The Terrorist Argument Christopher C. Harmon,Randall G. Bowdish,2018-01-09 From chants and pamphlets to the Internet, terrorist propaganda can be deadly effective Propaganda used by terrorists and armed groups might not always be the most sophisticated or nuanced form of rhetoric, but with the right mix of emotion and logic it can be extremely effective in motivating supporters and frightening opponents. This book examines how terrorist groups in recent history have used propaganda, and how they had adapted to new communications technologies while retaining useful techniques from the past. Harmon and Bowdish trace how armed groups and terrorists around the globe have honed their messages for maximum impact, both on the communities they hope to persuade to support them and on the official state organs they hope to overthrow. Sometimes both the messages and the techniques are crude; others are highly refined, carefully crafted appeals to intellect or emotion, embracing the latest forms of communications technology. Whatever the ideas or methodology, all are intended to use the power of ideas, along with force, to project an image and to communicate—not merely intimidate. The Terrorist Argument uses nine case studies of how armed groups have used communications techniques with varying degrees of success: radio, newspapers, song, television, books, e-magazines, advertising, the Internet, and social media. It is fascinating reading for anyone interested in civil conflict, terrorism, communications theory and practice, or world affairs in general.

**China's Communication of the Belt and Road Initiative** Carolijn van Noort,2021-08-20 This book examines how China's international political communication of the Belt and Road Initiative comprises narratives about infrastructure and the Silk Road. By carefully selecting infrastructure modalities and Silk Road representations, it is argued that China's aesthetic production of the Belt and Road Initiative advances China's image as an infrastructure and standards-setting power, conjures up a historical continuation of friendly and cooperative relations, and forges China's identity as good neighbor, good friend, and good partner. Using a multiple-case study approach, this book analyses China's communication of the Second Belt and Road Forum, the Alternative North-South Road in Kyrgyzstan, the Standard Gauge Railway in Kenya, and the China-Maldives Friendship Bridge. Detailed literary analyses of the Travels of Marco Polo and the Travels of Ibn Battutah further elucidate China's selective uses of history. Chapters highlight spatial, temporal, political, economic, technological, and perceptual modalities in infrastructure narratives, and reveal the composition of Silk Road narratives, contributing to key debates about Chinese discourse, media strategy and infrastructure communication. China's Communication of the Belt and Road Initiative will appeal to students and scholars of politics, international relations, communication, and Asian studies globally.

Ocular Differential Diagnosis Frederick Hampton Roy,2012-03-31 The ninth edition of Ocular Differential Diagnosis is a practical manual to help practitioners make a quick diagnosis based on presentation and symptoms. The chapters are organised by regions of the eye, listing possible causes for each symptom in both common and uncommon disorders. Syndromes and diseases associated with exophthalmos, ptosis, strabismus, nystagmus, glaucoma, cataracts, uveitis and optic atrophy are discussed in detail. Drugs associated with each disorder are listed alphabetically and their recommended selection and dosage are in accordance with current practice. Diagnoses are listed alphabetically with more common and clinically significant disorders highlighted by asterisks. Further reading suggestions appear after each diagnostic description.

*The Asian Financial Crisis* Eddy Lee,1998 This study examines the social impact of the Asian financial crisis which began in July 1997. Several countries experienced an economic shock of unprecedented severity after decades of uninterrupted growth. The severe rise in unemployment and its repercussions in the worst-affected countries (Thailand, Republic of Korea and Indonesia) overwhelmed the underdeveloped systems of social protection. Higher unemployment and inflation combined to push many people into poverty. A central policy message is that current programmes of policy and institutional reform following the crisis, should include a basic rethinking of the social dimension of the future model of development. The author also argues for the introduction of unemployment insurance, the expansion of social assistance and the strengthening of active labour market policies.

*Annual World Bank Conference on Development Economics 1998* Boris Pleskovic,Joseph E. Stiglitz,1999 The 1998 Annual World Bank Conference on Development Economics, the tenth anniversary, was held at the Bank on April 20-21, 1998. The discussions focused on four areas of inquiry:1) the role of geography in countries'success, 2) the role of effective competition and regulatory policies, 3) the causes of financial crises and ways to prevent them, and 4) the effects of ethnic diversity on democracy and growth. The welcoming address by World Bank President James D. Wolfensohn, the opening remarks by chief Economist Joseph Stiglitz, and the tenth anniversary address by the International Monetary Fund Deputy Managing Director Stanley Fischer all focused both on the role of the conference and on the changing perspectives for development.

Arestis,L. de Paula,Luiz Fernando de Paula,2008-07-24 This book discusses the relationship between financial liberalization, financial deepening and economic performance from both a theoretical and a policy perspective, comparing several 'big' emerging countries: Argentina, Brazil, China, India, Russia, South Africa and India, amongst others.

