Proof and Proving in Mathematics Education Gila Hanna,Michael de Villiers,2012-06-14 *THIS BOOK IS AVAILABLE AS OPEN ACCESS BOOK ON SPRINGERLINK* One of the most significant tasks facing mathematics educators is to understand the role of mathematical reasoning and proving in mathematics teaching, so that its presence in instruction can be enhanced. This challenge has been given even greater importance by the assignment to proof of a more prominent place in the mathematics curriculum at all levels. Along with this renewed emphasis, there has been an upsurge in research on the teaching and learning of proof at all grade levels, leading to a re-examination of the role of proof in the curriculum and of its relation to other forms of explanation, illustration and justification. This book, resulting from the 19th ICMI Study, brings together a variety of viewpoints on issues such as: The potential role of reasoning and proof in deepening mathematical understanding in the classroom as it does in mathematical practice. The developmental nature of mathematical reasoning and proof in teaching and learning from the earliest grades. The development of suitable curriculum materials and teacher education programs to support the teaching of proof and proving. The book considers proof and proving as complex but foundational in mathematics. Through the systematic examination of recent research this volume offers new ideas aimed at enhancing the place of proof and proving in our classrooms.

Dust Carolyn Steedman, 2002 In this witty, engaging, and challenging book, Carolyn Steedman has produced an original and sometimes irreverent investigation into how modern historiography has developed. *Dust: The Archive and Cultural History* considers our stubborn set of beliefs about an objective material world inherited from the nineteenth century with which modern history writing and its lack of such a belief, attempts to grapple. Drawing on her own published and unpublished writing, Carolyn Steedman has produced a sustained argument about the way in which history writing belongs to the currents of thought shaping the modern world. Steedman begins by asserting that in recent years much attention has been paid to the archive by those working in the humanities and social sciences; she calls this practice archivization. By definition, the archive is the repository of that which will not go away, and the book goes on to suggest that, just like dust, the matter of history can never go away or be erased. This unique work will be welcomed by all historians who want to think about what it is they do.
