The Quotable Augustine: Distinctively Catholic Elements in His Theology Dave

Armstrong, 2012-09-01 Protestants (especially Reformed Protestants, or Calvinists) often assert that St. Augustine's views were closer to theirs than to the present-day Catholic Church. My aim is to systematically document St. Augustine's advocacy of positions that historic Protestantism has expressly rejected, and (conversely) detail his opposition to some doctrines or beliefs that it has (generally speaking) espoused. Quotations are drawn from 44 separate works of St. Augustine, arranged under 157 topics, and also arranged chronologically within topics, insofar as that can be determined. This helps to clarify any development in Augustine's views. Editorial input is kept to an absolute minimum: confined to an occasional bracketed clarification (usually a contextual matter or reference) or briefly stated fact considered to be indispensable in understanding some aspect of the quotation. I'm delighted to pass along to readers a capsulized version of St. Augustine's wonderful and eloquent theological writing.

Iran's Foreign Policy in the South Caucasus Marzieh Kouhi-Esfahani, 2019-01-10 Iran's role as a regional power is more significant than many in the West may realise. The country lies between Central Asia/the Caucasus and the Gulf region on the one hand, and, on the other, between the Mediterranean/Levant region and South Asia. Many of these areas are of increasing strategic importance. This book explores Iran's role as a regional power, focusing on relations with South Caucasus countries - Azerbaijan and Armenia. It outlines the historical context, including Persia's rule of these countries before the nineteenth century, and discusses Iran's approach to foreign and regional policy and how both internal and international factors shape these policies. The book assesses Iran-Azerbaijan and Iran-Armenia bilateral relations to demonstrate how those policies translate in Iran's regional and bilateral relations. The book concludes by considering how Iran's relations in the region are likely to develop in the future.

God and Dreams John Pratt Bingham, 2010-01-01 At one time when an individual wanted a direct, personal experience of God that person turned to his or her dreams. The early third century Christian defender of the faith, Tertullian, observed, Is it not known to all people that the dream is

the most usual way that God reveals himself to man? Yet by the eleventh century, King William II of England states, They are not good Christians that regard dreams. Why did this reversal of opinion occur, not only in Christian thinking, but in Jewish and Islamic attitudes also? God and Dreams: Is There a Connection? traces the historic connection between God and dreams and examines why this shift happened. While particular attention is given to Jewish, Christian, and Islamic thought, several secular disciplines are discussed also. After investigating the different points of view, an argument is made that the connection between God and dreams still exists.

Airline Choices for the Future Kostas Iatrou, Mauro Oretti, 2016-03-16 Airline Choices for the Future: From Alliances to Mergers offers an up-to-date assessment of the industry as it stands today, delivering a comprehensive insight into how the world of airline alliances is changing, and how the merger phenomenon is likely to fit into the new scenario. The purpose of this book is twofold. Firstly, it outlines the evolution and the reasons behind alliances between international air carriers, the alliances' track records and the way they have affected airlines and the air transport industry. Secondly, drawing on past and more recent developments in the industry, it examines the experiences airlines involved in cross-border mergers have gone through and the advantages and difficulties they have come across. Alliances and mergers are presented from both the airline and the consumer perspective. The book provides a balanced account of where mergers and alliances have taken the industry to date, bridging the gap between merger theory and implemented practices and strategies. It also identifies the challenges alliances and cross-border mergers have faced and highlights the key forces affecting airline development. Theoretical evidence is supplemented by data collected via surveys and interviews with airline executives, aviation experts, consultants and regulatory bodies.

Nuclear Logics Etel Solingen, 2009-02-09 Nuclear Logics examines why some states seek nuclear weapons while others renounce them. Looking closely at nine cases in East Asia and the Middle East, Etel Solingen finds two distinct regional patterns. In East Asia, the norm since the late 1960s has been to forswear nuclear weapons, and North Korea, which makes no secret of its nuclear ambitions, is the anomaly. In the Middle East the opposite is the case, with Iran, Iraq, Israel, and Libya suspected of pursuing nuclear-weapons capabilities, with Egypt as the anomaly in recent decades. Identifying the domestic conditions underlying these divergent paths, Solingen argues that there are clear differences between states whose leaders advocate integration in the global economy and those that reject it. Among the former are countries like South Korea, Taiwan, and Japan, whose leaders have had stronger incentives to avoid the political, economic, and other costs of acquiring nuclear weapons. The latter, as in most cases in the Middle East, have had stronger incentives to exploit nuclear weapons as tools in nationalist platforms geared to helping their leaders survive in power. Solingen complements her bold argument with other logics explaining nuclear behavior, including security dilemmas, international norms and institutions, and the role of democracy and authoritarianism. Her account charts the most important frontier in understanding nuclear proliferation: grasping the relationship between internal and external political survival. Nuclear Logics is a pioneering book that is certain to provide an invaluable resource for researchers,

teachers, and practitioners while reframing the policy debate surrounding nonproliferation.

