A Global Radical Waterfront Holger Weiss,2021-07-05 This volume investigates the ambition of the Red International of Labour Unions to radicalize the global waterfront during the interwar period. The main vehicle was the International Propaganda Committee of Transport Workers, replaced in 1930 by the International of Seamen and Harbour Workers as well as their agitation and propaganda centres, the International Harbour Bureaus and the International Seamen's Clubs. The book scrutinizes their solidarity campaigns in support of local and national strikes as well as on their agitation against discrimination, segregation and racism within the unions, their demands to organize non-white maritime transport workers, and their calls for engagement in anti-fascist, anti-war and anti-imperialist actions.

Essential SNMP Douglas Mauro,Douglas R. Mauro,Kevin Schmidt,2005 Simple Network Management Protocol (SNMP) provides a simple set of operations that allows you to more easily monitor and manage network devices like routers, switches, servers, printers, and more. The information you can monitor with SNMP is wide-ranging--from standard items, like the amount of traffic flowing into an interface, to far more esoteric items, like the air temperature inside a router. In spite of its name, though, SNMP is not especially simple to learn. O'Reilly has answered the call for help with a practical introduction that shows how to install, configure, and manage SNMP. Written for network and system administrators, the book introduces the basics of SNMP and then offers a technical background on how to use it effectively. *Essential SNMP* explores both commercial and open source packages, and elements like OIDs, MIBs, community strings, and traps are covered in depth. The book contains five new chapters and various updates throughout. Other new topics include: Expanded coverage of SNMPv1, SNMPv2, and SNMPv3 Expanded coverage of SNMPc The concepts behind network management and change management RRDTool and Cricket The use of scripts for a variety of tasks How Java can be used to create SNMP applications Net-SNMP's Perl module The bulk of the book is devoted to discussing, with real examples, how to use SNMP for system and network administration tasks. Administrators will come away with ideas for writing scripts to help them manage their networks, create managed objects, and extend the operation of SNMP agents. Once demystified, SNMP is much more accessible. If you're looking for a way to more easily manage your network, look no further than *Essential SNMP*, 2nd Edition.

The Knowledge Illusion Steven Sloman,Philip Fernbach,2017-03-14 "The Knowledge Illusion is filled with insights on how we should deal with our individual ignorance and collective wisdom." —Steven Pinker We all think we know more than we actually do. Humans have built hugely complex societies and technologies, but most of us don't even know how a pen or a toilet works. How have we achieved so much despite understanding so little? Cognitive scientists Steven Sloman and Philip Fernbach argue that we survive and thrive despite our mental shortcomings because we live in a rich community of knowledge. The key to our intelligence lies in the people and things around us. We're constantly drawing on information and expertise stored outside our heads: in our bodies, our environment, our possessions, and the community with which we interact—and usually we don't even realize we're doing it. The human mind is both brilliant and pathetic. We have mastered fire, created democratic institutions, stood on the moon, and sequenced our genome. And yet each of us is error prone, sometimes irrational, and often ignorant. The fundamentally communal nature of intelligence and knowledge explains why we often assume we know more than we really do, why political opinions and false beliefs are so hard to change, and why individual-oriented approaches to education and management frequently fail. But our collaborative minds also enable us to do amazing things. *The Knowledge Illusion* contends that true genius can be found in the ways we create intelligence using the community around us.

Public Health Significance of Urban Pests Xavier Bonnefoy,Helge Kampen,Kevin Sweeney,2008 The second half of the 20th century and the beginning of the 21st century witnessed important changes in ecology, climate and human behaviour that favoured the development of urban pests. Most alarmingly, urban planners now face the dramatic expansion of urban sprawl, in which

city suburbs are growing into the natural habitats of ticks, rodents and other pests. Also, many city managers now erroneously assume that pest-borne diseases are relics of the past. All these changes make timely a new analysis of the direct and indirect effects of present-day urban pests on health. Such an analysis should lead to the development of strategies to manage them and reduce the risk of exposure. To this end, WHO invited international experts in various fields - pests, pest-related diseases and pest management - to provide evidence on which to base policies. These experts identified the public health risk posed by various pests and appropriate measures to prevent and control them. This book presents their conclusions and formulates policy options for all levels of decision-making to manage pests and pest-related diseases in the future. [Ed.]

