Forensic Engineering Stephen E. Petty,2021-09-23 Serving as a comprehensive resource that builds a bridge between engineering disciplines and the building sciences and trades, *Forensic Engineering: Damage Assessments for Residential and Commercial Structures, Second Edition* provides an extensive look into the world of forensic engineering. Focusing on investigations associated with insurance industry claims, the book describes methodologies for performing insurance-related investigations, including the causation and origin of damage to residential and commercial structures and/or unhealthy interior environments and adverse effects on the occupants of these structures. Edited by an industry expert with more than 40 years of experience and contributors with more than 100 years of experience in the field, the book takes the technical aspects of engineering and scientific principles and applies them to real-world issues in a nontechnical manner. The book provides readers with the experiences, investigation methodologies, and investigation protocols used in and derived from thousands of forensic engineering investigations. **FEATURES** Covers 24 topics in forensic engineering based on thousands of actual field investigations Provides a proven methodology based on engineering and scientific principles, experience, and common sense to determine the causes of forensic failures pertaining to residential and commercial properties Includes references to many codes, standards, technical literature, and industry best practices Illustrates detailed and informative examples utilizing color photographs and figures for

industry best practices as well as to identify improper installations Combines information from a multitude of resources into one succinct, easy-to-use guide This book details proven methodologies based on over 10,000 field investigations in which the related strategies can be practically applied and appreciated by both professionals and laymen alike.

Public Private Partnership: Asian Perspectives - Recommendations for Azerbaijan Mahir Humbatov, Nikita Singla, 2016-12-12 As the world makes great strides on the path to development, the gap between infrastructure needs and the resources governments possess to meet those needs is ever growing on account of governments' razor thin budgets, rapid urbanization and population growth. Asia's overall infrastructure investment needs are estimated at USD 9 trillion till 2030, 68% of which is for new capacity and 32% for maintaining and replacing existing infrastructure. The average annual infrastructure investment during this period is about USD 750 billion. As countries move up the value chain and urban populations expand, demand for transport, logistics and utilities will only continue to grow, increasing the burden on public funds. If cash-flushed investors have an appetite for Asia's infrastructure projects, what is keeping them at bay? For infrastructure development, statistics show that Asian nations have been turning to Public Private Partnerships (PPP), which seemed to be one of the main tools to attract financing and keep pace with rapid growth. Although the PPP models are established in several Asian countries, such as Singapore, South Korea and Japan, others are relatively immature. Indonesia, China and India, in particular, have announced ambitious infrastructure programs with governments developing mechanisms to encourage PPP investment and address barriers to PPP development. The new game-changers of the 21st century – India and China are showing aggressive signs of opening their domestic markets to international investors. While PPPs hold significant potential for Asia, they also present formidable challenges. Case studies of PPP markets in Australia, China, India, Indonesia, Japan, Korea, Malaysia, Singapore and Thailand provide an Asian perspective enabling recommendations for Azerbaijan. The Azerbaijani government has achieved great progress over the last decade in integrating the country into the global economic marketplace and increasing foreign investment mainly due to its oil resources. Now, the government's focus is on diversifying the economy outside the oil sector. Azerbaijan is facing increasing demand for investment in infrastructure development, overstressing the government's budget. There is need for not only private sector investment but also private sector knowledge and expertise. The traditional approach of the government for infrastructure development of any kind has been to use the state's own budget or privatization. The first is markedly insufficient to meet the country's needs while the

latter only works in a sound legal and financial framework and is not appropriate for all public service delivery projects. So there is a need to see if the time is ripe for public private partnerships. PPPs may not be the ultimate solution, but they can help address many of the issues systemic to the region in the field of infrastructure development. All it needs is a systematic approach undertaken through joint efforts of private and public sectors.

