*Landscapes of Realism* Dirk Göttsche, Rosa Mucignat, Robert Weninger, 2021-04-15 Few literary phenomena are as elusive and yet as persistent as realism. While it responds to the perennial impulse to use literature to reflect on experience, it also designates a specific set of literary and artistic practices that emerged in response to Western modernity. *Landscapes of Realism* is a two-volume collaborative interdisciplinary exploration of this vast territory, bringing together leading-edge new criticism on the realist paradigms that were first articulated in nineteenth-century Europe but have since gone on globally to transform the literary landscape. Tracing the manifold ways in which these paradigms are developed, discussed and contested across time, space, cultures and media, this first volume tackles in its five core essays and twenty-five case studies such questions as why realism emerged when it did, why and how it developed such a transformative dynamic across languages, to what extent realist poetics remain central to art and popular culture after 1900, and how generally to reassess realism from a twenty-first-century comparative perspective.

**The Science of War** Michael E. O'Hanlon, 2013-04-21 The U.S. military is one of the largest and most complex organizations in the world. How it spends its money, chooses tactics, and allocates its resources have enormous implications for national defense and the economy. *The Science of War* is the only comprehensive textbook on how to analyze and understand these and other essential problems in modern defense policy. Michael O'Hanlon provides undergraduate and graduate students with an accessible yet rigorous introduction to the subject. Drawing on a broad range of sources and his own considerable expertise as a defense analyst and teacher, he describes the analytic techniques the military uses in every crucial area of military science. O'Hanlon explains how the military budget works, how the military assesses and deploys new technology, develops strategy and fights wars, handles the logistics of stationing and moving troops and equipment around the world, and models and evaluates battlefield outcomes. His modeling techniques have been tested in Iraq and Afghanistan, including the methods he used to predict higher-than-anticipated troop fatalities in Iraq--controversial predictions that have since been vindicated. *The Science of War* is the definitive resource on warfare in the twenty-first century. Gives the best introduction to defense analysis available Covers defense budgeting Shows how to model and predict outcomes in war Explains military logistics, including overseas basing Examines key issues in military technology, including missile defense, space warfare, and nuclear-weapons testing Based on the author's graduate-level courses at Princeton, Columbia, and Georgetown universities

*The Quotable Augustine: Distinctively Catholic Elements in His Theology* Dave Armstrong, 2012-09-01 Protestants (especially Reformed Protestants, or Calvinists) often assert that St. Augustine's views were closer to theirs than to the present-day Catholic Church. My aim is to systematically document St. Augustine's advocacy of positions that historic Protestantism has expressly rejected, and (conversely) detail his opposition to some doctrines or beliefs that it has (generally speaking) espoused. Quotations are drawn from 44 separate works of St. Augustine, arranged under 157 topics, and also arranged chronologically within topics, insofar as that can be determined. This helps to clarify any development in Augustine's views. Editorial input is kept to an absolute minimum: confined to an occasional bracketed clarification (usually a contextual matter or reference) or briefly stated fact considered to be indispensable in understanding some aspect of the quotation. I'm delighted to pass along to readers a capsulized version of St. Augustine's wonderful and eloquent theological writing.

**Evil and International Relations** R. Jeffery, 2007-12-25 This book seeks to determine what is meant by 'evil' when used to describe actors and events in international politics. Focusing on the history of evil in western secular and religious thought, it reintroduces a classical understanding of evil as the means to which we seek to understand otherwise meaningless human suffering.

*Exploring Heavenly Places - Volume 7 - Discernment Encyclopedia for God's Spiritual Creation* Paul Cox, Barbara Parker, 2017-09-20 This is perhaps one of the most unusual books in the world! Taking over twenty-six years to develop, it documents the spiritual realities of the heavenly places as

mentioned in the Bible. In a stunning departure from traditional and commonly accepted theological views, the authors acknowledge what the Word of God so clearly articulates; just as the physical world contains a wide variety of beings and other created things, so does the spiritual world. Within the pages of this book you will find over 100 entries that clearly identify multiple aspects of the Holy Trinity, as well as diverse and unique spiritual beings, entities and places. This resource will help you learn how to discern each entry by observing how others are able to sense each spiritual reality with the five physical senses; it is a tool that will train you to know what the Father is doing in the heavenly places so you can model Jesus' life on earth.

