International Macroeconomics in the Wake of the Global Financial Crisis Laurent Ferrara,Ignacio Hernando,Daniela Marconi,2018-06-13 This book collects selected articles addressing several currently debated issues in the field of international macroeconomics. They focus on the role of the central banks in the debate on how to come to terms with the long-term decline in productivity growth, insufficient aggregate demand, high economic uncertainty and growing inequalities following the global financial crisis. Central banks are of considerable importance in this debate since understanding the sluggishness of the recovery process as well as its implications for the natural interest rate are key to assessing output gaps and the monetary policy stance. The authors argue that a more dynamic domestic and external aggregate demand helps to raise the inflation rate, easing the constraint deriving from the zero lower bound and allowing monetary policy to depart from its current ultra-accommodative position. Beyond macroeconomic factors, the book also discusses a supportive financial environment as a precondition for the rebound of global economic activity, stressing that understanding capital flows is a prerequisite for economic-policy decisions.

The Flat-Footed Flies Peter J. Chandler,2001-01-01 The Flat-footed Flies (Diptera: Opetiidae and Platyppezidae) of Europe presents a detailed account of the taxonomy,

biology and distribution of the 44 European species of Opetiidae and Platypezidae. Two of these are here described as new to science. Known larvae develop in the larger fungi; adults are honey-dew feeders on broad leaves. Both families are characterised and proposals on their relationships and phylogeny are discussed. All European species are keyed and described in detail. Adult and larval biology are reviewed. The provincial distribution of 35 species occurring in Fennoscandia and Denmark is listed in a detailed catalogue. The work presents identification keys to genera and species and for each species descriptions and accounts of its nomenclature, biology and distribution. Known early stages are keyed to genera and described under each species. Altogether 427 line drawings and 6 beautiful colour illustrations accompany the text.

Extractables and Leachables Dennis Jenke, 2022-08-02 EXTRACTABLES AND

LEACHABLES Learn to address the safety aspects of packaged drug products and medical devices Pharmaceutical drug products and medical devices are expected to be effective and safe to use. This includes minimizing patient, user or product exposure to impurities leached from these items when the drug product is administered or when the medical device is used. Clearly, patient or user exposure to leachables must not adversely impact their health and safety. Furthermore, these impurities must not adversely affect key quality attributes of the drug product or medical device, including its manufacturability, stability, efficacy, appearance, shelf-life and conformance to standards. Extractables and leachables are derived from the drug product's packaging, manufacturing systems and/or delivery systems or from the medical device's materials of construction. It is imperative to understand and quantify the release of extractables from these items, the accumulation of leachables in drug products and the release of leachables from medical devices. Once extractables and leachables have been discovered, identified and quantified, their effect on the key product or device quality attributes, including safety, must be systematically and scientifically established according to recognized, rigorous and relevant regulatory and compendial standards and industry-driven best practices. In *Extractables and Leachables*, the chemical compatibility (including safe use) of drugs (and their containers, delivery devices and manufacturing systems) and medical devices is examined at length, focusing particularly on how trace-level extractables and leachables affect the quality and safety of a medical product and how to assess the magnitude of the effect. This is accomplished by addressing the two critical activities required to develop, register and commercialize safe, effective and affordable clinical therapies; measuring extractables and leachables (chemical characterization) and assessing their impact (for example, toxicological safety risk assessment). Each of these activities is addressed in-depth, based on the existing and developing international regulations and guidelines, current published literature and the author's extensive personal experience. Written by a key contributor to standards, guidelines, recommended practices and the scientific literature, the book provides "insider" insights beyond those gained by merely reading the relevant texts. Given that the rapidly evolving extractables and leachables landscape, this book provides the most current and crucial information on new and forthcoming regulations and best practices. *Extractables and Leachables* readers will also find: A thorough summary of regulatory and compendial guidelines and the steps required to meet them A detailed and in-depth review of essential scientific principles and recommended best practices for the design, implementation, interpretation and reporting of chemical characterization studies A practical resource for optimizing the development, registration, and commercialization of safe and effective medical products A helpful tool to maximize product development and successful regulatory outcomes *Extractables and Leachables* is the essential reference for pharmaceutical scientists, analytical chemists, regulatory affairs professionals, engineers, and toxicologists in areas such as product research and development, product registration and approval, regulatory affairs, analytical science, quality control, and manufacturing.

