Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Academic E-Books Suzanne M. Ward, Robert S. Freeman, Judith M. Nixon, 2015-11-15 *Academic E-Books: Publishers, Librarians, and Users* provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as

well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Architectural Research Methods Linda N. Groat, David
Wang, 2013-04-03 A practical guide to research for architects and
designers—now updated and expanded! From searching for the best
glass to prevent glare to determining how clients might react to the
color choice for restaurant walls, research is a crucial tool that
architects must master in order to effectively address the technical,
aesthetic, and behavioral issues that arise in their work. This book's
unique coverage of research methods is specifically targeted to help
professional designers and researchers better conduct and understand
research. Part I explores basic research issues and concepts, and
includes chapters on relating theory to method and design to research.
Part II gives a comprehensive treatment of specific strategies for
investigating built forms. In all, the book covers seven types of
research, including historical, qualitative, correlational, experimental,
simulation, logical argumentation, and case studies and mixed
methods. Features new to this edition include: Strategies for
investigation, practical examples, and resources for additional
information A look at current trends and innovations in research
Coverage of design studio-based research that shows how strategies

described in the book can be employed in real life A discussion of digital media and online research New and updated examples of research studies A new chapter on the relationship between design and research Architectural Research Methods is an essential reference for architecture students and researchers as well as architects, interior designers, landscape architects, and building product manufacturers.

Bringing the Future Within Reach Robert S. Arrighi, 2016 The book documents Glenn's many research specialties over those 75 years. Among them are early jet engines and rockets; flight safety and fuel efficiency tested in premier icing and wind tunnels; liquid hydrogen fuel which, despite skeptics like aerospace engineer Wernher von Braun, helped the U.S. win the race to the moon; and electric propulsion, considered key to future space flight. Space enthusiasts, aviation personnel, aerospace engineers, and inventors may be interested in this comprehensive and milestone volume. Hacker, Hoaxer, Whistleblower, Spy Gabriella

Coleman, 2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to

political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside–outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

DayWater Daniel R. Thevenot, 2008-03-15 The European DayWater project has developed a prototype of an Adaptive Decision Support System (ADSS) related to urban stormwater pollution source control. The DayWater ADSS greatly facilitates decision-making for stormwater source control, which is currently impeded by the large number of stakeholders involved and by the necessary multidisciplinary knowledge. This book presents the results of this project, providing new insights into both technical and management issues. The main objectives of its technical chapters are pollution source control modelling, risk and impact assessment, and evaluation and comparison of best management practices. It also covers management aspects, such as the analysis of the decision-making

processes in stormwater source control, at a European scale, and stormwater management strategies in general. The combination of scientific-technical and socio-managerial knowledge, with the strong cooperation of numerous end-users, reflects the innovative character of this book which includes actual applications of the ADSS prototype in significant case studies. DayWater: an Adaptive Decision Support System for Urban Stormwater Management contains 26 chapters collectively prepared by DayWater scientific partners and end-users associated with this European Research and Development project. It includes: A general presentation of the DayWater Adaptive Decision Support System (ADSS) structure and operation modes A detailed description of the major components of this ADSS prototype The assessment of its components in significant case studies in France, Germany and Sweden The proceedings of the International Conference on Decision Support Systems for Integrated Urban Water Management, held in Paris on 3-4 November 2005. The book presents the ADSS prototype including a combination of freely accessible on-line databases, guidance documents, “road maps” and modelling or multi-criteria analysis tools. As demonstrated in several significant case studies the challenge for stormwater managers is to make the benefits of urban stormwater management visible to society, resulting in active co-operation of a diversity of stakeholders. Only then, will sustainable management succeed. DayWater: an Adaptive Decision Support System for Urban Stormwater Management advances this cause of sustainable urban management through Urban stormwater management, and makes achievable (by means of risk and vulnerability tools which are included) the goal of integrated urban water management (IUWM).

Anaphora Resolution and Text Retrieval Helene

Schmolz, 2015-03-30 This book covers anaphora resolution for the English language from a linguistic and computational point of view. First, a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation, all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is, a corpus of different hypertexts has been established and analysed with regard to anaphors. The most frequent type are non-finite clause anaphors - a type which has never been investigated so far. Therefore, the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval, rules for resolving non-

finite clause anaphors are established. Therefore, this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise.