Head Start Impact Michael J. Puma, 2006 Since its beginning in 1965 as a part of the War on Poverty, Head Start's goal has been to boost the school readiness of low-income children. Based on a 'whole child' model, the program provides comprehensive services that include pre-school education; medical, dental, and mental health care; nutrition services; and efforts to help parents foster their child's development. Head Start services are designed to be responsive to each child's and family's ethnic, cultural, and linguistic heritage. The Congressionally-mandated Head Start Impact Study was conducted across 84 nationally representative grantee/delegate agencies. Approximately 5,000 newly entering 3- and 4-year-old children applying for Head Start were randomly assigned to either a Head Start group that had access to Head Start program services or to a non- Head Start group that could enrol in available community non-Head Start services, selected by their parents. Data collection began in fall 2002 and is scheduled to continue through 2006, following children through the spring of their 1st-grade year. The study quantifies the impact of Head Start separately for 3- and 4-year-old children across child cognitive, social-emotional, and health domains as well as on parenting practices. This book is essential reading for those in the education field.

A Family Resource Guide on International Parental Kidnapping U. . S. U .S. Department of Justice, 2016-04-10 Every year, hundreds of children in the United States are victims of international parental kidnapping- a child's wrongful removal from the United States, or wrongful retention in another country, by a parent or other family member. Parents and other family members left behind may be overwhelmed by feelings of loss, anguish, despair, and anger-as well as confusion and uncertainty about what can be done in response. In December 1999, the Office of Juvenile Justice and Delinquency Prevention invited a small group of left-behind and searching parents to participate in a planning and development meeting. Each one had experienced first hand the heartbreak of having a child abducted to another country or wrongfully retained abroad. Some of them had recovered their children, while others had not. They willingly shared their knowledge of international parental kidnapping-gained at tremendous personal cost- to help other parents of abducted children understand what can be done to:

- * Prevent an international parental kidnapping.*
- Stop a kidnapping in progress.*
- Locate a kidnapped or wrongfully retained child in another country.*
- Bring an abductor to justice.*
- Recover a kidnapped or wrongfully retained child from another country.*
- Reestablish access to a child in another country.

This guide imparts the group's practical wisdom and the hope that other parents will not have to experience the confusion and discouragement these parents did when it was not clear what to do or whom to turn to when their children were kidnapped. The group offered its suggestions for preventing international kidnapping and gave detailed advice to maximize the chance that children who are kidnapped or wrongfully retained will be returned to this country. The guide provides descriptions and realistic assessments of the civil and criminal remedies available in international parental kidnapping cases. It explains applicable laws and identifies both the public and private resources that may be called on when an international abduction occurs or is threatened. It gives practical advice on overcoming frequently

encountered obstacles so that parents can get the help they need. The guide prepares parents for the legal and emotional difficulties they may experience and shares coping and general legal strategies to help them achieve their individual goals, whether they involve recovering a child or reestablishing meaningful access to a child in another country. Despite the difficulties that may lie ahead and the disappointment some parents may experience, it is important not to become discouraged. Stay hopeful. Many things can be done to prevent or to resolve an international parental kidnapping. This guide will help you organize your response

Violence Against Women, 2014 Violence against women undermines women's core fundamental rights such as dignity, access to justice and gender equality. For example, one in three women has experienced physical and/or sexual violence since the age of 15; one in five women has experienced stalking; every second woman has been confronted with one or more forms of sexual harassment. What emerges is a picture of extensive abuse that affects many women's lives but is systematically underreported to the authorities. The scale of violence against women is therefore not reflected by official data. This FRA survey is the first of its kind on violence against women across the 28 Member States of the European Union (EU). It is based on interviews with 42,000 women across the EU, who were asked about their experiences of physical, sexual and psychological violence, including incidents of intimate partner violence ('domestic violence'). The survey also included questions on stalking, sexual harassment, and the role played by new technologies in women's experiences of abuse. In addition, it asked about their experiences of violence in childhood. Based on the detailed findings, FRA suggests courses of action in different areas that are touched by violence against women and go beyond the narrow confines of criminal law, ranging from employment and health to the medium of new technologies.--Editor.