ASEAN 2030 ADBI,2016-03-08 This book investigates long-term development issues for members of the Association of Southeast Asian Nations (ASEAN). It finds that with the proper policy mix—including domestic structural reforms and bold initiatives for regional integration—ASEAN has the potential to reach by 2030 the average quality of life enjoyed today in advanced economies and to fulfill its aspirations to become a resilient, inclusive, competitive, and harmonious (RICH) region. Key challenges moving forward are to enhance macroeconomic and financial stability, support equitable growth, promote competitiveness and innovation, and protect the environment. Overcoming these challenges to build a truly borderless economic region implies eliminating remaining barriers to the flow of goods, services, and production factors; strengthening competitiveness and the institutional framework; and updating some governing principles. But ASEAN should not merely copy the European Union. It must maintain its flexibility and pragmatism without creating a bloated regional bureaucracy. The study's main message is that through closer integration, ASEAN can form a partnership for achieving shared prosperity in the region and around the globe.

The Nimrod Review Charles Haddon-Cave, Nimrod Review, 2009-10-28 On 2 September 2006, RAF Nimrod XV230 was on a routine mission in southern Afghanistan when she suffered a catastrophic mid-air fire, leading to the total loss of the aircraft and the death of the 12 crew and two mission specialists on board. An RAF Board of Inquiry (2007) concluded that the loss was caused by a fuel escape and its ignition by contact with an exposed element of the Cross-Feed/Supplementary Cooling Pack (SCP) duct. The Nimrod Review was set up to examine the arrangements for ensuring airworthiness and safe operation of the Nimrod MR2, to assess where responsibility lies for any failure and what lessons are to be learned. The Review concludes the most likely source of fuel was an overflow during air-to-air refuelling and agrees with the ignition source. It highlights design flaws introduced at three stages in the life of XV230, and failure to heed previous potentially relevant incidents. The Nimrod safety case drawn up between 2001 and 2005 is found to be error-strewn and incompetent and characterised by a general malaise, an assumption that the Nimrod was safe because it had flown for 30 years. The Review criticises BAE Systems, the MoD Nimrod Integrated Project Team, QinetiQ and individual personnel from those organisations involved in the safety case. Organisational causes are also identified: in-service support for equipment; major organisational changes between 1998 and 2008; and delays in procurement of the Nimrod MRA4 replacement. Lessons to be learned are profound and wide-ranging. Recommendations are made for a new approach in eight key areas: principles (leadership, independence, people, simplicity); the airworthiness regime; safety cases; aged aircraft; personnel strategy; industry strategy; procurement; safety culture. The loss of XV230 was avoidable and a systemic breach of the Military Covenant.

New Quests in Stellar Astrophysics II Miguel Chavez Dagostino, Emanuele Bertone, Daniel Rosa Gonzalez, Lino Hector Rodriguez-Merino, 2009-02-27 This book presents an up-to-date collection of reviews and contributed articles in the field of ultraviolet astronomy. Its content has been mainly motivated by the recent access to the rest frame UV light of distant red galaxies, gained through large optical facilities. This driveway has derived in a renewed interest on the stars that presumably dominate or have important effects on the integrated UV properties of evolved systems of the nearby and faraway Universe. The topics included in this volume extend from the fresh spectroscopic analyses of high redshift early-type galaxies observed with the 8-10m class telescopes to the fundamental outcomes from various satellites, from the long-lived International Ultraviolet Explorer to current facilities, such as the Galaxy Evolution Explorer. This is one of the few

volumes published in recent years devoted to UV astronomical research and the only one dedicated to the properties of evolved stellar populations at these wavelengths. This contemporary panorama will be an invaluable resource in the preparation of the next planned space missions, such as the World Space Observatory and the Ultraviolet Imaging Telescope.
