International Refugee Law and Socio-Economic Rights Michelle Foster,2007-07-12 A range of emerging refugee claims is beginning to challenge the boundaries of the Refugee Convention regime and question traditional distinctions between 'economic migrants' and 'political refugees'. This book, first published in 2007, identifies the conceptual and analytical challenges presented by claims based on socio-economic deprivation, and undertakes an assessment of the extent to which these challenges may be overcome by a creative interpretation of the Refugee Convention, consistent with correct principles of international treaty interpretation. The central argument is that, notwithstanding the dichotomy between 'economic migrants' and 'political refugees', the Refugee Convention is capable of accommodating a more complex analysis which recognizes that many claims based on socio-economic deprivation are indeed properly considered within the purview of the Refugee Convention. This, the first book to consider these issues, will be of great interest to refugee law scholars, advocates, decision-makers and non-governmental organizations.

Piece Work Barbara Presnell,2007 Poetry. One does not know which to admire more in this collection--its fierce documentary honesty, or the perfect pitch of its imagined speakers. The two come together memorably in poem after poem, giving us deep and abiding insight into industrial and post-industrial America. This, too, is part of poetry's task: to tell what happened, and why it still matters--Jared Carter.

Siting Noxious Facilities Michael R Greenberg,2018-05-20 Siting Noxious Facilities explains and illustrates processes and criteria used to site noxious manufacturing and waste management facilities. It proposes a framework that integrates economic location analysis and risk analysis, emphasizing the reduction of uncertainty. This book begins by defining noxious facilities and considers the important role of manufacturing in the world economy, before going on to describe the historical practices used in locating these facilities for much of the twentieth century. It then shifts focus to analyze the complex set of considerations in the twenty-first century that mean that any facility that produces annoying smells and sounds, is unsightly and emits hazardous substances has had the bar of acceptability markedly raised for economic, environmental, social and political acceptability. Drawing on case study examples that highlight pollution prevention, choosing locations at major plants (CLAMP), negotiations, and surrendering control of an activity, Greenberg presents a hybrid framework that advocates the amalgamation of industrial location processes with human health and environmental-oriented risk analysis. This book will be of great interest to students and scholars of location economics, environmental science, risk analysis and land-use planning. It will also be of great relevance to decision-makers and their major advisers who must make choices about siting noxious facilities.

Join the Club Tina Rosenberg,2011-04-08 In the style of Nudge or The Spirit Level - a groundbreaking book that will change the way you look at the world. Tina Rosenberg has spent her career tackling some of the world's hardest problems. The Haunted Land, her searing book on how Eastern Europe faced the crimes of Communism, was awarded both the National Book Award and the Pulitzer Prize in the US. In Join the Club, she identifies a brewing social revolution that is changing the way people live, based on harnessing the positive force of peer pressure. Her stories of peer power in action show how it has reduced teen smoking in the United States, made villages in India

healthier and more prosperous, helped minority students get top grades in college calculus, and even led to the fall of Slobodan Milosevic. She tells how creative social entrepreneurs are starting to use peer pressure to accomplish goals as personal as losing weight and as global as fighting terrorism. Inspiring and engrossing, Join the Club explains how we can better our world through humanity's most powerful and abundant resource: our connections with one another.
