Contemporary Chinese Print Media Zheng

Yi, 2013-10-01 This book examines the transformations in form, genre, and content of contemporary Chinese print media. It describes and analyses the role of post-reform social stratification in the media, focusing particularly on how the changing practices and institutions of the industry correspond to and accelerate the emergence of a relatively affluent urban leisure-reading market. It argues that this reinvention of Chinese print media vis-à-vis the creation of a post-socialist taste (class) culture is an essential part of the cultural and affective transformations in contemporary Chinese society, and demonstrates how the reinvention of such taste culture effectively creates, through new kinds of reading materials and carefully demarcated target audiences, a middle-class civility that serves as the locus of the new niche media market.

The Red Mark On God's Forehead Rabbi Darryl Weinberg, 2022-10-14 A book that will shake the modern-day church to its core, *The Red Mark on God's Forehead* trumpets the call to Christians to return to the true roots of their faith—the worship of God as He commands in the Torah. In an engaging and thought-provoking manner, Darryl Weinberg outlines the path Christianity has taken, lured by pagan practices, away from God's plan for His people and toward the crisis facing us in these end times. The ultimate end of this journey is the denial of Messiah Himself. From moving the Sabbath from Saturday to Sunday, to its troubling involvement in festivals such as Easter, Christmas, Valentine's Day, and Halloween, the Church has grieved the heart of God, splintered its own unity, and engaged in a lifestyle abhorrent to the Lord. Most shocking, however, is the thorough exploration of the outright anti-Semitic sentiment, particularly as expressed in

the Church Fathers, that led us to this point. Through this troubling message, however, shines a light of great hope. Our ever-merciful, loving God desires to draw us back to the true worship and lifestyle that brings us into fellowship with Him. He is anxious to forgive and redeem, and His Word contains all that is needed to serve and worship Him in spirit and in truth.

Analysing Women's Imprisonment Pat Carlen, Anne Worrall, 2013-01-11 In both the UK and the rest of the world there have been rapid increases in the numbers of women in prison, which has led to an acceleration of interest in women's crimes and the social control of women, and women's experience of both prison and the criminal justice system is very different to men's. This text is concerned to address the key issues relating to women's imprisonment, contributing at the same time to an understanding of prison issues in general and the historical and contemporary politics of gender and penal justice. What are women's prisons for? What are they like? Why are lone mothers, ethnic minority and very poor women disproportionately represented in the women's prison population? Should babies be sent to prison with their mothers? These are amongst the issues with which this book is concerned. *Analysing Women's Imprisonment* is written as an introductory text to the subject, aiming to guide students of penology carefully through the main historical and contemporary discourses on women's imprisonment. Each chapter has a clear summary ('concepts to know'), essay questions and recommendations for further reading, and will help students prepare confidently for seminars, course examinations and project work.

Origins of the Organic Agriculture Debate Thomas R. DeGregori, 2008-02-28 *Origins of the Organic Agriculture Debate* takes an historical look at two contrasting streams of ideas. The first view

comprises the flow of ideas in chemistry and biology that have created the conditions for modern medicine, modern food production and the biotechnological revolution. The second view is the vitalist reaction to the rise of modern science and the resulting rejection of modern agriculture. Contemporary proponents of organic agriculture and the anti-genetically modified food movement believe that pure food confers some special kind of virtue both on those who produce it and those who consume it. They fail to acknowledge that organic chemistry, genetics, and molecular biology have been as essential to twentieth century advances in agriculture such as plant breeding, and are instrumental to ensuring that there is enough food for everyone. Origins of the Organic Agriculture Debate Begins with an exploration of the factors involved in our modern fear of technology, a fear which forms the foundation for anti-technology beliefs and practices. Argues that vitalism is at the core of an array of contemporary anti-science and anti-technology movements. Helps readers fully understand the ferocity with which certain beliefs about homeopathic medicine and the organic are held against all evidence to the contrary. Explains the history of nitrogen in life and in agriculture, countering myths of scarce resources and beliefs about the sufficiency of organic nitrogen to feed the world's population. Purports that technology creates resources, debunking the idea that resources are natural, fixed and finite. Updates and clarifies issues discussed in the author's previous works: *A Theory of Technology* (1985), *Agriculture and Modern Technology* (2001) and *The Environment, Our Natural Resources and Modern Technology* (2002). We need to better understand the forces of scientific and technological change if we are to control the negative elements of these forces, continue to

advance the development of science and technology, and facilitate fuller participation in the benefits of our advancing capability to further the human endeavor. Origins of the Organic Agriculture Debate will provide a basis for this understanding.

Japan and the shaping of post-Vietnam War Southeast Asia Andrea Pressello, 2017-09-05 The Vietnamese invasion of Cambodia in 1978 and the consequent outbreak of the Cambodian conflict brought Southeast Asia into instability and deteriorated relations between Vietnam and the subsequently established Vietnam-backed government in Cambodia on the one hand and the Association of Southeast Asian Nations (ASEAN) countries on the other. As a result of the conflict, the Soviet Union established a foothold in Southeast Asia while China, through its support of the anti-Vietnam Cambodian resistance, improved relations with Southeast Asian countries such as Thailand. Japan's Fukuda Doctrine - it's declared priorities of promoting cooperative and friendly relations between Communist Indochinese nations and non-Communist ASEAN countries - became increasingly at odds with Japan's role as a member of the Free World in the broader Cold War confrontation. Tokyo had to steer a path between Washington's hard-line policy of isolating Vietnam and its own desire to prevent regional destabilization. Against this background, this book addresses the following questions: what was Japan's response to the challenges to its objectives and interests in Southeast Asia and to the Fukuda Doctrine? What role did Japan play for the settlement of the conflict in Cambodia? How did Japan's diplomacy on the Cambodian problem affect the Japanese role in the region? It argues that Japan's contribution was more active than has widely been recognized.