The Harmony Of The Gospels (Annotated Edition) St. Augustine of Hippo, 2012 This is the extended and annotated edition including * an extensive biographical annotation about the author and his life Book I. The treatise opens with a short statement on the subject of the authority of the Evangelists, their number, their order, and the different plans of their narratives. Augustine then prepares for the discussion of the questions relating to their harmony, by joining issue in this book with those who raise a difficulty in the circumstance that Christ has left no writing of His own, or who falsely allege that certain books were composed by Him on the arts of magic. He also meets the objections of those who, in opposition to the evangelical teaching, assert that the disciples of Christ at once ascribe more to their Master than He really was, when they affirmed that He was God, and

inculcated what they had not been instructed in by Him, when they interdicted the worship of the gods. Against these antagonists he vindicates the teaching of the Apostles, by appealing to the utterances of the Prophets, and by showing that the God of Israel was to be the sole object of worship, who also, although He was the only Deity to whom acceptance was denied in former times by the Romans, and that for the very reason that He prohibited them from worshipping other gods along with Himself, has now in the end made the Empire of Rome subject to His Name, and among all nations has broken their idols in pieces through the preaching of the Gospel, as He had promised by His prophets that the event should be. Book II. In this book Augustine undertakes an orderly examination of the Gospel according to Matthew, on to the narrative of the Supper, and institutes a comparison between it and the other Gospels by Mark, Luke, and John, with the view of demonstrating a complete harmony between the four Evangelists throughout all these sections. Book III. This book contains a demonstration of the harmony of the Evangelists from the accounts of the Supper on to the end of the Gospel, the narratives given by the several writers being collated, and the whole arranged in one orderly connection. Book IV. This book embraces a discussion of those passages which are peculiar to Mark, Luke, or John.

Hezbollah and Hamas Joshua L. Gleis, Benedetta Berti, 2012-08-15 A concise yet comprehensive overview of Hamas and Hezbollah. Hezbollah and Hamas are major players in Middle Eastern politics and have a growing involvement in global events. Despite their strikingly different beginnings, they share a common denominator—an adversary in Israel. Hezbollah and Hamas draws from primary interviews and documents coupled with a thorough review of current scholarship. This is a portrait of the organizations' roots, histories, ideologies, relationships, tactics, political outlooks, and futures. Joshua L. Gleis and Benedetta Berti present organization charts, maps, and a case study of the TriBorder Area in South America, which frequently serves as an operational center for terrorist groups. Recognizing that these two groups are increasingly relevant to U.S. national security, Gleis and Berti provide a comparative analysis of their histories and political missions that moves beyond reductionist portrayals of the organizations' military operations.

Television and Child Development Judith Van Evra, 2004-07-21 Television continues to play a major role in the lives of most children and adolescents, but current research also reflects the explosive growth in new technologies and their widespread use by young people. Integrating

information from communication literature as well as from child development and other psychological domains, author Judith Van Evra presents a summary and synthesis of what is currently known about the media's impact on children's physical, cognitive, social, and emotional development, to help discern the complex and significant interplay between other forces in a child's life and the use of various media. This third edition contains updated and expanded coverage of research findings and a review of changing trends in media use including computers, the Internet, books and magazines, music videos, and video games as well as television. New chapters focus on basic research designs and methodologies; cultural diversity; health-related matters and lifestyle choices; media's impact on various social-emotional aspects of a child's development; the use of technology for information and for entertainment; and intervention possibilities, parent strategies, and education. An overall conclusions section at the end of the book provides a cogent summary of findings to date and stimulates discussion of questions and ideas for future research. Television and Child Development explores how, and to what extent, television and other media actually affect children, and what role other variables may play in mediating their impact, so that we can maximize technology's potential for enriching children's cognitive, social, and emotional development, while at the same time minimizing any negative influence. This text is appropriate for researchers, teachers, and students in communications, developmental and social psychology, and education, as well as in areas of advertising, leisure studies, family studies, and health promotion.