**Are Your Meds Making You Sick?** Robert S. Gold,2013-03-15 Robert S. Gold, RPh, MBA, a clinical hospital pharmacist and affiliate instructor of clinical pharmacy at Purdue University with over 27 years of experience, shows the reader how to think like a clinical hospital pharmacist. He lists his 16 Rules of Safe Medication Use that, if followed, can help prevent the common problems that medications can cause; gives specific examples and scenarios featuring the thirty-six drugs that are the most common offenders; and explains how even seemingly good drugs can harm a patient's kidney, liver, brain and heart if the patient's medical history and physical vulnerabilities are not taken into account. *Are Your Meds Making You Sick? A Pharmacist's Guide to Avoiding Dangerous Drug Interactions, Reactions and Side-Effects* is highly accessible and formatted for quick reference by any layperson.

**Electrocardiography** H. Thomas Milhorn,2018-10 Primary care providers are often the first, and sometimes the only, point of contact for many patients within the healthcare system. The standard 12-lead electrocardiogram is one of the most common tests obtained and interpreted by primary care providers, with most reading their own recordings and basing clinical decisions on their findings. Primary care providers can achieve proficiency in the interpretation of over 95 percent of all electrocardiogram findings seen in the primary care setting. Although computerized interpretation is widely available, it is considered unreliable in up to 20 percent of the cases, making interpretation by primary care providers an essential skill. This book provides the necessary skills for primary care providers to use in interpreting electrocardiograms, both in their offices and in the emergency departments of their hospitals. This book is an outgrowth of a previous book, *Electrocardiography for the Family Physician*.

**Health Promotion** Nova Corcoran,2023-12-21 *Health Promotion: The Basics* introduces not only the fundamental theories and key concepts within this important area of health and social care, but translates these into practice for anyone working in the field. The chapters are structured around the WHO's Ottawa Charter (1986) which underpins the discipline, and cover a comprehensive range of topics. From developing personal skills to understanding government policy, the book looks at health promotion on both an individual and a societal level. It spotlights key topic areas from behaviour change to climate change, as well as exploring how where we live impacts our health, and features practical examples for integrating health promotion into existing service provision and through community action. Including case studies throughout, and further reading for those wishing to explore specific topics, this is the perfect introduction to what health promotion means and how it can improve everyday lives.

**Contractual Politics and the Institutionalization of Bureaucratic Influence** Glenn R. Parker,Suzanne L. Parker,2018-01-29 Analyzes long-term interest group/party alliances, with a focus on the part played by federal advisory committees. This book sheds light on the dealings between special interests and political parties by challenging three long-standing assumptions: that transactions between interest groups and parties are quid pro quo exchanges, such as the buying and selling of legislation; that the interrelationship between bureaucrats and interest groups is accommodating and friendly; and that special interests are single-minded in their pursuit of favorable policies, specifically legislation and regulations. The authors argue that political transactions are organized through durable informal agreements between interest groups and political parties, whereby parties obtain a dependable source of long-term campaign funds, and interest groups gain enduring favorable treatment in the political process. In response to interest group demands, legislatures such as Congress establish quasi-governmental appendages to federal agencies that oversee the administration of programs prized by special interests—namely, federal advisory committees. The authors examine the complex relationship between the establishment and influence of thousands of federal advisory committees and long-term interest group contributions to political parties. Now retired, Glenn R. Parker was Distinguished Professor of Political Science at Purdue University and is the author of many books, including *Capitol Investment\$: The Marketability of Political Skills*. Suzanne L. Parker, also now retired, was Associate Professor of Political Science at Purdue University. Together they have coauthored *Factions in House Committees*.

**Crisis and Recovery in Malaysia** Prema-chandra Athukoralge,2001-01-01 'Professor Athukorala tells a fascinating story of one of the most successful economies in the world economy in the last decades, from the inception of its liberalisation policy to its radical decision to pursue an independent recovery path after the 1997 Asian financial crisis. This is case-study economics at its best. The book is superbly organised, meticulously researched and clearly written; a treat for professional economists and policymakers alike.' - Tony Thirlwall, University of Kent, UK 'Malaysia is one of the great success stories of the last quarter of the twentieth century. From 1988 it had one of the highest growth rates in the world, and it managed to maintain ethnic peace in an undoubtedly difficult environment. Recently it has provided a major laboratory experiment of the use of capital controls at a time of crisis when a country is highly integrated in the world capital market. This excellent book presents the first careful analysis of the nature and effects of these controls, as well as providing a thorough background of how the Asian crisis played out in Malaysia.' - W.Max Corden, The Johns Hopkins University, US In the light of the Malaysian experience during the Asian financial crisis, this book examines the role of