**Confronting Evil in International Relations** R. Jeffery, 2008-05-26 This book offers original essays on the subject of evil in international relations. It considers questions of moral agency associated with the perpetration of evil acts by individuals and groups in the international sphere, and the range of ethical responses the international community has available to it in the aftermath of large-scale evils.

Dynamic Stochastic Optimization Kurt Marti, Yuri Ermoliev, Georg Ch. Pflug, 2012-12-06 Uncertainties and changes are pervasive characteristics of modern systems involving interactions between humans, economics, nature and technology. These systems are often too complex to allow for precise evaluations and, as a result, the lack of proper management (control) may create significant risks. In order to develop robust strategies we need approaches which explicitly deal with uncertainties, risks and changing conditions. One rather general approach is to characterize (explicitly or implicitly) uncertainties by objective or subjective probabilities (measures of confidence or belief). This leads us to stochastic optimization problems which can rarely be solved by using the standard deterministic optimization and optimal control methods. In the stochastic optimization the accent is on problems with a large number of decision and random variables, and consequently the focus of attention is directed to efficient solution procedures rather than to (analytical) closed-form solutions. Objective and constraint functions of dynamic stochastic optimization problems have the form of multidimensional integrals of rather involved in that may have a nonsmooth and even discontinuous character - the typical situation for hit-or-miss type of decision making problems involving irreversibility of decisions or/and abrupt changes of the system. In general, the exact evaluation of such functions (as is assumed in the standard optimization and control theory) is practically impossible. Also, the problem does not often possess the separability properties that allow to derive the standard in control theory recursive (Bellman) equations.

*Developments in Central and East European Politics 3* Stephen White, Judy Batt, Paul G. Lewis, 2003

*Migration, Regional Integration and Human Security* Harald Kleinschmidt, 2017-03-02 This original and timely book is the first to analyze the interconnectedness of migration, regional integration and the new security studies. Exploring the conflict between the actions of transnational migrants and state government policy in a series of theoretical chapters and regional case-studies, the book includes theoretical chapters which look at three key facets of the nation-state: population, territory and government, discussing the ways in which migration, regional integration and new security thinking challenge the accepted role and responsibilities of the state. Regional case-studies are also included which explore the specific challenges faced in regions including Central America, Asia and the Pacific and Central and Eastern Europe. As a book that asks crucial questions about the formulation of migration policies and the consequences of that success or failure, it will be essential reading for students and scholars of migration in sociology, politics and international relations and also for those with professional interests in the area.

*The Philosophy of Early Christianity in the Era of Digitalisation* Yip Mei Loh,2021-06-02 The benefits of the digital age are huge. Our lives have been transformed, both in the developed and the undeveloped world. However, this transformation has its dark side. The same powerful technologies have enabled cultural or religious grooming to flourish, unmoderated social 'influencing' to have free reign, fake information to spread, and sophisticated hackers to create destabilizing international mayhem. What place does the Church have in all this? How does it respond? What about the master philosophers of the neo-Platonic age, whose wisdom, borne of the great philosopher himself, was formed through the emerging doctrines of the early Christian church? The excellent and thought-provoking essays gathered here provide answers to these questions and more.

**Values and Choices in Television Discourse** Roberta Piazza,Louann Haarman,Anne Caborn,2016-04-29 The high-pressured, fast-paced environment of television production leaves little time for producers to reflect on how the potentialities of texts and images will be interpreted outside of the immediate broadcast imperatives. This volume brings together the producers and analysts of television in a formal and productive way.

