discussed in this book in an unconventional format. Each topic begins with the presentation of a typical clinical case, and then the topic is approached in a question and answer format linked to the clinical case presented, highlighting the most important questions in diagnosis, differential diagnosis and therapy. Numerous figures and tables are included to help understanding. The book is chiefly intended for doctors in training (preparing for boarding exam in endocrinology or internal medicine), but also for established clinicians who want to broaden or refresh their skills. University students of medicine can also find this book interesting.

  The Makerspace Workbench Adam Kemp,2013-09-10 Create a dynamic space for designing and building DIY electronic hardware, programming, and manufacturing projects. With this illustrated guide, you'll learn the benefits of having a Makerspace—a shared space with a set of shared tools—that attracts fellow makers and gives you more resources to work with. You'll find clear explanations of the tools, software, materials, and layout you need to get started—everything from basic electronics to rapid prototyping technology and inexpensive 3D printers. A Makerspace is the perfect solution for many makers today. While you can get a lot done in a fully-decked out shop, you'll always have trouble making space for the next great tool you need. And the one thing you really miss out on in a personal shop is the collaboration with other makers. A Makerspace provides you with the best of both worlds. Perfect for any maker, educator, or community, this

book shows you how to organize your environment to provide a safe and fun workflow, and demonstrates how you can use that space to educate others.

  Economic Development and Entrepreneurship in Transition Economies Jovo Ateljević,Jelena Trivić,2018-04-25 This book contributes to a better understanding of entrepreneurship in transition economies. Current literature reflects the more traditional schools of thought on entrepreneurship, which are influenced by the Western perspective, and fail to fully address the scenario in transition economies. There is a broad consensus among academics, policy makers, and practitioners that a fundamental cause of difficulties experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new, private businesses, and particularly SMEs. This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers, which were inherited from the old system, remain in place, thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment. The contributions featured in this book focus on how much progress has been achieved so far with regard to these aspects, as well as identify which current barriers and issues still need to be resolved. Themes include innovation performance, financing, venture capital, educational factors, and entrepreneurial learning.

  The Ha-Ha Dave King,2005-01-01 Howard Kapostash has not spoken in thirty years. The small repertory of gestures and simple sounds that he uses to

communicate lead most people to assume he is disturbed. No one understands that Howard is still the same man he was before his tragic injury. But when he agrees to help an old girlfriend by opening his home to her nine-year-old son, the presence of this nervous, resourceful boy in his life transforms Howard utterly. He is afforded a rare glimpse of life outside his shell? With all its exuberant joys and crushing sorrows.

The Craft of Selling "Yourself" Ashraf Chaudhry,2009-04-16 AN EXCEPTIONAL BOOK ON JOB-HUNTING, SELF-GROWTH & CAREER MANAGEMENT During our entire life, we're engaged in one of two sorts of activities; either we're selling something or we're sleeping. The Selling in life starts with first 'cry for milk' of the baby and it continues till........ One of the most crucial but equally neglected areas of our life is realizing our innate talent and skills and passionately selling them in the marketplace at premium. Sometimes, we fail to sell our most valuable product in the job market and sometimes we under-sell ourselves. Rare are the individuals who systematically plan to invent and package themselves to sell to the best and the highest bidder. Captains of Industry Speak... Observing the Oceans in Real Time R. Venkatesan,Amit Tandon,Eric D'Asaro,M. A. Atmanand,2018-06-23 This book provides contributions from leading experts on the integration of novel sensing technologies to yield unprecedented observations of coupled biological, chemical, and physical processes in the ocean from the macro to micro scale. Authoritative entries from experts around the globe provide first-hand information for oceanographers and researchers looking for solutions to measurement problems. Ocean observational techniques have seen rapid advances in the last few years and this book addresses the need for a single overview of present and future trends in near real time and real time. First the past, present and future scenarios of ocean observational tools and techniques are elucidated. Then this book divides into three modes of ocean observations: surface, upper ocean and deep ocean. This is followed by data quality and modelling. Collecting a summary of methods and applications, this book provides first-hand information for oceanographers and researchers looking for solutions to measurement problems. This book is also suitable for final year undergraduate students or beginning graduate students in ocean engineering, oceanography and various other engineering students (such as Mechanical, Civil, Electrical, and Bioengineering) who are interested in specializing their skills towards modern measurements of the ocean.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
