Backing Up in Windows 10: Never Lose Data Again, Using Tools You Already Have and Tools You Get for Free Leo A.

Notenboom,2018-01-25 Backups are confusing! It's something I talk about often: nothing is more important than backing up. Anything can happen, and everything can be lost. The problem? Backing up is confusing and it's much harder than it should be. That is, of course, unless you have help. Backing Up in Windows 10 is here to help you get backed up. Tools you already have Backing Up in Windows 10 shows you how to use the tools you already have -- the tools built in to Windows 10 itself -- to protect yourself with a top-to-bottom backup. Making and restoring Image Backups to save absolutely everything on your computer. Restoring individual files from an Image Backup, so you don't have to restore everything just to get a few things. Setting up File History to make nearly continuous backups as you work, and well as restore files it's saved for you. How to use OneDrive to act as your automatic off-site backup. How to use all three -- Image Backups, File History, and OneDrive -- to recover from the nastiest of the nasty: ransomware! But that's not all. Inexplicably, Microsoft may be removing some backup tools from future versions of Windows 10. Not a problem! I've got you covered. Tools you can get for free In preparation for Microsoft's (can I say boneheaded?) decision, I'm including chapters to: Create an image backup Create an emergency disk Restore an image backup Extract individual files from an image ... all using the FREE version of EaseUS Todo backup software. Heck, using a third-party program like EaseUS Todo is exactly what Microsoft recommends. Also included On registering your book you'll also get access to: A downloadable PDF version you can read on any device capable of displaying PDF files. A downloadable MOBI version of the book, ideal for Kindle. A downloadable EPUB version of the book, ideal for a variety of other ebook readers. Prioritized support to get your questions answered. Updates for life Once you purchase and register the book, you're entitled to digital updates for life. As the book is updated, corrections made, or even new editions published, you'll have immediate access to the digital downloads.

**Interagency Report on the Status of International Cybersecurity Standardization for the Internet of Things (IoT)** Mike Hogan,2018 The Interagency International Cybersecurity Standardization Working Group (IICS WG) was established in December

2015 by the National Security Council's Cyber Interagency Policy Committee. Its purpose is to coordinate on major issues in international cybersecurity standardization and thereby enhance U.S. federal agency participation in the process. Effective U.S. Government participation involves coordinating across the federal government and working with the U.S. private sector. The U.S. relies more heavily on the private sector for standards development than do many other countries. Companies and industry groups, academic institutions, professional societies, consumer groups, and other interested parties are major contributors to this process. Further, the many Standards Developing Organizations (SDOs) which provide the infrastructure for the standards development are overwhelmingly private sector organizations. On April 25, 2017, the IICS WG established an Internet of Things (IoT) Task Group to determine the current state of international cybersecurity standards development for IoT. This report is intended for use by the working group member agencies to assist them in their standards planning and to help coordinate U.S. Government participation in international cybersecurity standardization for IoT. Other organizations may also find this document useful in their planning.
