Transparent Lives Colin J. Bennett, Kevin D. Haggerty, David Lyon, Valerie Steeves, 2014-04-01 Although most Canadians are familiar with surveillance cameras and airport security, relatively few are aware of the extent to which the potential for surveillance is now embedded in virtually every aspect of our lives. We cannot walk down a city street, register for a class, pay with a credit card, hop on an airplane, or make a telephone call without data being captured and processed. Where does such information go? Who makes use of it, and for what purpose? Is the loss of control over our personal information merely the price we pay for using social media and other forms of

electronic communication, or should we be wary of systems that make us visible—and thus vulnerable—to others as never before? The work of a multidisciplinary research team, *Transparent Lives* explains why and how surveillance is expanding—mostly unchecked—into every facet of our lives. Through an investigation of the major ways in which both government and private sector organizations gather, monitor, analyze, and share information about ordinary citizens, the volume identifies nine key trends in the processing of personal data that together raise urgent questions of privacy and social justice. Intended not only to inform but to make a difference, the volume is deliberately aimed at a broad audience, including legislators and policymakers, journalists, civil liberties groups, educators, and, above all, the reading public. <http://surveillanceincanada.org/>

Environmental Engineering Dictionary and Directory Thomas M. Pankratz, 2000-09-22 Like most technical disciplines, environmental science and engineering is becoming increasingly specialized. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many environmental science related terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a

complete list of brand terms, brand names, and trademarks - right at your fingertips.

The DARPA Urban Challenge Martin Buehler, Karl Iagnemma, Sanjiv Singh, 2009-11-26 By the dawn of the new millennium, robotics has undergone a major transformation in scope and dimensions. This expansion has been brought about by the maturity of the field and the advances in its related technologies. From a largely dominant industrial focus, robotics has been rapidly expanding into the challenges of the human world. The new generation of robots is expected to safely and dependably co-habitat with humans in homes, workplaces, and communities, providing support in services, entertainment, education, healthcare, manufacturing, and assistance. Beyond its impact on physical robots, the body of knowledge robotics has produced is revealing a much wider range of applications reaching across diverse research areas and scientific disciplines, such as: biomechanics, haptics, neurosciences, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are proving an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The goal of the series of Springer Tracts in Advanced Robotics (STAR) is to bring, in a timely fashion, the latest advances and developments in robotics on the basis of their significance and quality. It is our hope that the wider dissemination of research developments will stimulate more exchanges and collaborations among the research community and contribute to further advancement of this rapidly growing field.

Handbook of Research on Metaheuristics for Order Picking Optimization in Warehouses to Smart Cities Ochoa Ortiz-Zezzatti, Alberto, Rivera, Gilberto, Gómez-Santillán, Claudia, Sánchez-Lara, Benito, 2019-04-05 Building accurate algorithms for the optimization of picking orders is a difficult task, especially when one considers the delays of real-world situations. In warehouse environments, diverse algorithms must be developed to enhance the global performance relating to combining customer orders into picking orders to reduce wait times. The Handbook of Research on Metaheuristics for Order Picking Optimization in Warehouses to Smart Cities is a pivotal reference source that addresses strategies for developing able algorithms in order to build better picking orders and the impact of these strategies on the picking systems in which diverse algorithms are implemented. While highlighting topics such as ABC optimization, environmental intelligence, and order batching, this publication examines common picking aspects in warehouse environments ranging from manual order picking systems to automated retrieval systems. This book is intended for researchers, teachers, engineers, managers, and practitioners seeking research on algorithms to enhance the order picking performance.

DNA and RNA Modification Enzymes Henri Grosjean, 2009-06-11 This volume is a timely and comprehensive description of the many facets of DNA and RNA modification-editing processes and to some extent repair mechanisms. Each chapter offers fundamental principles as well as up to date information on recent advances in the field (up to end 2008). They ended by a short 'conclusion and future prospect' section and an exhaustive list of 35 to up to 257 references (in average 87). Contributors are geneticists, structural enzymologists and molecular biologists working at the forefront of this exciting, fast-moving and diverse field of researches. This book will be a major interest to PhD students and University teachers alike. It will also serve as an invaluable reference tool for new researchers in the field, as well as for specialists of RNA modification enzymes generally not well informed about what is going on in similar processes acting on DNA and vice-versa for specialists of the DNA modification-editing and repair processes usually not much acquainted with what is going on in the RNA maturation field. The book is subdivided into 41 chapters (740 pages). The common links between them are mainly the enzymatic aspects of the different modification-editing and repair machineries: structural, mechanistic, functional and evolutionary aspects. It starts with two general and historical overview of the discovery of modified nucleosides in DNA and RNA and corresponding modification-editing enzymes. Then follows eleven chapters on DNA modification and editing (mechanistic and functional aspects). Two additional chapters cover problems related to DNA/RNA repair and base editing by C-to-U deaminases, followed by three chapters on RNA editing by C-to-U and A-to-I type of deamination. Discussions about interplay between DNA and RNA modifications and the emergence of DNA are covered in two independent chapters, followed by twenty chapters on different but complementary aspects of RNA modification enzymes and their cellular implications. The last chapter concerns the description of the present state-of-the art for incorporating modified nucleosides by in vitro chemical synthesis. At the end of the book, six appendices give useful details on modified nucleosides, modification-editing enzymes and nucleosides analogs. This information is usually difficult to obtain from current scientific literature.

A Liberated Mind Steven Hayes, 2019-08-27 Over the last 35 years, Steven C. Hayes and his colleagues have developed Acceptance and Commitment Therapy (ACT) with many hundreds of studies supporting the impact of his approach on everything from chronic pain to weight loss to prejudice and bigotry. *A Liberated Mind* is the summary of Steven's life's work which will teach readers how to live better, happier and more fulfilled lives by applying the six key processes of ACT. Put together these processes teach us to pivot: to "defuse" rather than fuse with our thoughts; to see life from a new perspective; and to discover our chosen values, those qualities of being that fuel meaning. Steve shares fascinating research results like how ACT techniques decreased typing errors on a clerical test or showed that positive affirmations actually increase negative emotion. And he weaves them with stories of clients and colleagues as well as his own riveting story of healing himself of a severe panic disorder, which is how the idea of psychological flexibility was born. *A Liberated Mind* is a powerful and

important book about a new form of psychology, destined to become a modern classic of narrative psychology on par with *Daring Greatly* and *Rising Strong* by Brene Brown, or Carol Dweck's *Mindset*.