The Duty of Care of International Organizations Towards Their Civilian Personnel Andrea de Guttry,Micaela Frulli,Edoardo Greppi,Chiara Macchi,2018-08-17 This book constitutes the first comprehensive publication on the duty of care of international organizations towards their civilian personnel sent on missions and assignments outside of their normal place of activity. While the work of the civilian personnel of international organizations often carries an inherent risk, the regulations, policies and practices of the employer can help to address and mitigate that risk. In this book, the specific content and scope of the duty of care under international law is clarified by conducting an unprecedented investigation into relevant jurisprudence and legal sources. Included is a critical assessment of the policies of selected international organizations while a set of guiding principles on the duty of care of international organizations is also presented. This publication fills a gap in the existing academic literature on the topic and is aimed particularly at academics and practitioners interested in the legal implications of the deployment of civilian personnel abroad by international organizations. This includes scholars and university-level students specializing in international law, international human rights law, the law of international organizations, labour law, EU law, international administrative law and the UN system, and practitioners, such as lawyers and consultants, representing or advising international organizations or their personnel on the legal aspects of deployment. The book is also aimed at the senior management of international organizations and at their officers in charge of recruitment, human resources, training and security, in that it clarifies their legal obligations and provides concrete examples of the policies various international organizations have in place for the protection of civilian personnel. Current and prospective civilian personnel of international organizations should also find the book useful for clarifying their rights and duties. Andrea de Guttry is Full Professor at the Dirpolis Institute of the Sant'Anna School of Advanced Studies in Pisa, Micaela Frulli is Associate Professor at the Dipartimento di Scienze Giuridiche (DSG), University of Florence, Edoardo Greppi is Full Professor at the Dipartimento di Giurisprudenza,

University of Turin, and Chiara Macchi is Research Fellow at theDirpolis Institute of the Sant'Anna School of Advanced Studies in Pisa.

**Ending Wars** Feargal Cochrane,2013-08-23 Many books have been written about war, but few have focused on how wars can be brought to an end. Wars are rarely inevitable however and this book is aimed at understanding how violent conflicts can be brought to a close through intervention, mediation and political negotiation. The simple premise underlying the book is that wars between states and wars within states are generally fought by rational people for particular political goals or perceived interests. War is better understood as a methodology rather than an ideology. When the context, issues and actors in these armed conflicts change then it is often possible to control, or even transform such violence. By bringing together a number of existing debates from peace and conflict research as well as scholars of international relations, the book examines the dynamic forces that lie behind the ending of wars and how these have changed over time. Examples are drawn from a wide range of armed conflicts to analyse the efforts that have been made to move from War-War to Jaw-Jaw, or more typically Jaw-War. Efforts at third-party intervention, mediation and political negotiation across a range of conflict zones from Europe to Sub-Saharan Africa are discussed in full. Neither idealistic nor fatalistic, this book is a must-read for all students of international politics and security studies.

Strategic Frames Jennie L. Schulze,2018-03-16 Strategic Frames analyzes minority policies in Estonia and Latvia following their independence from the Soviet Union. It weighs the powerful influence of both Europe and Russia on their policy choices, and how this intersected with the costs and benefits of policy changes for the politicians in each state. Prior to EU accession, policymakers were slow to adopt minority-friendly policies for ethnic Russians despite mandates from the European Union. These initiatives faced majority opposition, and politicians sought to maintain the status quo and their positions. As Jennie L. Schulze reveals, despite the credit given to the democratizing influence of European institutions, they have rarely produced significant policy changes alone, and then only when domestic constraints were low. Whenever domestic opposition was high, Russian frames were crucial for the passage of reforms. In these cases, Russia's activism on behalf of Russian speakers reinforced European frames, providing powerful justifications for reform. Schulze's attention to both the strategic framing and counter framing of external actors explains the controversies, delays, and suboptimal outcomes surrounding the passage of "conditional" amendments in both cases, as well as the local political climate postaccession. Strategic Frames offers a significant reference on recent developments in two former Soviet states and the rapidly evolving spheres of political influence in the postindependence era that will serve students, scholars, and policymakers alike.
