Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Race, Ethnicity, and Place in a Changing America, Third Edition John W. Frazier,Eugene L. Tettey-Fio,Norah F. Henry,2017-01-12 Uses both historical and contemporary case studies to examine how race and ethnicity affect the places we live, work, and visit. This book examines major Hispanic, African, and Asian diasporas in the continental United States and Puerto Rico from the nineteenth century to the present, with particular attention on the diverse ways in which these immigrant groups have shaped and reshaped American places and landscapes. Through both historical and contemporary case studies, the contributors examine how race and ethnicity affect the places we live, work, and visit, illustrating along the way the behaviors and concepts that comprise the modern ethnic and racial geography of immigrant and minority groups. While primarily addressed to students and scholars in the fields of racial and ethnic geography, these case studies will be accessible to anyone interested in race-place connections, race-ethnicity boundaries, the development of racialization, and the complexity of human settlement patterns and landscapes that make up the United States and Puerto Rico. Taken together, they show how individuals and culture groups, through their ideologies, social organization, and social institutions, reflect both local and regional processes of place-making and place-remaking that occur within and beyond the continental United States.

Catch documentation schemes for deep-sea fisheries in the ABNJ - Their value, and options for implementation Food and Agriculture Organization of the United

Nations,2019-04-15 This paper discusses the potential value of catch documentation schemes (CDS) in deep-sea fisheries, and the implementation aspects that have to be taken into account to ensure the effectiveness of this trade-based tool to combat illegal, unreported and unregulated (IUU) fishing. The paper argues that the schemes are indeed useful for addressing IUU fishing practices known to occur in deep-sea fisheries, and that their adoption would improve compliance with fisheries management requirements. Key infringements that could be directly detected and addressed include - but are not limited to - violations of closed areas harbouring protected vulnerable marine ecosystems in the deep ocean, and quota overfishing. The paper also establishes the notion that partial coverage of given species through a CDS at the level of regional fisheries management organizations is incongruous. Given that most deep-sea fisheries species have broad distributions that straddle many regional organizations, the most suitable implementation model appears to be a centrally operated electronic CDS platform - called a super-CDS - shared by a plurality of institutional and state players.

DNA Is Not Destiny: The Remarkable, Completely Misunderstood Relationship between You and Your Genes Steven J. Heine,2017-04-18 "[An] important book.… Heine's vibrant writing makes it come alive with personal significance for every reader."—Carol Dweck, author of Mindset Scientists expect one billion people to have their genomes sequenced by 2025. Yet cultural psychologist Steven J. Heine argues that, in trying to know who we are and where we come from, we're likely to completely misinterpret what's "in our DNA." Heine's fresh, surprising conclusions about the promise, and limits, of genetic engineering and DNA testing upend conventional thinking and reveal a simple, profound truth: your genes create life—but they do not control it.
