When China Goes to the Moon... Marco Aliberti,2015-07-04 This book is about China's ambitions in its most complex and internationally visible space endeavor, namely its human space exploration programme. It provides a comprehensive reflection on China's strategic direction and objectives in space, including in particular those set forth in its human spaceflight programme and analyses the key domestic and external factors affecting the country's presumed manned lunar ambitions. The objective of the book is to disentangle the opportunities and challenges China's space ambitions are creating for other spacefaring nations and for Europe in particular. It therefore includes an in-depth analysis of possible European postures towards China in space exploration and seeks to stimulate a debate on future space strategies in the broader context of world politics.

Space Safety is No Accident Tommaso Sgobba, Isabelle Rongier, 2015-06-04 Includes the proceedings from the 7th IAASS Conference, Space Safety is No Accident, held in Friedrichshafen, Germany, in October 2014. The 7th IAASS Conference, "Space Safety is No Accident" is an invitation to reflect and exchange information on a number of topics in space safety and sustainability of national and international interest. The conference is also a forum to promote mutual understanding, trust and the widest possible international cooperation in such matters. The once exclusive "club" of nations with autonomous sub-orbital and orbital space access capabilities is becoming crowded with fresh and ambitious new entrants. New commercial spaceports are starting operations and others are being built. In the manned spaceflight arena a commercial market is becoming a tangible reality with suborbital spaceflights and government use of commercial services for cargo and crew transportation to orbit. Besides the national ambitions in space, the international cooperation both civil and commercial is also gaining momentum. In the meantime robotic space exploration will accelerate and with it the need to internationally better regulate the usage of nuclear power sources. Space-bound systems and aviation traffic will share more and more a crowded airspace, while aviation will increasingly rely on space-based safety-critical services. Finally, most nations own nowadays space assets, mainly satellites of various kinds and purposes, which are under the constant threat of collision with other spacecraft and with the ever increasing number of space debris. Awareness is increasing internationally (as solemnly declared since decades in space treaties) that space is a mankind asset and that we all have the duty of caring for it. Without proactive and courageous international initiatives to organize space, we risk to negate access and use of space to future generations.

Love Under the Skin Cécile Coquet-Mokoko, 2020-04-15 The rising visibility of interracial couples calls for increased attention to the overlapping of culture and race, in safe spaces centered on small-group dynamics, or in public spaces where peoples of African descent are under the public gaze. This comparative study seeks to de-center the U.S.-centered viewpoint common to much of the literature on black/white relations. Based on nine years of fieldwork in the American South and in France, Coquet shows many unexpected parallels between the two societies. Gendered perceptions of cultural authenticity and sexual ethics are a guiding thread, being inseparable from the historical and political contingencies (re-)defining acceptable forms of dating, marrying, and parenting among cis-heterosexual couples in both societies. Her account emphasizes resilience and agency as couples seek to protect themselves and their children, while their extended or symbolic kinship networks help white partners acknowledge the existence of racial privilege.

Sweet Freedom's Plains Shirley Ann Wilson Moore,2016-10-20 The westward migration of nearly half a million Americans in the mid-nineteenth century looms large in U.S. history. Classic images of rugged Euro-Americans traversing the plains in their prairie schooners still stir the popular imagination. But this traditional narrative, no matter how alluring, falls short of the actual—and far more complex—reality of the overland trails. Among the diverse peoples who converged on the western frontier were African American pioneers—men, women, and children. Whether enslaved or free, they too were involved in this transformative movement. *Sweet Freedom's Plains* is a powerful retelling of the migration story from their perspective. Tracing the journeys of black overlanders who traveled the Mormon, California, Oregon, and other trails, Shirley Ann Wilson Moore describes in vivid detail what they left behind, what they encountered along the way, and what they expected to find in their new, western homes. She argues that African Americans understood advancement and prosperity in ways unique to their situation as an enslaved and racially persecuted people, even as they shared many of the same hopes and dreams held by their white contemporaries. For African Americans, the journey westward marked the beginning of liberation and transformation. At the same time, black emigrants' aspirations often came into sharp conflict with real-world conditions in the West. Although many scholars have focused on African Americans who settled in the urban West, their early trailblazing voyages into the Oregon Country, Utah Territory, New Mexico Territory, and California deserve greater attention. Having combed censuses, maps, government documents, and white overlanders' diaries, along with the few accounts written by black overlanders or passed down orally to their living descendants, Moore gives voice to the countless, mostly anonymous black men and women who trekked the plains and mountains. *Sweet Freedom's Plains* places African American overlanders where they belong—at the center of the western migration narrative. Their experiences and perspectives enhance our understanding of this formative period in American history.

Terrorism Juan Romero, 2022-03-03 This book adopts an innovative historical approach to Terrorism, focusing on the weaknesses of terrorist states and organizations as reflected in the ideologies, methodologies and propaganda of Russian populist, National Socialist and Islamic Terrorism. Drawing upon multilingual primary sources, the book challenges the oft repeated claim that the Nazi regime and Islamic State produced propaganda of superior quality, instead arguing that the manipulation of information is the Achilles heel of terrorist organizations. It offers a critical examination of the fears of terrorists themselves, as opposed to the traditional focus on the fear instilled by terrorist organizations in governments and citizens. Taking a multidisciplinary approach and long-term history perspective, the book provides a method for exploring the minds of terrorists and the inner workings of their organizations and traces the evolution of terrorist thought and methodology across time and place. This is the ideal volume for researchers of Terrorism within the fields of History, Politics, Security Studies, Religious Studies and Legal Studies.