Communism Tom Lansford,2008 Communism has had a dramatic rise and fall as a political system in the last century. Communism by Tom Lansford looks at the historic roots of this form of government, its political and economic components, how it compares with other types of government systems, and the likely reasons for its almost complete demise as a twenty-first century political system. On The Move to Meaningful Internet Systems 2003: CoopIS, DOA, and ODBASE Zahir Tari,Douglas C. Schmidt,2003-10-25 missions in fact also treat an envisaged mutual impact among them. As for the 2002 edition in Irvine, the organizers wanted to stimulate this cross-pollination with a program of shared famous keynote speakers (this year we got Sycara, - ble, Soley and Mylopoulos!), and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice. We received an even larger number of submissions than last year for the three conferences (360 in total) and the workshops (170 in total). Not only can we therefore again claim a measurable success in attracting a representative

volume of scientific papers, but such a harvest allowed the program committees of course to compose a high-quality cross-section of worldwide research in the areas covered. In spite of the increased number of submissions, the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 (i. e. , around 1 paper out of every 4–5 submitted). For the workshops, the acceptance rate was about 1 in 2. Also for this reason, we decided to separate the proceedings into two volumes with their own titles, and we are grateful to Springer-Verlag for their collaboration in producing these two books. The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees.

Narrative(s) in Conflict Wolfgang Müller-Funk, Clemens Ruthner, 2017-11-07 *Narrative/s in Conflict* presents the proceedings of an international workshop, held at the Trinity Long Room Hub Dublin in 2013, to a wider audience. This was a cross-disciplinary cooperation between the comparative research network 'Broken Narratives' (University of Vienna), the research strand 'Identities in Transformation' (Trinity College Dublin) and the Graduate Center for the Study of Culture at the University of Giessen. What has brought this informal network together is its credo that theories of narrative should be regarded as an integral part of cultural analysis. Choosing exemplary case studies from early Habsburg days up to the wars and genocides of the 20th century and the post-9/11 'War on terror', our volume tries to analyze the relation between representation and conflict, i.e. between narrative constructions, social/historical processes, and cultural agon. Here it is crucial to state that narratives do not simply and passively 'mirror' conflicts as the conventional 'realistic' paradigm suggests; they rather provide a symbolic, sense-making matrix, and even a performative dimension. It even can be said that in many cases, narratives make conflicts.

Creating a Sustainable Social Ecology Using Technology-driven Solutions Elias G. Carayannis, 2013 As advancements in technology continue to influence all facets of society, its aspects have been utilized in order to find solutions to emerging ecological issues. *Creating a Sustainable Ecology Using Technology-Driven Solutions* highlights matters that relate to technology driven solutions towards the combination of social ecology and sustainable development. This publication addresses the issues of development in advancing and transitioning economies through creating new ideas and solutions; making it useful for researchers, practitioners, and policy makers in the socioeconomic sectors.

A Practical Guide to Sport Management Internships John Miller,Todd L. Seidler,2010 To meet the demand of the industry, university sport management students must possess experience. The internship experience has been identified as the most critical element for the professional preparation of future sport managers. Since many students may have a peripheral understanding of the inner workings of the sport industry, *A Practical Guide to Sport Management Internships* is designed to offer undergraduate and graduate students as well as the internship supervisor in-depth pedagogical and legal insights to be better prepared for the experience. Miller and Seidler have compiled a nifty resource that provides an overview of the role of internships in sport management programs... Along with discussions useful to faculty looking to establish or enhance an internship program, they address the different types of internships to consider and various tools for students... Summing Up: Recommended. -- CHOICE Magazine, September 2010

Writing the Jerusalem Pilgrimage in the Late Middle Ages Mary Boyle,2021 What do the bursar of Eton College, a canon of Mainz Cathedral, a young knight from near Cologne, and a Kentish nobleman's chaplain have in common? Two Germans, residents of the Holy Roman Empire, and two Englishmen, just as the western horizons of the known world were beginning to expand. These four men - William Wey, Bernhard von Breydenbach, Arnold von Harff, and Thomas Larke - are amongst the thousands of western Christians who undertook the arduous journey to the Holy Land in the decades immediately before the Reformation. More importantly, they are members of a much more select group: those who left written accounts of their travels, for the journey to Jerusalem in the late Middle Ages took place not only in the physical world, but also in the mind and on the page. Pilgrim authors contended in different ways with the collision between fifteenth-century reality and the static textual Jerusalem, as they encountered the genuinely multi-religious Middle East. This book examines the international literary phenomenon of the Jerusalem pilgrimage through the prism of these four writers. It explores the process of collective and individual identity construction, as pilgrims came into contact with members of other religious traditions in the course of the expression of their own; engages with the uneasy relationship between curiosity and pilgrimage; and investigates both the

relevance of genre and the advent of print to the development of pilgrimage writing. Ultimately pilgrimage is revealed as a conceptual space with a near-liturgical status, unrestricted by geographical boundaries and accessible both literally and virtually.