China's New Red Guards Jude Blanchette,2019 In *China's New Red Guards*, Jude Blanchette illuminates two trends in contemporary China that point to its revival of Mao Zedong's legacy—a development that he argues will result in a more authoritarian and more militaristic China. This book not only will reshape our understanding of the political forces driving contemporary China, it will also demonstrates how ideologies can survive and prosper despite pervasive rumors of their demise.

China's Encounter with Global Hollywood Wendy Su,2016-05-13 This work explores the global-local interplay through the case study of the People's Republic of China's encounter with global Hollywood from the mid-1990s to 2013. It analyzes the changing role of the Chinese state and its evolving cultural policy; investigates the intertwined relationships among the Chinese state, global capital, and local dynamics; and examines the impact of this encounter on the Chinese film sector's radical transformation from a Soviet-style planned economy and state ownership model to a market-oriented cultural industry.

Exiting TARP and Unwinding Its Impact on the Financial Markets Elizabeth Warren, 2011

Revolutionising EU Innovation Policy Klaus Gretschmann, Stefan Schepers, 2016-07-28 The purpose of this ground-breaking book is to inspire the

principle of innovation as a permeating program for Europe's societies. After demonstrating early success from the realization of a single market and single currency, the European cooperation process is falling short of delivering much needed results in policy areas which are key for sustainable economic growth and employment, notably innovation policy. Written by authors involved in an independent tripartite High Level Group on EU innovation policy management, *Revolutionising EU Innovation Policy* analyses the principle causes and offers solutions in order to increase both efficacy and democratic accountability. Presenting the benefits of an overarching innovation policy, the authors draw attention to issues that have been overlooked by research and technology based approaches to innovation, for example culture and education. Importantly, the book examines the interplay between EU innovation policies and the demands of businesses, enterprises, and social and political organizations to fully deploy their innovation potential.

Fentanyl, Inc. Ben Westhoff, 2019-09-03 A four-year investigation into the world of synthetic drugs—from black market factories to users & dealers to harm reduction activists—and what it revealed. A deeply human story, *Fentanyl, Inc.* is the first deep-dive investigation of a hazardous and illicit industry that has created a worldwide epidemic, ravaging communities and overwhelming and confounding government agencies that are challenged to combat it. “A whole new crop of chemicals is radically changing the recreational drug landscape,” writes Ben Westhoff. “These are

known as Novel Psychoactive Substances (NPS) and they include replacements for known drugs like heroin, cocaine, ecstasy, and marijuana. They are synthetic, made in a laboratory, and are much more potent than traditional drugs"—and all-too-often tragically lethal. Drugs like fentanyl, K2, and Spice—and those with arcane acronyms like 25i-NBOMe—were all originally conceived in legitimate laboratories for proper scientific and medicinal purposes. Their formulas were then hijacked and manufactured by rogue chemists, largely in China, who change their molecular structures to stay ahead of the law, making the drugs' effects impossible to predict. Westhoff has infiltrated this shadowy world. He tracks down the little-known scientists who invented these drugs and inadvertently killed thousands, as well as a mysterious drug baron who turned the law upside down in his home country of New Zealand. Westhoff visits the shady factories in China from which these drugs emanate, providing startling and original reporting on how China's vast chemical industry operates, and how the Chinese government subsidizes it. Poignantly, he chronicles the lives of addicted users and dealers, families of victims, law enforcement officers, and underground drug awareness organizers in the United States and Europe. Together they represent the shocking and riveting full anatomy of a calamity we are just beginning to understand. From its depths, as Westhoff relates, are emerging new strategies that may provide essential long-term solutions to the drug crisis that has affected so many. "Timely and agonizing. . . . An impressive work of investigative journalism." —USA Today "Westhoff explores the many-tentacled world of illicit opioids, from the streets of East St. Louis to Chinese pharmaceutical companies, from music festivals deep in the Michigan woods to sanctioned 'shooting up rooms' in Barcelona, in this frank,

insightful, and occasionally searing exposé. . . . Westhoff's well-reported and researched work will likely open eyes, slow knee-jerk responses, and start much needed conversations." –Publishers Weekly "Our 25 Favorite Books of 2019" –St. Louis Post-Dispatch "Best Books of 2019" –Buzzfeed "Best Nonfiction of 2019" –Kirkus Reviews "50 Best Books of 2019" –Daily Telegraph "Best Nonfiction Books of 2019" –Tyler Cowen "Best Books of 2019" –Yahoo Finance

Documentary, World History, and National Power in the PRC Gotelind Mueller, 2013-10-30

Documentaries have recently become a favourite format for Chinese state-directed media to present an officially sanctioned view of history. Indeed, this is not confined to Chinese national history. In stark contrast to the earlier self-centred preoccupation with Chinese history, there has been an upsurge in interest in foreign history, with a view to illuminating China's role not only in world history, but also on the global stage today, and in the future. This book examines three recent Chinese documentary television series which present the officially sanctioned view of the rise of the modern West, the reasons for the end of the Soviet Union, and the legitimisation of the present-day Chinese government via a specific reading of modern Chinese history to argue for a 'Chinese rise' in the future. With a focus on these documentaries, Gotelind Müller discusses how history is presented on screen, and explores the function of visual history for memory culture and wider society. Further, this book reveals how the presentation of Chinese and foreign history in a global framework impacts on the officially transmitted views on Self and Other, and thus provides a keen insight into how the Chinese themselves regard their 'global rise'.

Documentary, World History, and National Power in the PRC will be welcomed by students and scholars

working across a number of fields, including Chinese studies, East Asian studies, media studies, television studies, history and memory studies.
