**Accessory to War: The Unspoken Alliance Between Astrophysics and the Military** Neil deGrasse Tyson,Avis Lang,2018-09-11 “Extraordinary.... A feast of history, an expert tour through thousands of years of war and conquest.” —Jennifer Carson, New York Times Book Review In this far-reaching foray into the millennia-long relationship between science and military power, acclaimed astrophysicist Neil deGrasse Tyson and co-author Avis Lang examine how the methods and tools of astrophysics have been enlisted in the service of war. Spanning early celestial navigation to satellite-enabled warfare, *Accessory to War* is a richly researched and provocative examination of the intersection of science, technology, industry, and power that will introduce Tyson's millions of fans to yet another dimension of how the universe has shaped our lives and our world.

*Resource Compendium Available for Cervical and Breast Cancer Control and Prevention in the Majority World* Laurie Elit,2008 Cervix Cancer is the second leading cause of death for women world wide. The rates of breast cancer are quickly rising through out the world. In part these dismal statistics are related to the fact that disease in low resource countries is identified in advanced stages when cure is improbable. Cervix and breast cancer are preventable or at least curable when identified earlier. This can happen when screening programs are in place. This compendium provide references to the international agencies and societies involved in dealing with this problem, research conducted on breast and cervical cancer prevention and control in the low resource countries of the Western hemisphere and educational resources available for cancer control planner through to the public.

*Accelerated Path to Cures* Josep Bassaganya-Riera,2018-04-25 Accelerated Path to Cures provides a transformative perspective on the power of combining advanced computational technologies, modeling, bioinformatics and machine learning approaches with nonclinical and clinical experimentation to accelerate drug development. This book discusses the application of advanced modeling technologies, from target identification and validation to nonclinical studies in animals to Phase 1-3 human clinical trials and post-approval monitoring, as alternative models of drug development. As a case of successful integration of computational modeling and drug development, we discuss the development of oral small molecule therapeutics for inflammatory bowel disease, from the application of docking studies to screening new chemical entities to the development of next-generation in silico human clinical trials from large-scale clinical data. Additionally, this book illustrates how modeling techniques, machine learning, and informatics can be utilized effectively at each stage of drug development to advance the progress towards predictive, preventive, personalized, precision medicine, and thus provide a successful framework for Path to Cures.

The Future of Islam John L. Esposito, 2010-02-04 John L. Esposito is one of America's leading authorities on Islam. Now, in this brilliant portrait of Islam today-- and tomorrow-- he draws on a lifetime of thought and research to provide an accurate, richly nuanced, and revelatory account of the fastest growing religion in the world. Here Esposito explores the major questions and issues that face Islam in the 21st century and that will deeply affect global politics: Is Islam compatible with modern notions of democracy, rule of law, gender equality, and human rights? How representative and widespread is Islamic fundamentalism and the threat of global terrorism? Can Muslim minority communities be loyal citizens in America and Europe? In the midst of these questions Esposito places an important emphasis on the issue of Islamophobia, the threat it poses, and its vast impact on politics and society in the US and Europe. He also turns the mirror on the US and Europe and paints a revealing portrait of how we appear to Muslims. Recent decades have brought extraordinary changes in the Muslim world, and in addressing these issues, Esposito paints a complex picture of Islam in all its diversity--a picture of urgent importance as we face the challenges of the coming century.

New Competition Jurisdictions Richard Whish, Christopher Townley, 2012-01-01 'The most thoughtful collection available of insights into the challenges facing new competition jurisdictions. Whish and Townley have brought together experts on approaches global, comparative and local, combined with fresh inter-disciplinary insights. By combining law, economics and political economy, what emerges are pointed commentaries, and a rich source of principles and pragmatism. This book will guide the creators and enforcers of new competition law regimes.' – Philip Marsden, Director, British Institute of International and Comparative Law, and OFT Board Member 'This is a wonderful volume filled with good ideas. It evolves from the Sixth Conference of ASCOLA, the world association of competition law professors, which asked a group of young scholars how new competition law systems can be made more effective, and challenged the conference participants to interrogate the ideas. the resulting book is an admirable collection of insightful papers and commentary. For all who are interested in advancing younger competition law systems and their supporting academic communities, this volume must be read.' – Eleanor Fox, New York University School of Law, US This book focuses on the problems faced by newly-established competition authorities, and on shaping policies and building institutions in those jurisdictions. In particular four key issues encountered by new competition jurisdictions are considered, namely: the challenges and obstacles to adopting competition laws; institutional challenges and choices, with a specific focus on deterrence; the global perspective, with a specific focus on mergers; and a discussion of how to help young academics in new jurisdictions. Theoretical analysis is informed by practice throughout, and in particular by those considered to be at the cutting edge, either working in new competition authorities or from specialists advising them on a daily basis (such as those in the OECD and UNCTAD). New Competition Jurisdictions will be of great interest to lawyers, economists, academics, judges and public officials working in the fields of competition law and policy.

How the World Remade Hollywood Ed Glaser, 2022-03-07 For decades, filmmakers worldwide have been remaking Hollywood movies in colorful ways. They've chronicled a singing and dancing Hannibal Lecter in India, star-crossed lovers aboard the doomed Nigerian ship Titanic, a Japanese expedition to the planet of the apes, and an uncivil war in Turkey between Captain America and a mobbed-up Spider-Man. Most of these films were low budget and many were unauthorized, but all of them were fantastic--and lately have begun to resurface thanks to cherry-picked YouTube clips. But why and how were they made in the first place? This book tells the little-known stories of the wily filmmakers who made an Italian 007 flick by casting Sean Connery's tradesman brother, produced a Turkish space opera by stealing a print of Star Wars for its effects footage, and transported a full-fledged Terminator to the present day--not from a post-apocalyptic future, but from the vibrant mythology of Indonesia. Their stories reveal more than mere imitations; they demonstrate the fascinating ways ideas evolve as they cross borders.