international capital mobility in making countries susceptible to financial crises and the use of capital controls as a crisis management tool. Malaysia provides an interesting case study of this subject given its significant capital market liberalisation prior to the onset of the crisis, and its fundamental shift in crisis management policy in September 1998. The prime focus of the book is on Malaysia's radical policy decision to pursue an independent recovery path, cut off from world markets by a system of capital control, as a viable alternative to the conventional market centred approach. The analysis suggests that, against the initial dire predictions of many economists, the capital controls have actually played a crucial supportive role in crisis management. Whether the controls have played a special role in delivering a superior recovery outcome in Malaysia compared to IMF-program countries remains a point of contention. However, there is strong evidence to suggest that this pragmatic policy choice was instrumental in achieving recovery, while minimising potential economic disruption and related social costs.

**Global Economic Prospects and the Developing Countries**, 1999 This is the ninth edition of the annual report, prepared by the World Bank's Development Prospects Group. The series provides an annual assessment of global economic prospects as they affect developing countries and analyzes the links between developing countries and the world economy, particularly in the areas of trade, foreign direct investment, and other capital flows. In addition, each Global Economic Prospects addresses a few important topics, such as the expansion of global production and the costs of making the transition to a more open economy, as discussed in last year's report. Global Economic Prospects is part of an ongoing attempt to understand the dynamics of globalization, including its promises and its potential pitfalls. Includes statistical section of global economic indicators.

**Breathing Flesh** Rune Nyord, 2009 The ancient Egyptian Coffin Texts form a corpus of ritual spells written on the inside of coffins from the Middle Kingdom (c. 2000-1650 BCE). Thus accompanying the deceased in a very concrete sense, the spells are part of a long Egyptian tradition of equipping the dead with ritual texts ensuring the transition from the state of a living human being to that of a deceased ancestor. The texts present a view of death as entailing threats to the function of the body, often conceptualised as bodily fragmentation or dysfunction. In the transformation of the deceased, the restoration of these bodily dysfunctions is of paramount importance, and the texts provide detailed accounts of the ritual empowerment of the body to achieve this goal. Seen from this perspective, the Coffin Texts provide a rich material for studying ancient Egyptian conceptions of the body by providing insights into the underlying structure of the body as a whole and the proper function of individual part of the body as seen by the ancient Egyptians. Drawing on a theoretical framework from cognitive linguistics and phenomenological anthropology, *Breathing Flesh* presents an analysis of the conceptualisation of the human body and its individual parts in the ancient Egyptian Coffin Texts. From this starting point, more overarching concepts and cultural models are discussed, including the ritual conceptualisation of the acquisition and use of powerful substances such as magic, and the role of fertility and procreation in ancient Egyptian mortuary conceptions.

**Exchange-Rate Regimes and Capital Flows** George S. Tavlas, Michael K. Ulan, 2002 Recent international financial crises have brought the issue of reforming the international financial system to the forefront of debates. Is the current international monetary system a sufficient foundation? Or do the recent crises indicate that the current architecture is inadequate? This issue of *The Annals* takes stock of both arguments and presents positions held both by leading proponents of reform and to leading proponents of the existing architecture. It reviews the core of the debate: · reform of the exchange rate arrangements · the role of the International Monetary Fund · and the role of the private sector in crisis resolution. Presenting a wide spectrum of viewpoints and reviewing the lessons learned from recent financial crises, the exchange rate debate is placed in a clear context, making this critical issue more accessible.

**Quantities, Units and Symbols in Physical Chemistry** E Richard Cohen, Tom Cvitas, Jeremy G Frey, Bertil Holström, Kozo Kuchitsu, Roberto Marquardt, Ian Mills, Franco Pavese, Martin Quack, Jüergen Stohner, Herbert L Strauss, Michio Takami, Anders J Thor, 2007-10-31 The first IUPAC Manual of Symbols and Terminology for Physicochemical Quantities and Units (the Green Book) of which this is the direct successor, was published in 1969, with the object of 'securing clarity and precision, and wider agreement in the use of symbols, by chemists in different countries, among physicists, chemists and engineers, and by editors of scientific journals'. Subsequent revisions have taken account of many developments in the field, culminating in the major extension and revision represented by the 1988 edition under the simplified title *Quantities, Units and Symbols in Physical Chemistry*. This 2007, Third Edition, is a further revision of the material which reflects the experience of the contributors with the previous editions. The book has been systematically brought up to date and new

sections have been added. It strives to improve the exchange of scientific information among the readers in different disciplines and across different nations. In a rapidly expanding volume of scientific literature where each discipline has a tendency to retreat into its own jargon this book attempts to provide a readable compilation of widely used terms and symbols from many sources together with brief understandable definitions. This is the definitive guide for scientists and organizations working across a multitude of disciplines requiring internationally approved nomenclature.