The Environmental Behaviour of Polonium International Atomic Energy Agency,2018-01-31 Polonium-210 is an alpha emitting radionuclide with no radioactive progeny and produces only very-low-intensity gamma rays at very low abundance. This means doses largely arise from internal exposure. In addition to the relatively high ingestion does coefficient of ^{210}Po , radionuclide transfer in the environment results in high activity concentrations in certain foods. This publication focuses on radionuclide transfers in terrestrial, freshwater and marine environments, and provides information on key transfer processes, concepts and models--back cover.

On Their Own Terms Benjamin A. ELMAN,2009-06-30 Since the middle of the nineteenth century, imperial reformers, early Republicans, Guomindang party cadres, and Chinese Communists have all prioritized science and technology. In this book, Elman gives a nuanced account of the ways in which native Chinese science evolved over four centuries, under the influence of both Jesuit and Protestant missionaries. In the end, he argues, the Chinese produced modern science on their own terms.

The Sound of Innovation Andrew J. Nelson,2023-08-15 How a team of musicians, engineers, computer scientists, and psychologists developed computer music as an academic field and ushered in the era of digital music. In the 1960s, a team of Stanford musicians, engineers, computer scientists, and psychologists used computing in an entirely novel way: to produce and manipulate sound and create the sonic basis of new musical compositions. This group of interdisciplinary

researchers at the nascent Center for Computer Research in Music and Acoustics (CCRMA, pronounced “karma”) helped to develop computer music as an academic field, invent the technologies that underlie it, and usher in the age of digital music. In *The Sound of Innovation*, Andrew Nelson chronicles the history of CCRMA, tracing its origins in Stanford's Artificial Intelligence Laboratory through its present-day influence on Silicon Valley and digital music groups worldwide. Nelson emphasizes CCRMA's interdisciplinarity, which stimulates creativity at the intersections of fields; its commitment to open sharing and users; and its pioneering commercial engagement. He shows that Stanford's outsized influence on the emergence of digital music came from the intertwining of these three modes, which brought together diverse supporters with different aims around a field of shared interest. Nelson thus challenges long-standing assumptions about the divisions between art and science, between the humanities and technology, and between academic research and commercial applications, showing how the story of a small group of musicians reveals substantial insights about innovation. Nelson draws on extensive archival research and dozens of interviews with digital music pioneers; the book's website provides access to original historic documents and other material.

Reading Stephen King Brenda Miller Power, Jeffrey D. Wilhelm, 1997 This collection of essays grew out of the Reading Stephen King Conference held at the University of Maine in 1996. Stephen King's books have become a lightning rod for the tensions around issues of including mass market popular literature in middle and high school English classes and of who chooses what students read. King's fiction is among the most popular of pop literature, and among the most controversial. These essays spotlight the ways in which King's work intersects with the themes of the literary canon and its construction and maintenance, censorship in public schools, and the need for adolescent readers to be able to choose books in school reading

programs. The essays and their authors are: (1) Reading Stephen King: An Ethnography of an Event (Brenda Miller Power); (2) I Want to Be Typhoid Stevie (Stephen King); (3) King and Controversy in Classrooms: A Conversation between Teachers and Students (Kelly Chandler and others); (4) Of Cornflakes, Hot Dogs, Cabbages, and King (Jeffrey D. Wilhelm); (5) The 'Wanna Read' Workshop: Reading for Love (Kimberly Hill Campbell); (6) When 'IT' Comes to the Classroom (Ruth Shagoury Hubbard); (7) If Students Own Their Learning, What Do Teachers Do? (Curt Dudley-Marling); (8) Disrupting Stephen King: Engaging in Alternative Reading Practices (James Albright and Roberta F. Hammett); (9) Because Stories Matter: Authorial Reading and the Threat of Censorship (Michael W. Smith); (10) Canon Construction Ahead (Kelly Chandler); (11) King in the Classroom (Michael R. Collings); (12) King's Works and the At-Risk Student: The Broad-Based Appeal of a Canon Basher (John Skretta); (13) Reading the Cool Stuff: Students Respond to 'Pet Sematary' (Mark A. Fabrizi); (14) When Reading Horror Subliterature Isn't So Horrible (Janice V. Kristo and Rosemary A. Bamford); (15) One Book Can Hurt You...But a Thousand Never Will (Janet S. Allen); (16) In the Case of King: What May Follow (Anne E. Pooler and Constance M. Perry); and (17) Be Prepared: Developing a Censorship Policy for the Electronic Age (Abigail C. Garthwait). Appended are a joint manifesto by National Council of Teachers of English (NCTE) and International Reading Association (IRA) concerning intellectual freedom; an excerpt from a teacher's guide to selected horror short stories of Stephen King; and the conference program. Contains a 152-item reference list of literary works.(NKA)
