Friedrich Nietzsche (1844-1900) Jürgen Backhaus, Wolfgang Drechsler, 2006-10-11 Friedrich Nietzsche's influence on the development of modern social sciences has not been well documented. This volume reconsiders some of Nietzsche's writings on economics and the science of state, pioneering a line of research up to now unavailable in English. The authors intend to provoke conversation and inspire research on the role that this much misunderstood philosopher and cultural critic has played - or should play - in the history of economics.

Ethical Business Cultures in Emerging Markets Douglas Jondle, Alexandre Ardichvili, 2017-10-26 Previous research on corporate cultures and

ethical business cultures has focused almost exclusively on studies of multinational corporations from a handful of developed countries. This book addresses the intersection of human resource development and human resource management with ethical business cultures in the four BRIC countries, and four other fast-growing emerging economies: those of Mexico, Indonesia, South Africa and Turkey. Drawing on longitudinal large-scale survey-based studies, it compares managers' and employees' perceptions of ethical business cultures in these countries, contrasting them with the US economy. It then discusses the economic and socio-cultural context and current research on business ethics in each of these countries, including implications for research and practice. This significant study will appeal to scholars, researchers and students in business ethics, management, human resource management and development, and organization studies, and addresses issues faced daily by business executives and practitioners working in emerging market countries.

Our Cosmic Habitat Martin Rees, 2017-11-21 Our universe seems strangely "biophilic," or hospitable to life. Is this happenstance, providence, or coincidence? According to cosmologist Martin Rees, the answer depends on the answer to another question, the one posed by Einstein's famous

remark: "What interests me most is whether God could have made the world differently." This highly engaging book explores the fascinating consequences of the answer being "yes." Rees explores the notion that our universe is just a part of a vast "multiverse," or ensemble of universes, in which most of the other universes are lifeless. What we call the laws of nature would then be no more than local bylaws, imposed in the aftermath of our own Big Bang. In this scenario, our cosmic habitat would be a special, possibly unique universe where the prevailing laws of physics allowed life to emerge. Rees begins by exploring the nature of our solar system and examining a range of related issues such as whether our universe is or isn't infinite. He asks, for example: How likely is life? How credible is the Big Bang theory? Rees then peers into the long-range cosmic future before tracing the causal chain backward to the beginning. He concludes by trying to untangle the paradoxical notion that our entire universe, stretching 10 billion light-years in all directions, emerged from an infinitesimal speck. As Rees argues, we may already have intimations of other universes. But the fate of the multiverse concept depends on the still-unknown bedrock nature of space and time on scales a trillion trillion times smaller than atoms, in the realm governed by the quantum physics of gravity. Expanding our comprehension of the cosmos, *Our Cosmic Habitat* will be read and enjoyed by all those--scientists and nonscientists alike--who are as fascinated by the universe we inhabit as is the author himself.

The Almighty Black P Stone Nation Natalie Y. Moore, Lance Williams, 2011 In gangster lore, the Almighty Black P Stone Nation stands out among the most notorious of street gangs. Louis Farrakhan hired the Blackstone Rangers as his Angels of Death. Fifteen years before 9/11, the U.S. government accused the Stones of plotting domestic terrorist acts with Libyan leader Muammar Qaddafi. And currently, founding member Jeff Fort is serving a triple life sentence at the only U.S. federal supermax prison. Were the Stones criminals, brainwashed terrorists, victims of their circumstances, or champions of social change? Or were they all of these, their role perceived differently by different races and socioeconomic groups? Authors Natalie Y. Moore and Lance Williams answer these and other questions in this provocative tale that explores how teens from a poverty-stricken Chicago neighborhood built a powerful organization that united 21 individual gangs into a virtual nation. With a colorful cast of characters, from white liberal do-gooders, vocal black nationalists, and hardworking community organizers to the members of the Nation of Islam and overzealous law enforcement officers, *The Almighty Black P Stone Nation* details how the U.S. government funded the gang with money during the War on Poverty; how law enforcement used the gang to gain headlines and increase its own funding during the War on Drugs; and how federal prosecutors successfully argued that leader Fort masterminded a deal for \$2.5 million to commit acts of terrorism in the United States on behalf of Libya, setting the stage for prosecutors to link U.S. street gangs to terrorists from Arab states. A fascinating look inside the evolution of a gang that went from street-corner teens to convicted terrorists, *The Almighty Black P Stone Nation* is not only an exciting story but also a timely look at urban crime and violence, an exploration of how and why gangs flourish, and an expose of the way in which minority crime is targeted in the community, reported in the media, and prosecuted in the courts.

Unrestricted Warfare Liang Qiao, Xiangsui Wang, 2002 Three years before the September 11 bombing of the World Trade Center—a Chinese military manual called *Unrestricted Warfare* touted such an attack—suggesting it would be difficult for the U.S. military to cope with. The events of September 11 were not a random act perpetrated by independent agents. The doctrine of total war outlined in *Unrestricted Warfare* clearly demonstrates that the People's Republic of China is preparing to confront the United States and our allies by conducting asymmetrical or multidimensional attack on almost every aspect of our social, economic and political life.
