*The Golden Book of Dutch Navigators* Hendrik Willem Van Loon, 2006-05-01 The one permanent move for obtaining peace, which has not yet been suggested, with any reasonable chance of attaining its object, is by an agreement among the great powers, in which each should pledge itself not only to abide by the decisions of a common tribunal but to back with force the decisions of that common tribunal. The great civilized nations of the world which do possess force, actual or immediately potential, should combine by solemn agreement in a great World League for the Peace of Righteousness. -from World Peace Theodore Roosevelt was still a young man when he left the Oval Office, and he remained a vigorous force on the American scene. The great influence he continued to hold over the public allowed him to contest the policies of President Woodrow Wilson, particularly Wilson's conduct in the leadup to America's belated entry into World War I. In this 1915 work, Roosevelt lays out the moral and political case for coming to the aid of the nation's European allies, from the ethics of self-defense to the practicalities of preparing for war. Roosevelt's arguments are compelling and humane, but agree with him or not, here is an essential part of the powerful basis for his place in American history as the architect of the American Century, as well as a revealing picture of the character of one of the great American personalities. Also available from Cosimo Classics: Roosevelt's Letters to His Children, A Book-Lover's Holidays in the Open, Through the Brazilian Wilderness and Papers on Natural History, Ranch Life and the Hunting Trail, The Strenuous Life: Essays and Addresses, and Historic Towns: New York OF INTEREST TO: Roosevelt fans, students of the American presidency, readers of World War I Politician and soldier, naturalist and historian, American icon THEODORE ROOSEVELT (1858-1919) was 26th President of the United States, serving from 1901 to 1909, and the first American to win a Nobel Prize, in 1906, when he was awarded the Peace Prize for mediating the Russo-Japanese War. He is the author of 35 books.

Propertius in Love Sextus Propertius, 2002-06-03 These ardent, even obsessed, poems about erotic passion are among the brightest jewels in the crown of Latin literature. Written by Propertius, Rome's greatest poet of love, who was born around 50 b.c., a contemporary of Ovid, these elegies tell of Propertius' tormented relationship with a woman he calls Cynthia. Their connection was sometimes blissful, more often agonizing, but as the poet came to recognize, it went beyond pride or shame to become the defining event of his life. Whether or not it was Propertius' explicit intention, these elegies extend our ideas of desire, and of the human condition itself.

**On Their Own Terms** Benjamin A. Elman, 2009-07-01 In On Their Own Terms, Benjamin A. Elman offers a much-needed synthesis of early Chinese science during the Jesuit period (1600-1800) and the modern sciences as they evolved in China under Protestant influence (1840s-1900). By 1600 Europe was ahead of Asia in producing basic machines, such as clocks, levers, and pulleys, that would be necessary for the mechanization of agriculture and industry. In the seventeenth and eighteenth centuries, Elman shows, Europeans still sought from the Chinese their secrets of producing silk, fine textiles, and porcelain, as well as large-scale tea cultivation. Chinese literati borrowed in turn new algebraic notations of Hindu-Arabic origin, Tychonic cosmology, Euclidian geometry, and various computational advances. Since the middle of the nineteenth century, imperial reformers, early Republicans, Guomindang party cadres, and Chinese Communists have all prioritized science and technology. In this book, Elman gives a nuanced account of the ways in which native Chinese science evolved over four centuries, under the influence of both Jesuit and Protestant missionaries. In the end, he argues, the Chinese produced modern science on their own terms.

**Twitter and Tear Gas** Zeynep Tufekci, 2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

**The History of Virginia** Robert Beverley,Charles Campbell,1855

**The Frozen Pirate** William Clark Russell,2020-09-28 ÊThe Laughing Mary was a light ship, as sailors term a vessel that stands high upon the water, having discharged her cargo at Callao, from which port we were proceeding in ballast to Cape Town, South Africa, there to call for orders. Our run to within a few parallels of the latitude of the Horn had been extremely pleasant; the proverbial mildness of the Pacific Ocean was in the mellow sweetness of the wind and in the gentle undulations of the silver-laced swell; but scarce had we passed the height of forty-nine degrees when the weather grew sullen and dark, a heavy bank of clouds of a livid hue rose in the north-east, and the wind came and went in small guns, the gusts venting themselves in dreary moans, insomuch that our oldest hands confessed they had never heard blasts more portentous. The gale came on with some lightning and several claps of thunder and heavy rain. Though it was but two o'clock in the afternoon, the air was so dusky that the men had to feel for the ropes; and when the first of the tempest stormed down upon us the appearance of the sea was uncommonly terrible, being swept and mangled into boiling froth in the north-east quarter, whilst all about us and in the south-west it lay in a sort of swollen huddle of shadows, glooming into the darkness of the sky without offering the smallest glimpse of the horizon. In a few minutes the hurricane struck us. We had bared the brig down

to the close-reefed main-topsail; yet, though we were dead before the outfly, its first blow rent the fragment of sail as if it were formed of smoke, and in an instant it disappeared, flashing over the bows like a scattering of torn paper, leaving nothing but the bolt-ropes behind. The bursting of the topsail was like the explosion of a large cannon. In a breath the brig was smothered with froth torn up in huge clouds, and hurled over and ahead of her in vast quivering bodies that filled the wind with a dismal twilight of their own, in which nothing was visible but their terrific speeding. Through these slinging, soft, and singing masses of spume drove the rain in horizontal steel-like lines, which gleamed in the lightning stroke as though indeed they were barbed weapons of bright metal, darted by armies of invisible spirits raving out their war cries as they chased us.

**The Democratization of Artificial Intelligence** Andreas Sudmann, 2019-10-31 After a long time of neglect, Artificial Intelligence is once again at the center of most of our political, economic, and socio-cultural debates. Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI-rendered future. Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks, for producing sentencing guidelines and recidivism risk profiles in criminal justice systems, for demographic and psychographic targeting of bodies for advertising or propaganda, and more generally for automating the analysis of language, text, and images. Against this background, the aim of this book is to discuss the heterogeneous conditions, implications, and effects of modern AI and Internet technologies in terms of their political dimension: What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms?
